Amorho B08PFLZ1PT

Amorho LED Bathroom Mirror User Manual

Model: B08PFLZ1PT

PRODUCT OVERVIEW

The Amorho LED Bathroom Mirror is designed to enhance your bathroom experience with its advanced features and modern aesthetic. This mirror provides both front and backlight illumination, offering ample brightness for various tasks such as makeup application or shaving. It incorporates stepless dimming, adjustable color temperatures, and an anti-fog function for clear visibility even in humid conditions. Constructed with shatter-proof tempered glass, it ensures safety and durability.

SAFETY INFORMATION

Please read all safety instructions carefully before installation and use. Failure to follow these instructions may result in electric shock, fire, or serious injury.

- This mirror is made of shatterproof, tempered glass for added safety. While designed to be robust, handle with care.
- During installation, ensure that at least two people are handling the mirror due to its heavy weight.
- Always follow the installation instructions carefully to avoid any potential hazards.
- It is recommended that electrical wiring be performed by a qualified electrician.
- Do not attempt to modify or repair the mirror yourself. Contact qualified service personnel for any repairs.
- Keep the mirror away from direct water spray or excessive moisture beyond normal bathroom humidity.

SAFE MIRROR with TEMPERED GLASS

OUR MIRROR

4mm Tempered Glass : Sturdy and Shatter-Proof
5 Times Stronger than ordinary glass mirror.
It will not splash into pieces even it is broken.

VS

Ordinary Glass: Frail Glass
Broken easily and splash throughout

Image: A visual comparison highlighting the shatterproof nature of the Amorho mirror's 4mm tempered glass, which is designed not to splash into sharp pieces if broken, unlike ordinary glass.

FEATURES

Double Lights & Super Bright

The Amorho LED Bathroom Mirror features two built-in LED strip lights, providing both front and backlit illumination. This dual lighting system ensures a super bright output, sufficient for detailed tasks like makeup application or shaving, illuminating your space effectively.

Colors Change & Brightness Dim (Stepless Dimmable)

Customize your lighting experience with ease. You can change the color temperature to 3000K (warm white), 4000K (neutral white), or 6000K (cool white) to suit your preference or task. The brightness can also be steplessly dimmed from 10% to 100% by a long press on the touch button. The mirror includes a memory function that records your last light settings, so it will turn on with your preferred configuration.

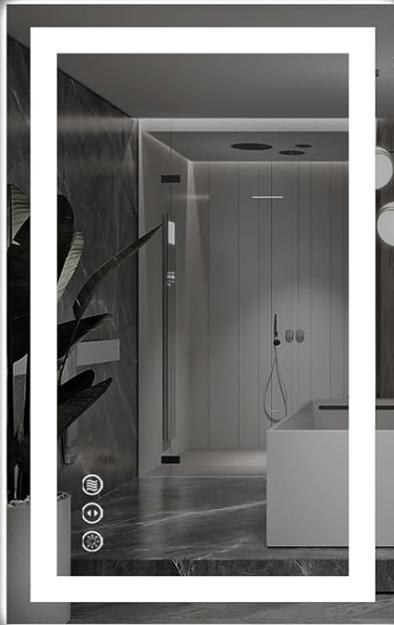

Stepless Dimmable (From 10% to 100%)

Anti-Fog Function

The integrated defogger ensures a clear reflection at all times. After a few minutes of activation, the heater within the mirror disperses fog from the center outwards, maintaining clarity even in a steamy bathroom. The anti-fog function turns on with the power and automatically turns off after 1 hour to conserve energy.

Smart Anti-fog Addition

The defogging function turns on with the switch and turns off automatically after one hour of operation

Long press this button to turn off all the **blue lights**

Shatterproof & Corrosion Proof

Our mirrors are crafted from stronger tempered glass, making them highly resistant to breakage. In the unlikely event of breakage, the glass will not shatter into sharp pieces, significantly enhancing safety. Additionally, an epoxy coat provides corrosion proofing, ensuring the mirror's longevity and pristine appearance in humid bathroom environments.

SETUP & INSTALLATION

The Amorho LED Bathroom Mirror is designed for easy installation, allowing for both horizontal and vertical mounting to fit your space. Please ensure you have all necessary tools and follow these steps carefully.

