TROUBLESHOOTING

Issue	Possible Solution
No audio from headset	Ensure the headset is powered on and paired with the USB dongle. Check the volume wheel on the headset and system volume settings. Verify the HyperX Cloud II Wireless is selected as the default audio output device. Try plugging the USB dongle into a different USB port, preferably directly on the motherboard for PCs.
Microphone not working	Ensure the microphone is securely attached and not muted (LED off). Check system sound settings to ensure the HyperX Cloud II Wireless is selected as the default input device. Update headset firmware and NGENUITY software.
Headset not pairing	Ensure both headset and dongle are powered on. Try re-pairing by pressing the small button on the dongle and then the power button on the headset. Move closer to the USB dongle to rule out range issues.
Short battery life	Ensure the headset is fully charged before use. Battery life can vary based on usage and volume levels.
