OKP K2

OKP Life K2 Robot Vacuum Cleaner Instruction Manual

MODEL: K2

Brand: OKP

1. INTRODUCTION AND OVERVIEW

The OKP Life K2 Robot Vacuum Cleaner is designed to simplify your daily home cleaning routine. This intelligent device features a powerful digital motor and a unique brushless suction port, making it highly effective at picking up debris without the common issue of pet hair entanglement. Its advanced 6D built-in anti-collision infrared sensors, part of the FreeMove Technology 2.0, ensure efficient navigation and obstacle avoidance, providing thorough cleaning with lower power consumption.

The K2 offers extended cleaning sessions with a runtime of up to 100 minutes before automatically returning to its charging dock. Control is made easy through the dedicated OKP app, or via voice commands using Amazon Alexa and Google Assistant. Choose from four distinct cleaning modes—Auto, Spot, Wall Follow, and Manual—to suit your specific cleaning needs.

2. WHAT'S IN THE BOX

Upon unboxing your OKP Life K2 Robot Vacuum Cleaner, please ensure all the following components are present:

- User Manual
- Robot Vacuum
- Charging Dock
- Side Brush (x2)
- HEPA Filter (pre-installed)

3. SETUP

3.1 Charging Dock Placement

Place the charging dock against a wall in an open, uncluttered area. Ensure there is at least 1 meter (3 feet) of clear space on both sides of the dock and 2 meters (6 feet) in front of it. This allows the robot to easily locate and return to the dock for recharging.

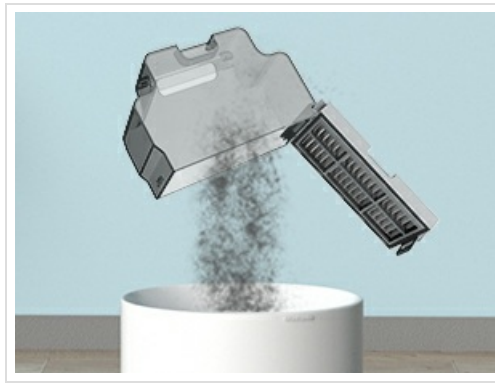

Figure 3: Robot Vacuum Self-Charging

3.2 Initial Charge

Before first use, fully charge the robot vacuum. Place the robot on the charging dock, ensuring the charging contacts align. The indicator light on the robot will show charging status. A full charge typically takes several hours.

3.3 App and Voice Control Setup

Download the OKP app from your smartphone's app store. Follow the in-app instructions to connect your robot vacuum to your home Wi-Fi network. Once connected, you can link the OKP app to Amazon Alexa or Google Assistant for convenient voice control. This allows you to start, stop, or schedule cleaning sessions remotely.

4. OPERATING MODES

The OKP Life K2 Robot Vacuum Cleaner offers four distinct cleaning modes to address various cleaning scenarios:

- **Auto Clean:** The robot intelligently navigates your home, cleaning systematically to cover all accessible areas.
- **Spot Clean:** Ideal for concentrated dirt or spills. Place the robot directly over the area, and it will clean in a spiral pattern.
- **Wall Follow Clean:** The robot cleans along walls and edges, ensuring thorough coverage of room perimeters.
- **Manual Clean:** Use the OKP app or remote control to manually direct the robot to specific areas.

You can easily switch between these modes and adjust suction power levels via the OKP app.

5. MAINTENANCE

Regular maintenance ensures optimal performance of your robot vacuum. The K2 features a 500ml visible dust box and a HEPA filter for effective debris collection.

5.1 Emptying the Dust Box and Cleaning the Filter

It is recommended to empty the 500ml dust box after each cleaning session, especially if you have pets. To do so, open the top cover of the robot, remove the dust box, and dispose of the collected debris. The HEPA filter should also be cleaned regularly by tapping it gently to remove dust. Replace the HEPA filter periodically as recommended in the full user manual.

5.2 Cleaning Side Brushes and Sensors

Periodically check and clean the side brushes for any tangled hair or debris. The brushless suction port design minimizes entanglement, but occasional inspection is still beneficial. Wipe the anti-collision and anti-fall sensors with a clean, dry cloth to ensure they function correctly and prevent navigation issues.

6. TROUBLESHOOTING

If your OKP Life K2 Robot Vacuum Cleaner is not performing as expected, consider the following common issues:

- **No Suction:** Ensure the robot is operating in HIGH running working mode. This can be verified and adjusted via the OKP app. Check if the dust box is full or if the filter is clogged.
- **Navigation Issues:** The robot is equipped with FreeMove Technology 2.0 and 6D anti-collision sensors. If it frequently bumps into objects or gets stuck, ensure the sensors are clean and free from obstructions. Clear any loose cables or small objects from the cleaning path.
- **Not Charging:** Verify that the charging dock is properly plugged in and that the robot's charging contacts are clean and aligned with the dock's contacts.
- **Short Runtime:** If the robot's runtime is significantly shorter than the advertised 100 minutes, it might be operating in a higher suction mode, or the battery may need to be fully recharged.

For more detailed troubleshooting steps, please refer to the comprehensive user manual provided with your product.

7. SPECIFICATIONS

Feature	Specification
Brand	OKP
Model Name	OKP K2
Special Feature	Anti-Fall
Color	Blue
Product Dimensions	11.02"L x 11.02"W x 2.99"H
Included Components	User Manual, Robot Vacuum, Charging Dock, Side Brush, HEPA

Filter Type	Cartridge
Battery Life	1 years
Voltage	19.6 Volts
Capacity	500 Milliliters
Power Source	Battery Powered
Are Batteries Included	Yes
Control Method	App
Compatible Devices	Amazon Echo, Google Home
Form Factor	Robotic
Item Weight	6.64 pounds
Manufacturer	OKP
Item model number	K2
Batteries	1 AAA batteries required. (included)
Assembly required	No
Number of pieces	8

8. WARRANTY & SUPPORT

The OKP Life K2 Robot Vacuum Cleaner comes with a 1-year warranty from the date of purchase. For detailed warranty information, terms, and conditions, please refer to the full user manual.

For any technical support, troubleshooting assistance beyond what is covered in this manual, or warranty claims, please contact OKP customer service. You can find contact information in the full user manual or on the official OKP website.
