Before You Begin:

- Verify that all hardware and parts listed in the included assembly guide are present.

- Keep children and pets away from the assembly area.
- Gather necessary tools (typically a Phillips head screwdriver and Allen wrench, often included).

2. Install the center support beam (if applicable).
3. Place and secure the wooden slats onto the side rails. Ensure they are evenly spaced and firmly attached.

- Place a twin-sized mattress (maximum 6 inches thick recommended) directly onto the wooden slats. No box spring is required.
- Ensure the mattress is centered and fully supported by the slats.

Using the Storage Drawers:

- The two storage drawers are designed to slide smoothly on casters.
- To open, gently pull the drawer handle. To close, push the drawer back until it is flush with the bed frame.
- These drawers can be positioned on either side of the daybed.
- Do not overload the drawers to ensure smooth operation and prevent damage to the casters or drawer structure.

MAINTENANCE

- **Cleaning:** Wipe the wood surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners that could

damage the finish.

- **Hardware Check:** Periodically check all bolts and screws to ensure they remain tight. Retighten if necessary, but do not overtighten.
- **Drawer Casters:** Keep the drawer casters free of debris to ensure smooth operation. If they become stiff, a small amount of silicone lubricant can be applied.
- **Avoid Excessive Moisture:** Protect the daybed from prolonged exposure to moisture or direct sunlight to prevent warping or fading.

TROUBLESHOOTING

- **Squeaking Noises:** If the bed squeaks, check all hardware connections and tighten any loose bolts or screws. Ensure slats are properly seated.
- **Drawers Sticking:** Check for obstructions under the bed or in the drawer tracks. Ensure casters are clean and functioning.
- **Instability:** Re-verify that all assembly steps were followed correctly and all hardware is securely tightened. Do not use the bed if it feels unstable.
