ULIFESTAR Heavy Duty Stainless Steel Corner Brackets (Model 0661SI) Instruction Manual

Model: 0661SI | Brand: Ulifestar

1. INTRODUCTION

This manual provides detailed instructions for the installation, usage, and maintenance of your ULIFESTAR Heavy Duty Stainless Steel Corner Brackets. These L-shaped brackets are designed to provide robust support and reinforcement for various furniture and structural applications.

2. PRODUCT OVERVIEW

2.1 Features

- **Premium Quality Stainless Steel:** Constructed from high-quality stainless steel, ensuring anti-rust properties and long-lasting durability. The surface is brushed for a refined finish.
- **Enhanced Strength Design:** Features a 90-degree right-angle design with a middle reinforcement dent, doubling the bearing capacity and increasing overall strength.
- **Secure Installation:** Each bracket includes 4 screw holes for stable and secure fastening. The countersunk head screw hole design ensures screw heads do not protrude, providing a flush finish.
- **Versatile Application:** Ideal for reinforcing various furniture items such as chairs, wooden tables, beds, desks, windows, bookshelves, and other wobbly structures.
- **Dimensions:** Each bracket measures 38 x 30mm (1.5 x 1.2 inches) with a thickness of 1.5mm (0.06 inches).

2.2 Specifications

Specification	Detail
Brand	Ulifestar
Model Number	0661SI
Material	Stainless Steel

Specification	Detail
Color	Silver
Shape	L-Shape (Arc)
Dimensions (L x W x H)	38 x 30 x 30 mm (1.5 x 1.18 x 1.18 inches)
Thickness	1.5 mm (0.06 inches)
Number of Holes	4 per bracket
Mounting Type	Corner Mount
Item Weight	7 ounces (for 8-pack)
Unit Count	8.0 Count

3. PACKAGE CONTENTS

The package includes the following items:

- 8 x ULIFESTAR Stainless Steel Corner Brackets (4 Holes, 38 x 30mm)
- Screws for installation (quantity sufficient for 8 brackets)

Image 1: Package contents showing eight corner brackets and accompanying screws.

4. SETUP AND INSTALLATION

Follow these steps to properly install your ULIFESTAR corner brackets:

1. **Identify Mounting Location:** Determine the exact position where the bracket needs to be installed to reinforce the corner or joint of your furniture.
2. **Mark Screw Holes:** Place the bracket in the desired position and use a pencil or marker to mark the locations for the four screw holes.
3. **Drill Pilot Holes (Recommended):** For wood applications, it is recommended to drill small pilot holes at the marked locations. This helps prevent wood splitting and ensures easier screw insertion. Ensure the drill bit size is appropriate for the screws provided.
4. **Secure the Bracket:** Align the bracket with the pilot holes (or marked spots) and insert the provided screws. Use a screwdriver to tighten the screws firmly until the bracket is securely fastened to the surface. Do not overtighten.
5. **Repeat for Additional Brackets:** If installing multiple brackets, repeat the process for each one, ensuring they are evenly spaced and provide adequate support.

- **Made Of Stainless Steel**
- **2mm Thickness**
- **Comes With Installation Screws**

5. USAGE

These corner brackets are designed for a variety of reinforcement and support tasks:

- **Furniture Repair:** Strengthen wobbly chairs, tables, beds, and other furniture pieces by adding brackets to their joints.
- **Shelf Support:** Provide additional support for shelves, ensuring they remain stable and secure.
- **Frame Construction:** Use in the construction of small frames or boxes to create strong 90-degree connections.
- **General Reinforcement:** Apply to any wooden or composite material structure requiring corner reinforcement.

6. MAINTENANCE

To ensure the longevity and performance of your stainless steel corner brackets:

- **Cleaning:** Wipe the brackets periodically with a soft, damp cloth to remove dust and dirt. For stubborn marks, a mild soap solution can be used, followed by rinsing and drying thoroughly.
- **Inspection:** Regularly check the screws for tightness. If any screws appear loose, tighten them to maintain stability.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, steel wool, or harsh chemicals, as these can scratch the surface or compromise the stainless steel finish.

7. TROUBLESHOOTING

If you encounter issues during or after installation, consider the following:

- **Bracket Feels Loose:** Ensure all screws are fully tightened. If the wood is stripped, consider using slightly longer or thicker screws, or repositioning the bracket slightly.
- **Difficulty Driving Screws:** Ensure pilot holes are drilled to the correct size. If not, the wood may be too dense, or the screws may be misaligned.
- **Surface Damage:** If the bracket is scratching the surface, ensure it is installed flush and that no burrs are present.

8. WARRANTY AND SUPPORT

For warranty information or technical support, please refer to the Ulifestar official website or contact their customer service directly. Keep your purchase receipt for any warranty claims.
