6. MAINTENANCE

6.1. Cleaning the Scanner

Regular cleaning helps maintain scan quality and prevents paper jams. Always turn off and unplug the scanner before cleaning.

- **Exterior:** Wipe the exterior with a soft, dry cloth. For stubborn marks, use a slightly damp cloth and then dry thoroughly.
- **Rollers and Glass:** Gently wipe the feed rollers and the glass scanning surface with a lint-free cloth dampened with a mild, non-abrasive cleaner specifically designed for electronics. Ensure no residue is left behind.
- **Dust:** Use compressed air to remove dust from hard-to-reach areas, being careful not to spray directly onto sensitive components.

6.2. Handling Paper Jams

If a paper jam occurs, the scanner will typically stop and display an error message. Follow these steps:

1. Turn off the scanner and unplug it.
2. Open the scanner covers to access the paper path.
3. Carefully remove any jammed paper, pulling it gently in the direction of the paper path. Avoid tearing the paper inside the scanner.
4. Close all covers, plug in, and turn on the scanner.

7. TROUBLESHOOTING

This section addresses common issues you might encounter with your ScanSnap iX1600. For more detailed troubleshooting, refer to the official User Guide PDF.
