Spigen AFL02536

Spigen NeoFlex Screen Protector Instruction Manual

For Samsung Galaxy S21 Plus (2021)

INTRODUCTION

Thank you for choosing the Spigen NeoFlex Screen Protector for your Samsung Galaxy S21 Plus. This manual provides detailed instructions for proper installation and care to ensure optimal performance and protection for your device's screen. The NeoFlex protector is designed for edge-to-edge coverage and is compatible with all Spigen cases.

COMPATIBILITY

This Spigen NeoFlex Screen Protector is specifically designed for the **Samsung Galaxy S21 Plus (6.7-inch display)**. It is not compatible with the Samsung Galaxy S21 Ultra (6.8-inch) or the standard Samsung Galaxy S21 (6.2-inch).

Compatibility.

Please check the model.

6.8  inch

NOT compatible with
Galaxy S21 Ultra

6.7  inch

Only compatible with
Galaxy S21+

6.2  inch

NOT compatible with
Galaxy S21

PACKAGE CONTENTS

Your Spigen NeoFlex Screen Protector package includes:

- 2 x Spigen NeoFlex Screen Protectors
- Installation Kit (typically includes a spray bottle, squeegee, microfiber cloth, and dust removal stickers)
- Instruction Manual (this document)

SETUP AND INSTALLATION

The NeoFlex screen protector uses a wet installation method for a bubble-free application and zero lifting. For best results, perform the installation in a dust-free environment.

Preparation

1. **Clean Your Device:** Thoroughly clean your Samsung Galaxy S21 Plus screen using the provided microfiber cloth to remove all dust, smudges, and fingerprints. Ensure the screen is completely dry.

2. **Remove Pre-installed Film:** Before applying the NeoFlex protector, ensure any pre-installed protective films on the NeoFlex itself are removed.

Wet Installation Steps

3. **Spray the Protector:** Lightly spray the adhesive side of the NeoFlex screen protector with the provided solution. Ensure the entire surface is evenly misted.

Flexible Film
**Easy and quick attached
with wet installation.**

Image: Demonstrating the wet application process, spraying the flexible film.

4. **Align and Apply:** Carefully align the wet screen protector with your phone's screen, ensuring the cutouts for the camera and sensors match perfectly. Gently lay it down onto the screen.
5. **Squeegee Out Bubbles:** Using the provided squeegee, gently push out any air bubbles and excess liquid from the center towards the edges of the screen. Apply light, even pressure.
6. **Allow to Dry:** Allow the screen protector to dry completely. This may take several hours. Avoid touching or using your phone excessively during this period to allow the adhesive to set properly. Small bubbles or haziness may disappear over 12-24 hours as the solution evaporates.

Tip: For a visual guide, Spigen recommends watching their official tutorial video. While no video is provided in this manual, searching for "Spigen NeoFlex S21 Plus installation video" on platforms like YouTube can provide helpful visual instructions.

PRODUCT FEATURES

- **Daily Protection:** Protects the screen from daily scratches and minor abrasions.

Touch Response
Undisturbed and
quick touch response.

MAINTENANCE

To maintain the clarity and effectiveness of your Spigen NeoFlex Screen Protector:

- Clean the screen regularly with a soft, lint-free cloth.
- For stubborn smudges, lightly dampen the cloth with water or a screen cleaner specifically designed for electronics.
- Avoid using harsh chemicals, abrasive materials, or excessive force when cleaning, as this may damage the protector.

TROUBLESHOOTING

Issue	Solution
Bubbles after installation	Small bubbles are common immediately after wet installation. Most will disappear naturally within 12-24 hours as the solution dries. For larger bubbles, gently push them towards the nearest edge with the squeegee.

Issue	Solution
Edges lifting	Ensure sufficient drying time after installation. If edges lift, gently re-spray the affected area, press down with the squeegee, and allow more time to dry. Ensure the protector is correctly aligned and not overlapping with a phone case.
Dust under the protector	This usually occurs during installation in a dusty environment. If dust is present, it's best to remove the protector, clean the screen thoroughly again, and reapply a new protector from the pack.
Reduced touch sensitivity	Ensure the protector is fully adhered and dry. If the issue persists, check your phone's settings for "Touch sensitivity" or "Screen protector mode" and enable it if available.

SPECIFICATIONS

Feature	Detail
Brand	Spigen
Model Number	AFL02536
Compatible Devices	Samsung Galaxy S21+ 5G (6.7 Inches)
Material	Plastic (Flexible Film)
Item Hardness	9H (<i>Note: This typically refers to pencil hardness, indicating scratch resistance for flexible films.</i>)
Special Features	Scratch Resistant, Case Friendly, Wet Installation, Bubble-free application, Zero lifting, Clear screen, No glares or rainbow effects
Unit Count	2.0 Count (2 Protectors)