Tools Required (Not Included):

- Drill

- Measuring Tape
- Pencil
- Level
- Screwdriver

Installation Steps:

1. **Prepare the Wall:** Choose your desired mounting location. Use a level and pencil to mark the positions for the mirror bracket screws. Ensure the marks are level and spaced correctly for your mirror's dimensions.
2. **Install the Bracket:** Drill pilot holes at the marked locations. Insert wall anchors if necessary (for drywall). Securely fix the mirror bracket to the wall using the provided screws.
3. **Power Connection:**
 - **Plug-in Option:** If using the plug for power, simply plug the mirror's cord into a suitable electrical outlet.
 - **Hardwire Option:** For a cleaner, integrated look, you can connect the mirror directly to a wall switch by hardwiring. *It is strongly recommended that this step be performed by a professional electrician to ensure safety and compliance with local electrical codes.*

Image: Two Amorho LED Bathroom Mirrors demonstrating their sleek installation above bathroom sinks, highlighting their modern appearance.

4. **Hang the Mirror:** Carefully lift the mirror and align the hanging slots on the back of the mirror with the installed wall bracket. Gently lower the mirror onto the bracket until it is securely seated.
5. **Final Check:** Ensure the mirror is stable and properly aligned. Test all functions (lights, dimming, color change, anti-fog) to confirm correct operation.

OPERATING INSTRUCTIONS

The Amorho LED Bathroom Mirror is controlled via intuitive touch buttons located on the mirror surface.

Power On/Off & Color Temperature Adjustment

Locate the power touch button (usually indicated by a power symbol). A short press will turn the mirror lights on or off. To change the color temperature (3000K, 4000K, 6000K), press and hold this button. The mirror will cycle through the color options; release when your desired temperature is reached. The memory function will recall your last setting upon next power-on.

Brightness Dimming

Locate the brightness touch button (often indicated by a sun or light bulb symbol). Press and hold this button to adjust the brightness level. The light will gradually dim or brighten; release the button when the desired brightness is achieved. This setting is also saved by the memory function.

Anti-Fog Activation

Locate the anti-fog touch button (usually indicated by a steam or fan symbol). A short press will activate the defogging function. The defogger will automatically turn off after 1 hour of operation. To turn off all blue indicator lights on the mirror (when in standby mode), you can hold the defogger button for 3 seconds.

Image: A visual guide demonstrating how to long-press the defogger button to turn off all blue indicator lights when the mirror is in standby mode.

MAINTENANCE

Proper maintenance will ensure the longevity and optimal performance of your Amorho LED Bathroom Mirror.

- **Cleaning the Mirror Surface:** Use a soft, lint-free cloth and a non-abrasive glass cleaner. Spray the cleaner onto the cloth, not directly onto the mirror, to avoid liquid seeping into the electrical components. Wipe gently to remove smudges and dirt.
- **Cleaning the Frame/Edges:** For the frameless edges, use a damp cloth with mild soap and water, then dry immediately with a clean, soft cloth. Avoid harsh chemicals or abrasive materials.
- **Electrical Components:** Ensure the mirror is turned off and unplugged (if applicable) before any cleaning near electrical components. Do not spray water directly onto the back of the mirror or any wiring.
- **Regular Inspection:** Periodically check the wiring and mounting hardware for any signs of wear or loosening. Address any issues promptly.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Mirror lights do not turn on.	No power supply; loose connection; faulty switch.	Check if the mirror is properly plugged in or hardwired. Ensure the wall switch (if applicable) is on. Verify electrical connections (consult an electrician if unsure).
Anti-fog function not working.	Defogger not activated; power issue.	Ensure the anti-fog touch button has been pressed. Check power supply to the mirror.
Lights are too dim or too bright.	Brightness setting needs adjustment.	Press and hold the brightness touch button to adjust to your desired level.
Color temperature is not changing.	Incorrect operation of color change button.	Press and hold the power touch button to cycle through color temperatures.
Blue indicator lights remain on.	Default setting; not turned off manually.	In standby mode, long press the defogger button for 3 seconds to turn them off.
