Setup Guide

1. **Connect the Mouse:** Plug the USB connector of the Redragon M808 Storm mouse into an available USB port on your computer. The operating system will typically detect and install the necessary drivers automatically.
2. **Software Installation (Optional but Recommended):** For full customization of DPI settings, RGB lighting, and programmable buttons, download the official Redragon software from the Redragon website. Follow the on-screen instructions to complete the installation.

Operating Instructions

Button Functions

The Redragon M808 Storm features 7 programmable buttons. The default functions are:

- **Left Click:** Primary action.

- **Right Click:** Secondary action/context menu.
- **Scroll Wheel (Click):** Middle click.
- **DPI Cycle Button:** Cycles through preset DPI levels.
- **Forward Button:** Navigates forward in web browsers/folders.
- **Backward Button:** Navigates backward in web browsers/folders.
- **Additional Programmable Button(s):** Customizable via software.

DPI Adjustment

The mouse supports a DPI range from 100 to 12400. You can cycle through preset DPI levels using the dedicated DPI button. For precise adjustment and to set custom DPI stages, use the Redragon software.

RGB Lighting Customization

The M808 Storm features 16.8 million customizable RGB colors. Lighting effects, brightness, and color schemes can be configured using the Redragon software. This allows for personalized aesthetics to match your setup.

Maintenance

- **Cleaning:** To clean the honeycomb shell and other surfaces, use a soft, dry cloth. For stubborn dirt, a slightly damp cloth can be used, ensuring no moisture enters the internal components. A soft brush, such as a toothbrush, can be used to gently clean debris from the honeycomb cutouts.
- **Cable Care:** The mouse features a no-drag weave cable. Avoid sharp bends or excessive pulling on the cable to prevent damage. Store the cable neatly when not in use.
- **Sensor Maintenance:** Keep the optical sensor on the underside of the mouse clean and free from dust or debris to ensure accurate tracking.

Troubleshooting

- **Mouse Not Responding:**
  - Ensure the USB cable is securely plugged into a working USB port.
  - Try plugging the mouse into a different USB port or another computer to rule out port or system issues.
  - Restart your computer.
- **DPI or RGB Settings Not Changing:**
  - Ensure the Redragon software is installed and running.
  - Verify that settings are applied and saved within the software.
  - Check for software updates on the Redragon website.
- **Inaccurate Tracking:**
  - Clean the optical sensor on the bottom of the mouse.
  - Ensure you are using the mouse on a suitable surface (e.g., a mouse pad).

Product Specifications

Model Number	M808-WT
Brand	Redragon
Color	White
Connectivity Technology	USB
Movement Detection Technology	Optical (Pixart 3327 PRO Sensor)
