## Lalasan BSMC-801

# Lalasan Portable Hair Dryer Instruction Manual

Model: BSMC-801

## INTRODUCTION

This manual provides essential instructions for the safe and effective operation, maintenance, and care of your Lalasani Portable Hair Dryer, Model BSMC-801. Please read this manual thoroughly before first use and keep it for future reference.

## SAFETY INFORMATION

Your Lalasani Portable Hair Dryer is equipped with an ALCI (Appliance Leakage Current Interrupter) protective plug for enhanced user safety. Always ensure the plug is functioning correctly before use.

- Do not use near water.
- Unplug when not in use.
- Do not block air inlets or outlets.
- Keep away from children.
- If the hair dryer overheats, it will automatically shut off. Allow it to cool down before resuming use.

## PRODUCT OVERVIEW

The Lalasani Portable Hair Dryer (Model BSMC-801) is designed for efficient and gentle hair drying. It features an 800W motor, constant temperature control, and dual temperature settings. Its compact and lightweight design makes it suitable for both home and travel.

### Key Features:

- **Powerful & Efficient:** 800W professional-grade hairdryer with high-speed motor (32,000 RPM) and 20m/s airflow for quick drying.
- **Hair Protection Technology:** Constant temperature control to protect hair scales, reduce static, and prevent frizz.
- **Dual Temperature Settings:** Choose between hot air for quick drying and room temperature for

conditioning.

- **Safety First:** Equipped with ALCI safety plug and overheat protection system.
- **Travel-Friendly:** Lightweight (370g) with included portable storage bag and concentrator nozzle.

and brighter finish.

## SETUP

---

1. Unpack the hair dryer and all accessories.
2. Ensure the power cord and ALCI safety plug are free from damage.
3. Attach the concentrator nozzle if desired. Align the nozzle with the magnetic attachment point on the dryer head and it will snap into place.
4. Plug the ALCI safety plug into a standard electrical outlet. Press the "RESET" button on the plug if necessary to ensure power is supplied.

## OPERATING INSTRUCTIONS

---

To operate your Lalasani Portable Hair Dryer:

1. **Power On:** Slide the power switch to either the "LOW" or "HIGH" setting.
2. **Select Temperature:** The dryer features constant heat control. The "LOW" setting provides room temperature air, suitable for conditioning or gentle drying. The "HIGH" setting provides hot air for quick drying.
3. **Drying Hair:** Hold the hair dryer approximately 6-8 inches away from your hair. Move the dryer continuously to prevent excessive heat concentration on one area.
4. **Using the Concentrator Nozzle:** For precise styling and smoothing, attach the concentrator nozzle. Direct the airflow down the hair shaft from roots to ends.
5. **Power Off:** After use, slide the power switch to the "OFF" position and unplug the dryer from the electrical outlet.

## MAINTENANCE

---

Regular maintenance ensures optimal performance and longevity of your hair dryer.

- **Cleaning the Air Inlet Filter:** Periodically check and clean the air inlet filter at the back of the dryer to prevent dust and hair buildup, which can reduce airflow and cause overheating. Ensure the dryer is unplugged before cleaning.
- **Storage:** Store the hair dryer in a cool, dry place. Use the provided portable storage bag for protection, especially during travel. Do not wrap the power cord tightly around the dryer, as this can damage the cord.
- **Cleaning the Exterior:** Wipe the exterior of the dryer with a soft, damp cloth. Do not use abrasive cleaners or solvents.

## TROUBLESHOOTING

---

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Dryer does not turn on.	No power supply; ALCI plug tripped.	Check if the plug is fully inserted. Press the "RESET" button on the ALCI plug. Check the circuit breaker.
Dryer stops during use.	Overheat protection activated.	Unplug the dryer and allow it to cool down for several minutes. Clean the air inlet filter.
Weak airflow.	Blocked air inlet filter.	Unplug the dryer and clean the air inlet filter.
