Acxico 50mm Shell Buttons

Acxico Extra Large Iridescent Mother of Pearl Shell Coat Buttons

Model: 50mm Shell Buttons

Product Overview

The Acxico Extra Large Iridescent Mother of Pearl Shell Coat Buttons are crafted from natural shell, offering a unique and beautiful iridescent finish. Each button is distinct due to the natural variations in the shell material. These buttons are designed for various applications, including clothing, bags, wallets, handbags, and general craft projects.

Image: A collection of five large, round mother of pearl buttons, each displaying unique natural patterns and an iridescent sheen. These buttons are approximately 50mm in diameter and feature two holes for attachment.

Usage Guidelines

These shell buttons are versatile and can be incorporated into a wide range of sewing and crafting projects. Due to their natural origin, each button possesses unique characteristics in terms of thickness and concaveness.

Attachment

- **Sewing:** Use a strong thread suitable for button attachment. Pass the needle through the two pre-drilled holes to secure the button to fabric. Ensure the thread is pulled taut to prevent loosening.
- **Crafting:** For non-fabric applications, suitable adhesives can be used. Test the adhesive on a small, inconspicuous area first to ensure compatibility and prevent damage to the shell.

Care and Storage

To maintain the beauty and integrity of your shell buttons, follow these care instructions:

- **Cleaning:** Wipe gently with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners, as these can damage the natural shell material and its iridescent finish.
- **Storage:** Store buttons in a dry place away from direct sunlight and extreme temperatures. Prolonged exposure to moisture or heat can affect the shell's structure and appearance.
- **Handling:** While durable, shell is a natural material and can be brittle if subjected to strong impact or excessive force. Handle with care during attachment and use.

Troubleshooting

While these buttons are crafted for durability, natural materials can sometimes present unique characteristics or issues.

- **Variations in Appearance:** As a natural product, slight differences in color, pattern, thickness, and concaveness between individual buttons are normal and expected. This is part of their unique charm and not a defect.
- **Breakage:** If a button breaks during handling or use, it may be due to excessive force or an inherent natural weakness in that specific shell piece. While rare, this can occur with natural materials.
