Setup and Installation

The Eridanus Vitreous Ceramic Bathroom Sink can be installed as a vessel on a countertop or mounted directly to a wall. Choose the method that best suits your bathroom design and functional needs.

Countertop Installation

1. Ensure your countertop is level and structurally sound to support the sink's weight (approximately 70 lbs).
2. Cut openings of corresponding size on the countertop for the drain and faucet, if not already present. Refer to the dimensions diagram for precise measurements.
3. Apply a bead of silicone sealant around the perimeter of the drain opening on the countertop.
4. Carefully place the sink onto the countertop, aligning the drain and faucet holes.
5. Secure the sink to the countertop using appropriate adhesive or clips (not included), following the adhesive manufacturer's instructions.
6. Install the faucet and drain assembly according to their respective manufacturer's instructions.

Wall-Mounted Installation

This installation method allows for adjustable height, providing increased accessibility and freeing up floor space.

1. Determine the desired height for your sink. Mark the wall accurately for the mounting points, ensuring the marks are level.
2. Drill pilot holes at the marked locations. Ensure the holes are appropriate for the included mounting screws and wall anchors.
3. Insert the wall anchors into the drilled holes.
4. Attach the mounting screws into the anchors, leaving enough thread exposed to hang the sink.
5. Carefully lift the sink and align its mounting holes with the exposed screws. Slide the sink onto the screws.
6. Tighten the nuts and washers onto the mounting screws from underneath the sink to secure it firmly to the wall. Do not overtighten.
7. Install the faucet and drain assembly according to their respective manufacturer's instructions.

Maintenance and Cleaning

Proper care will help maintain the glossy finish and extend the life of your Eridanus sink.

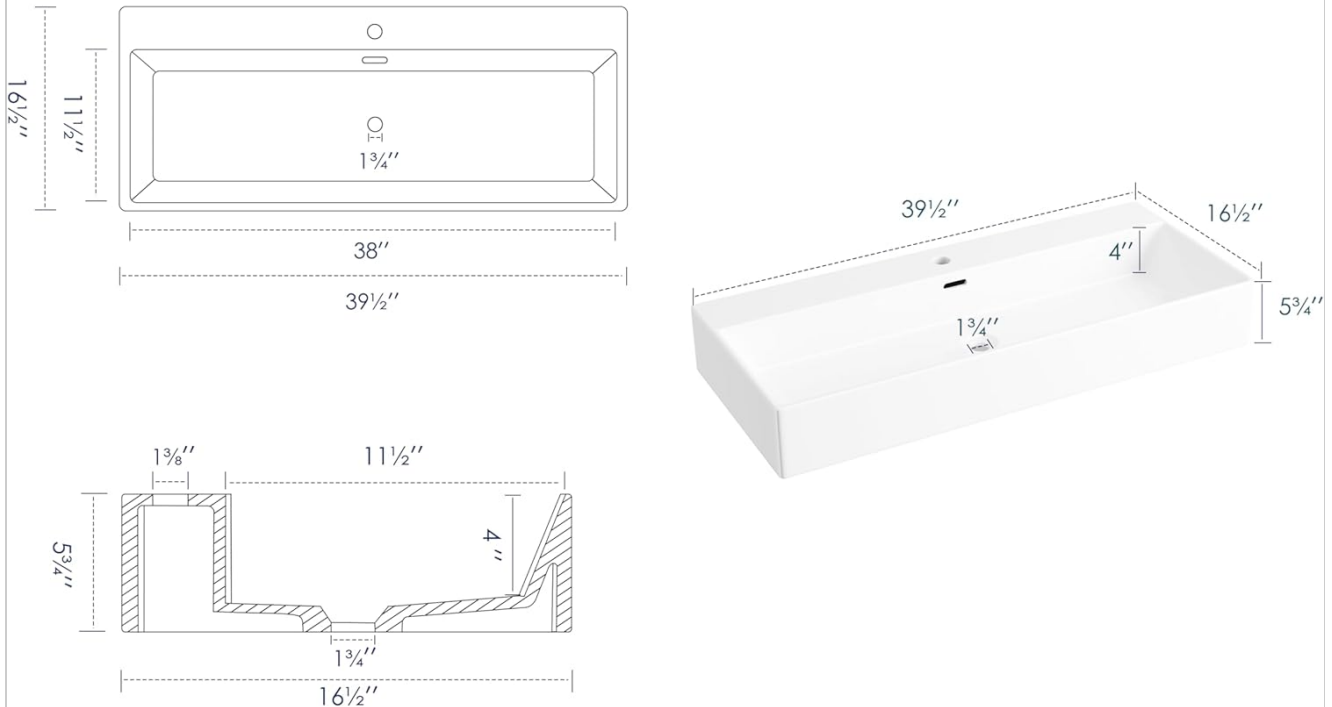

- **Regular Cleaning:** Wipe the sink with a damp cloth and mild soap or non-abrasive cleaner.
- **Drying:** After cleaning, wipe with a dry cloth to prevent water spots and maintain shine.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, scouring pads, or strong chemical solutions, as these can damage the ceramic surface.
- **Stain Removal:** For stubborn stains, use a ceramic-safe cleaner and follow its instructions.
