- The system will boot into Windows 10 Pro. Follow any on-screen prompts to complete the initial setup, including language, region, and user account creation.

5. OPERATING INSTRUCTIONS

Once set up, your ThinkCentre M710q Tiny is ready for use:

- **Power On/Off:** Press the power button to turn the computer on. To shut down, click the Start button in Windows, then select Power > Shut down.
- **Windows 10 Pro:** Explore the Windows 10 Pro operating system. You can customize settings, install applications, and manage files.
- **Network Connectivity:** If using Wi-Fi, click the network icon in the taskbar to connect to your preferred wireless network. For wired connections, ensure the Ethernet cable is securely plugged in.
- **Software Installation:** Install any necessary software or applications required for your work or personal use.
- **USB Devices:** Connect USB storage devices, printers, or other peripherals to the available USB ports.

6. MAINTENANCE

Regular maintenance helps ensure the longevity and optimal performance of your mini PC:

- **Cleaning:** Keep the exterior of the unit clean with a soft, dry cloth. Ensure that the ventilation grilles are free from dust and obstructions to prevent overheating. Do not use liquid cleaners directly on the unit.
- **Software Updates:** Regularly check for and install Windows updates and driver updates to ensure system stability and security.

- **Data Backup:** Periodically back up your important files and data to an external drive or cloud storage to prevent data loss.
- **Antivirus Protection:** Ensure your system has up-to-date antivirus software to protect against malware and viruses.

7. TROUBLESHOOTING

If you encounter issues with your ThinkCentre M710q Tiny, try these common troubleshooting steps:

- **No Power:**
 - Verify that the AC power adapter is securely connected to both the PC and a working power outlet.
 - Check if the power outlet is functional by plugging in another device.
- **No Display:**
 - Ensure the monitor is powered on and the video cable (DisplayPort or VGA) is securely connected to both the PC and the monitor.
 - Try connecting the monitor to a different video port on the PC or using a different cable if available.
 - Test the monitor with another device to confirm it is working.
- **Slow Performance:**
 - Close unnecessary applications running in the background.
 - Check disk space and free up storage if it is nearly full.
 - Run a full system scan with your antivirus software.
- **Peripheral Not Working:**
 - Ensure the peripheral (keyboard, mouse, etc.) is properly connected to a USB port.
 - Try connecting the peripheral to a different USB port.
 - Restart the computer.
- **Contact Support:** If these steps do not resolve the issue, please contact the seller (TekRefurbs) for further assistance.
