3. SETUP

These toothbrushes are designed as replacements for the hum kids smart manual toothbrush system. To set up your new replacement toothbrush:

1. Ensure you have the hum kids connector boot (the smart base that connects to the app).
2. Carefully remove the old toothbrush head from the connector boot by pulling it straight off.
3. Align the new replacement toothbrush with the connector boot.

4. Gently push the new toothbrush onto the connector boot until you hear a "click," indicating it is securely attached.
5. For optimal smart features, ensure the hum kids app is installed on a compatible device and the connector boot is paired.

4. OPERATING INSTRUCTIONS

Using your Colgate hum Kids Smart Manual Replacement Toothbrush is straightforward:

1. **Apply Toothpaste:** Place a pea-sized amount of fluoride toothpaste on the bristles.
2. **Position the Brush:** Hold the toothbrush at a 45-degree angle to the gums.
3. **Brush Gently:** Use short, gentle strokes, moving the brush back and forth across all surfaces of the teeth. Ensure to brush the outer, inner, and chewing surfaces of all teeth.

4. **Brush Tongue:** Use the tongue cleaner on the back of the brush head to gently brush the tongue from back to front to remove bacteria and freshen breath.
5. **Rinse:** After brushing, rinse your mouth thoroughly with water.
6. **Use with App (Optional):** If connected to the hum kids connector boot and app, follow the app's guidance for real-time feedback and a guided brushing experience. The app helps ensure all areas of the mouth are cleaned effectively.

Dentists recommend brushing for two minutes, twice a day.

5. MAINTENANCE

Proper maintenance ensures the longevity and hygiene of your toothbrush:

- **Rinse After Use:** After each use, thoroughly rinse the toothbrush head under running water to remove any toothpaste residue and debris.
- **Store Upright:** Utilize the suction cup base to store the toothbrush upright in a clean, dry area, allowing it to air dry. This helps prevent bacterial growth.
- **Replace Regularly:** Dentists and hygienists recommend replacing your toothbrush every 3-4 months, or sooner if the bristles become frayed or after an illness.

6. TROUBLESHOOTING

If you encounter issues with your Colgate hum Kids Smart Manual Replacement Toothbrush, consider the following:

Toothbrush not fitting connector boot:

- Ensure you are using a genuine hum kids replacement toothbrush.
- Verify that the connector boot is clean and free of debris that might obstruct the connection.
- Apply firm, even pressure when pushing the toothbrush onto the boot until you hear a click.

App not detecting brushing (if using smart features):

- This replacement toothbrush is a manual brush head. Ensure your hum kids connector boot is properly charged and connected to the app via Bluetooth.
- Check the hum kids app for any connection issues or updates.
- Ensure the child's face is visible to the device's camera if the app uses facial recognition for tracking.
