4. **Refilling (if needed):** If steam production decreases or stops, the water tank may be empty. **Unplug the unit and allow it to cool completely (at least 5-10 minutes) before attempting to refill.** Slowly unscrew the safety cap to release any residual pressure, then refill as per step 2 in Setup Instructions.
5. **Finishing:** When cleaning is complete, release any remaining steam pressure, unplug the unit, and allow it to cool down before storing.

5. MAINTENANCE AND CLEANING

Regular maintenance ensures optimal performance and extends the life of your steam cleaner.

- **Empty Water Tank:** After each use, once the unit is cool, empty any remaining water from the tank.
