SETUP GUIDE

1. Wireless Connection:

- Locate the USB receiver. It is typically stored in a compartment on the underside of the mouse.
- Plug the USB receiver into an available USB port on your computer (desktop or laptop).
- Turn on the mouse using the ON/OFF switch located on the bottom of the mouse.
- The mouse should automatically connect to your computer. If not, try moving the mouse closer to the receiver or re-inserting the receiver.

2. Wired Connection (Optional/Charging):

- Connect the provided data cable to the charging port on the front of the mouse.
- Plug the other end of the data cable into a USB port on your computer.
- The mouse will function as a wired mouse and will also charge its internal battery.

OPERATING INSTRUCTIONS

DPI Adjustment

The T66 mouse features a dedicated DPI button, usually located behind the scroll wheel, allowing you to switch between four sensitivity levels:

- 800 DPI
- 1600 DPI
- 2400 DPI
- 3600 DPI

Press the DPI button to cycle through these settings. The change in DPI will be indicated by a brief change in the mouse's LED lighting or a visual cue on your screen (if supported by your operating system).

RGB Backlight Modes

The mouse offers 7 types of RGB backlight modes. These can typically be cycled through by pressing a specific button (often a combination of buttons or a dedicated light button, refer to the mouse's physical layout for exact button). Experiment with the modes to find your preferred lighting effect.

Image: The T66 mouse displaying its vibrant RGB lighting effects from various angles, highlighting the customizable backlight modes.

General Usage

- **Left Click:** Standard selection and activation.
- **Right Click:** Opens context menus.
- **Scroll Wheel:** Scrolls content up and down. Can also be pressed for middle-click functionality.
- **Side Buttons:** Often configured as 'Forward' and 'Backward' in web browsers and file explorers. Their function can sometimes be customized via software (if available).

Image: A detailed close-up of the T66 mouse's scroll wheel, showing its textured surface for precise scrolling.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to wipe the mouse. For stubborn dirt, slightly dampen the cloth with water or a mild cleaning solution. Avoid harsh chemicals.
- **Sensor Care:** Keep the optical sensor on the bottom of the mouse clean and free from dust or debris to ensure accurate tracking.
- **Battery Care:** To prolong battery life, avoid fully discharging the mouse frequently. Charge it when the battery indicator is low. If storing for a long period, charge it to about 50% and turn it off.
- **Storage:** Store the mouse in a cool, dry place away from direct sunlight and extreme temperatures.

TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Mouse not responding (Wireless)	◦ Mouse is off ◦ Low battery ◦ USB receiver not connected or loose ◦ Out of range ◦ Interference	◦ Turn on the mouse ◦ Charge the mouse ◦ Ensure receiver is firmly plugged in; try a different USB port ◦ Move mouse closer to the receiver (within 10m) ◦ Move away from other 2.4GHz devices
Mouse cursor erratic or jumpy	◦ Dirty optical sensor ◦ Uneven surface	◦ Clean the optical sensor on the bottom of the mouse ◦ Use the mouse on a clean, flat, opaque surface or a mouse pad
RGB lights not working	◦ RGB mode turned off ◦ Low battery	◦ Press the RGB mode button to cycle through modes ◦ Charge the mouse
Mouse not charging	◦ Data cable not connected properly ◦ Faulty USB port	◦ Ensure data cable is firmly connected to both mouse and computer ◦ Try a different USB port on your computer
