TROUBLESHOOTING

This section provides general guidance for common issues you might encounter with your SonicWall TZ270W.

Common Issues and Solutions:

- **No Power/Device Not Turning On:**

- Verify the power adapter is securely connected to the device and a working power outlet.
- Check the power LED on the front panel. If it's off, try a different power outlet or adapter.
- **No Internet Connectivity:**
 - Ensure the WAN cable from your modem/ISP is securely connected to the correct WAN port (X1 or X2) on the TZ270W.
 - Check the status of the WAN port LEDs.
 - Verify your ISP connection is active by connecting a computer directly to the modem.
 - Review network settings in the Web UI, specifically WAN interface configuration (DHCP, Static IP, PPPoE).
- **Cannot Access Management Interface:**
 - Ensure your computer is connected to a LAN port of the TZ270W and is configured to obtain an IP address automatically (DHCP).
 - Verify you are using the correct default IP address for the management interface (e.g., 192.168.168.168).
 - Clear your browser's cache or try a different browser.
- **Slow Network Performance:**
 - Check the firewall logs for any high-volume traffic or security events that might be impacting performance.
 - Ensure your internet connection speed matches the device's capabilities.
 - Review QoS (Quality of Service) settings if configured.
