- Example commands: "Hey Google, turn on the heater," "Alexa, set heater temperature to 22 degrees."

## 6. MAINTENANCE

Regular maintenance ensures optimal performance and longevity of your heater.

### 6.1 Cleaning

1. Always unplug the heater and allow it to cool completely before cleaning.
2. Wipe the exterior surfaces with a soft, damp cloth. Do not use abrasive cleaners or solvents.

- 3. Ensure no water enters the internal components.
- 4. Periodically vacuum the air intake and outlet grilles to remove dust and debris.

6.2 Storage

If storing the heater for an extended period, clean it thoroughly and store it in a cool, dry place, preferably in its original packaging.

7. TROUBLESHOOTING

If you encounter issues with your FlinQ Smart Electric Heater, refer to the following common problems and solutions:

| Problem                        | Possible Cause  | Solution  |
|--------------------------------|---|---|
| Heater does not turn on.       | No power, tip-over switch activated, overheat protection activated. | Check power connection. Ensure heater is upright. Unplug and allow to cool for 30 minutes, then plug back in.       |
| No heat output.                | Temperature setting too low, heating mode not active.               | Increase desired temperature. Ensure heater is in an active heating mode.   |
| Wi-Fi connection fails.        | Incorrect Wi-Fi password, 5GHz network, router too far.             | Verify Wi-Fi password. Ensure connection to a 2.4GHz network. Move heater closer to router or use a Wi-Fi extender. |
| Unusual odor during first use. | Normal burning off of manufacturing residues.                       | This is normal for the first few uses and will dissipate. Ensure good ventilation.                                  |

If the problem persists after trying these solutions, please contact customer support.
