Lafocuse DIY 12888 Silent Wall Clock Movement Kit Instruction Manual

Model: ZH0054A

INTRODUCTION

Thank you for choosing the Lafocuse DIY 12888 Silent Wall Clock Movement Kit. This kit allows you to create your own personalized wall clock with large, silent-sweep hands. This manual provides detailed instructions for assembly, operation, and maintenance to ensure optimal performance and longevity of your clock.

PRODUCT COMPONENTS

The Lafocuse DIY 12888 Silent Wall Clock Movement Kit includes the following components:

- 1 x Silent Quartz Clock Movement (12888)
- 1 x Hour Hand (31.3 cm / 12.3 inches)
- 1 x Minute Hand (39 cm / 15.4 inches)
- 1 x Second Hand (optional, if included in your specific kit)
- Mounting hardware (washers, nuts, hanging hook)

SETUP & INSTALLATION

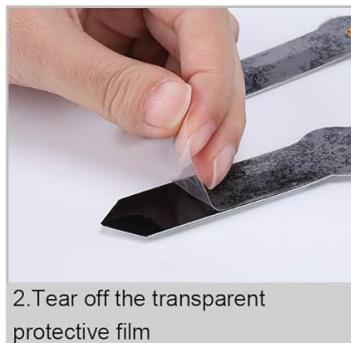

Follow these steps to assemble and install your DIY wall clock movement kit:

- 1. Prepare the Clock Movement:** Ensure the clock movement is ready for installation.
- 2. Remove Protective Film:** Carefully peel off the transparent protective film from both sides of the clock hands.
- 3. Unscrew Nut:** Unscrew the nut from the dial shaft of the clock movement.
- 4. Install Hour Hand:** Press the hour hand onto the shaft. Ensure it is firmly seated.
- 5. Install Minute Hand:** Press the minute hand onto the shaft. The minute hand has a rectangular hole to fit the shaft.
- 6. Install Second Hand (if applicable):** Press the second hand onto the small central post.
- 7. Tighten Nuts:** Securely tighten the nuts onto the shaft to hold the hands in place. Ensure the nut is screwed seamlessly.
- 8. Align Hands:** Verify that all clock hands are parallel to each other and do not touch or collide. Adjust gently if necessary.

Installation Steps

1. Ready to install the clock

2. Tear off the transparent protective film

3. Unscrew the nut on the dial

4. Install and fix the hour hand

5. Install the minute hand

6. The two clock hands should be parallel

7. Tighten the nuts

OPERATION

- 1. Insert Battery:** Insert one AA battery into the battery compartment of the clock movement. Ensure the positive (+) and negative (-) terminals are correctly aligned. **Do not use Alkaline batteries; too large a current will damage the movement.**
- 2. Set Time:** Adjust the time by rotating the knob on the back of the clock movement **DO NOT rotate the clock hands directly as it will damage the movement.**
- 3. Mount on Wall:** Hang the assembled clock on your desired wall using the hanging hook.

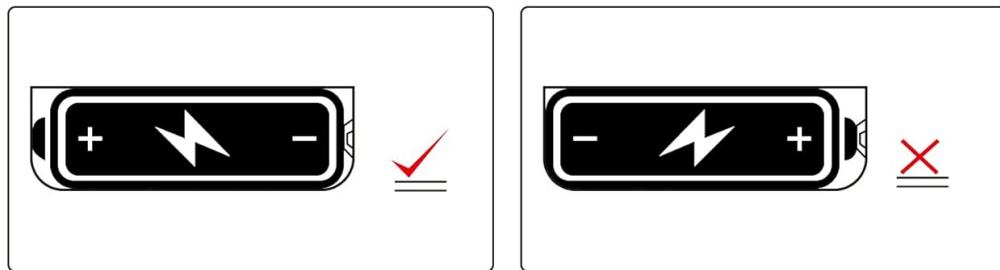

TROUBLESHOOTING

If your clock is not functioning correctly, please refer to the following troubleshooting steps:

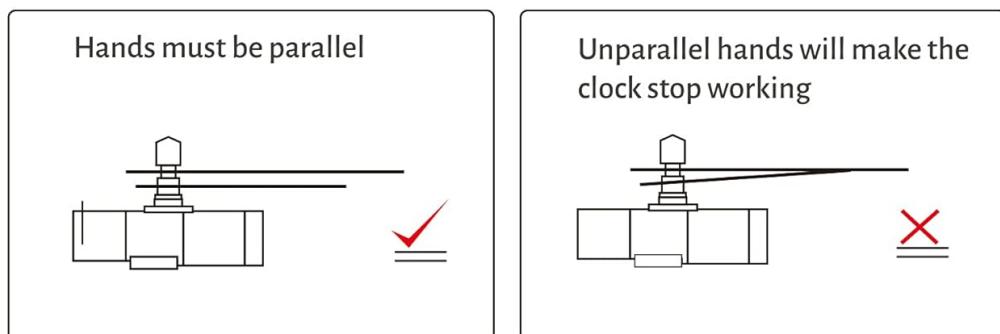

- 1. Check the Battery:**
 - Ensure the battery is inserted in the correct position (positive and negative terminals aligned).
 - Verify that the battery is not depleted. Replace with a fresh AA battery if necessary (non-alkaline recommended).
- 2. Check Clock Hands Alignment:**
 - Make sure the clock hands are parallel to each other and are not loose or stuck.
 - If hands are loose, gently remove them, straighten any bends, and re-install them ensuring they are parallel and do not collide.
- 3. Contact Support:** If the clock still does not work after performing the above checks, please contact Lafocuse customer support for assistance.

What should we do if the clock doesn't work?

1. Check the battery. Make sure the battery is in correct position and not run out.

2. Check the clock hands. Make sure they are parallel. If the hands are loose, bend or stuck with each other, take them out and make them straight, then re-install the hands.

3. If the clock still doesn't work, please contact with us.
