

Labelife TZe-135

Labelife TZe-135 Compatible Laminated Label Tape Instruction Manual

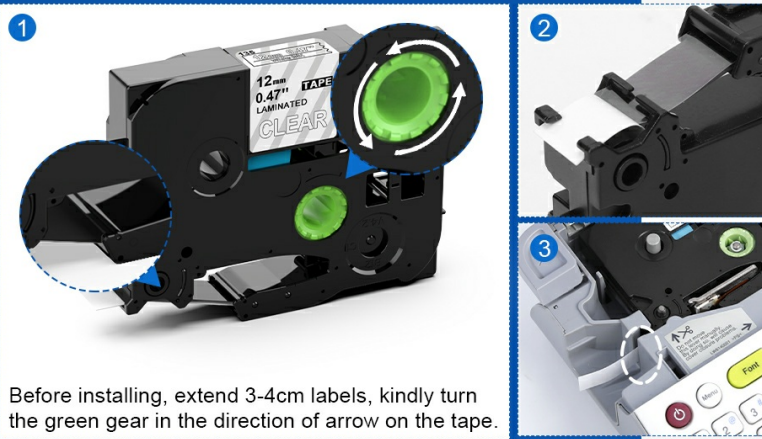

For Brother P-Touch Label Makers (White on Clear, 12mm)

1. PRODUCT OVERVIEW

The Labelife TZe-135 compatible laminated label tape is designed for use with various Brother P-Touch label makers. This tape features white text on a clear background, providing a professional and versatile labeling solution. Each cartridge contains 12mm (0.47 inch) wide and 8 meters (26.2 feet) long tape.

Key features include strong adhesion, a split backing for easy peeling, and resistance to water, abrasion, temperature, and fading, making it suitable for a wide range of indoor and outdoor applications.

Kindly Note Before Using

1 Before installing, extend 3-4cm labels, kindly turn the green gear in the direction of arrow on the tape.

2 Make sure the end of tape is through both tape guides correctly.

3 Extend some end of tape to the outlet of label maker when installing.

3. INSTALLATION AND SETUP

Follow these steps to properly install the label tape cartridge into your Brother P-Touch label maker:

1. Open the tape compartment cover of your label maker.
2. Before inserting, ensure the end of the tape passes through the two fixed buckles on the cartridge.
3. Turn the green gear on the tape cartridge in the direction of the arrow until the ribbon is straightened and taut. This helps prevent tape jams.
4. Insert the tape cartridge firmly into the label maker's compartment. Ensure it clicks into place.
5. Gently pull out a small length of tape (approximately 3-4 cm) from the tape outlet. This extended portion should exceed the paper outlet of the label maker.
6. Close the tape compartment cover securely.

For a visual guide, please refer to the installation video below.

4. OPERATING INSTRUCTIONS

Once the tape cartridge is installed, you can begin printing labels. The Labelife TZe-135 tape is designed for clear printing without jamming.

4.1 Printing Labels

Refer to your specific Brother P-Touch label maker's manual for detailed instructions on creating and printing labels. Ensure your label maker settings are appropriate for 12mm tape width.

4.2 Peeling Labels

The Labelife TZe-135 tape features a split backing for easy peeling. To peel a label:

1. Gently bend the label along its length to reveal the split in the backing.
2. Peel off one half of the backing, then the other.
3. Apply the label to your desired surface.

The strong adhesive ensures the label stays in place, and it can be removed without leaving sticky residue.

5. MAINTENANCE AND DURABILITY

Labelife TZe-135 laminated label tape is engineered for durability and longevity in various conditions:

- **Water Resistant:** Labels maintain integrity even when exposed to water.
- **Abrasion Resistant:** Designed to withstand rubbing and scratching.
- **Temperature Resistant:** Performs reliably across a range of temperatures.
- **Fade Resistant:** Text remains clear and legible over time, even with sun exposure.

To clean labeled surfaces, you may wipe them with a damp cloth. The labels are designed to resist common cleaning agents and maintain their appearance.

6. TROUBLESHOOTING

6.1 Tape Jams

If the tape jams during printing, ensure the tape cartridge was installed correctly, with the ribbon straightened by turning the green gear before insertion. If a jam occurs, carefully open the label maker cover, remove the cartridge, and inspect for any tangled tape. Re-insert the cartridge following the installation steps precisely.

6.2 Poor Print Quality

If print quality is poor (faint, incomplete, or smudged text), check the following:

- Ensure the tape cartridge is fully seated in the label maker.
- Verify that the label maker's print head is clean. Refer to your label maker's manual for cleaning instructions.
- Confirm that the label maker's batteries are not low, as this can affect print quality.

7. SPECIFICATIONS

Feature	Detail
Model Number	TZe-135
Color	White print on Clear background
Size (Width)	12mm (0.47 inch)
Length	8 meters (26.2 feet)
Material	Plastic
Finish Type	Laminated
Number of Items	5-Pack
Durability Features	Water Resistant, Abrasion Resistant, Temperature Resistant, Fade Resistant
