PerfectAire 2PFDP50

Perfect Aire Flat Panel Dehumidifier User Manual

Model: 2PFDP50

IMPORTANT SAFETY INSTRUCTIONS

Please read all instructions carefully before operating the dehumidifier. Keep this manual for future reference.

- Always place the dehumidifier on a level, stable surface to prevent water spillage.
- Ensure the power cord is not damaged and is properly grounded. Do not use extension cords.
- Do not operate the unit in areas where flammable gases or liquids are present.
- Keep a minimum of 8 inches (20 cm) clearance around the unit for proper airflow.
- Unplug the unit before cleaning, moving, or performing any maintenance.
- Do not block the air inlet or outlet.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

PRODUCT OVERVIEW

Components

Image 1: Front view of the Perfect Aire 2PFDP50 Flat Panel Dehumidifier, showcasing its sleek white design and water level indicator.

Image 2: Side view of the Perfect Aire 2PFDP50 Flat Panel Dehumidifier, illustrating its dimensions: 11 inches deep, 15.5 inches wide, and 24.25 inches high.

The Perfect Aire 2PFDP50 Flat Panel Dehumidifier is designed to efficiently remove excess moisture from your home. Key components include:

- **Control Panel:** Located on the top, for setting humidity levels and operating modes.
- **Air Inlet/Outlet:** For drawing in and expelling air.
- **Removable Water Bucket:** Collects condensed water. Features a water level indicator.
- **Drainage Port:** For continuous drainage option.
- **Air Filter:** Located behind the inlet grille, for trapping dust particles.
- **Casters:** For easy portability.

Features

- 50 Pint Capacity (per day)
- Covers up to 4500 Square Feet

- Automatic Operation Mode
- Portable Design with Casters
- Continuous Drainage Option
- Adjustable Humidistat
- Auto-Defrost Function

SETUP GUIDE

Unpacking

1. Carefully remove the dehumidifier from its packaging.
2. Remove all packing materials, including any tape or protective films.
3. Inspect the unit for any shipping damage. If damaged, do not operate and contact customer support.

Placement

1. Place the dehumidifier on a firm, level surface that is strong enough to support the unit with a full water bucket.
2. Ensure there is at least 8 inches (20 cm) of space on all sides of the unit for proper air circulation.
3. Avoid placing the unit near heat sources, such as radiators or ovens, or in direct sunlight.
4. For optimal performance, operate the dehumidifier in an enclosed area. Close all doors and windows to the room.

Initial Operation

1. Ensure the water bucket is correctly seated in the unit.
2. Plug the power cord into a grounded electrical outlet. The unit will beep once.
3. Press the **POWER** button to turn on the unit. The default humidity setting is usually 50% RH (Relative Humidity).
4. Allow the unit to run for a few hours to assess its performance in your environment.

OPERATING INSTRUCTIONS

Control Panel

The control panel is located on the top of the unit and features several buttons and an LED display.

- **POWER Button:** Turns the unit ON or OFF.
- **MODE Button:** Cycles through different operating modes (e.g., Auto, Continuous).
- **FAN Speed Button:** Adjusts the fan speed (High, Low).
- **TIMER Button:** Sets the auto-on or auto-off timer.
- **UP/DOWN Arrows:** Adjusts the desired humidity level or timer settings.
- **DISPLAY:** Shows current humidity, set humidity, or timer settings.

Operating Modes

- **Auto Mode:** The unit automatically adjusts its operation based on the ambient humidity to maintain the set humidity level.
- **Continuous Mode:** The unit runs continuously regardless of the humidity level. Ideal for very damp conditions or for drying clothes.

- **Manual Set Mode:** Allows you to manually set a desired humidity level using the UP/DOWN arrows. The unit will cycle on and off to maintain this level.

To set the desired humidity level, press the UP or DOWN arrow buttons. The humidity can be set between 35% RH and 85% RH in 5% increments. Once the desired humidity is set, the display will show the current room humidity after a few seconds.

MAINTENANCE

Regular maintenance ensures optimal performance and extends the lifespan of your dehumidifier.

Cleaning the Air Filter

The air filter should be cleaned every two weeks or more frequently depending on usage and air quality.

1. Unplug the dehumidifier from the power outlet.
2. Remove the air filter from the back or side of the unit (refer to diagram in full manual if available).
3. Wash the filter with warm, soapy water. Rinse thoroughly.
4. Allow the filter to air dry completely before reinserting it. Do not use a dishwasher or hot water.
5. Reinsert the dry filter into the unit.

Emptying the Water Bucket

When the water bucket is full, the unit will automatically shut off and an indicator light will illuminate. Empty the bucket as follows:

1. Gently pull out the water bucket from the front of the unit.
2. Carefully carry the bucket to a sink or drain.
3. Pour out the collected water.
4. Replace the empty bucket firmly back into the dehumidifier. The unit will resume operation automatically.

Continuous Drainage

For continuous operation without emptying the bucket, you can connect a garden hose (not included) to the drainage port.

1. Unplug the unit.
2. Locate the drainage port on the back or side of the unit.
3. Remove the plastic cap (if present).
4. Thread a standard garden hose onto the drainage port. Ensure it is securely tightened to prevent leaks.
5. Route the hose downwards to a floor drain or suitable receptacle, ensuring there are no kinks or sharp bends that could impede water flow.
6. Plug the unit back in. The water will now drain continuously.

Storage

If the unit will not be used for an extended period:

1. Unplug the unit and empty the water bucket.
2. Clean the air filter.
3. Allow the unit to dry for 24 hours before storing to prevent mold or mildew.
4. Store the unit upright in a cool, dry place, away from direct sunlight and extreme temperatures.

TROUBLESHOOTING

Before contacting customer support, please refer to the following table for common issues and solutions.

Problem	Possible Cause	Solution
Dehumidifier does not turn on.	No power; Power cord not plugged in; Water bucket full or not properly seated.	Ensure unit is plugged into a live outlet; Check circuit breaker; Empty and re-seat water bucket.
Unit runs but does not dehumidify.	Air filter clogged; Room temperature too low; Humidity setting too high; Unit size too small for area.	Clean air filter; Ensure room temperature is above 41°F (5°C); Lower humidity setting; Consider a larger capacity unit for the space.
Unit is noisy.	Unit not on a level surface; Air filter clogged; Fan obstruction.	Place unit on a level surface; Clean air filter; Check for any obstructions in the fan area.
Water leaks from the unit.	Water bucket not properly seated; Continuous drain hose kinked or disconnected.	Re-seat water bucket; Check continuous drain hose for kinks or proper connection.
