# **AIAIAI H03 High Comfort Headband Instruction Manual**

This manual provides detailed instructions for the setup, operation, and maintenance of your AIAIAI H03 High Comfort Headband.

## **1. INTRODUCTION**

The AIAIAI H03 High Comfort Headband is an individual modular component designed to enhance the comfort and fit of your AIAIAI TMA-2 Headphones. Featuring high-comfort PU leather padding and memory foam, it is engineered for extended listening sessions, providing superior comfort and durability. This headband is a key part of the modular TMA-2 system, allowing for customization and upgrades.

## 2. PRODUCT OVERVIEW

The H03 headband is specifically designed to integrate seamlessly with the AIAIAI TMA-2 modular headphone system. Its primary features include:

- **High Comfort Padding:** Equipped with memory foam and PU leather for enhanced comfort during prolonged use.
- **Modular Design:** Easily interchangeable with other TMA-2 components, allowing for personalized headphone configurations.

- **Durable Construction:** Built to withstand regular use while maintaining its ergonomic properties.

### 3. SETUP INSTRUCTIONS

To assemble your TMA-2 headphones with the H03 headband, follow these steps:

1. **Prepare Components:** Ensure you have your H03 headband, two TMA-2 speaker units, and your preferred audio cable.
2. **Attach Speaker Units:** Carefully align each speaker unit with the connectors on the ends of the headband. The headband features integrated coiled cables with 3.5mm jacks. Insert the 3.5mm jack from the headband into the corresponding port on each speaker unit. Ensure a firm connection.
3. **Connect Audio Cable:** Plug your chosen audio cable into one of the 3.5mm ports on either speaker unit. The TMA-2 system allows for connection to either side.
4. **Adjust Fit:** Once assembled, gently extend or retract the headband arms to achieve a comfortable and secure fit on your head.

The modular design allows for easy attachment and detachment of components, providing flexibility for storage or swapping parts.

### 4. OPERATING THE HEADBAND

The H03 headband is designed for passive operation as part of your TMA-2 headphone setup. Its primary function is to provide a comfortable and stable fit for the speaker units on your head.

- **Comfort:** The PU leather and memory foam padding are engineered to distribute weight evenly and reduce pressure points, allowing for extended periods of wear without discomfort.
- **Stability:** The robust yet flexible frame ensures the headphones remain securely in place during use, whether for casual listening or professional applications.
- **Adjustability:** Fine-tune the fit by sliding the speaker units along the headband's rails to achieve optimal comfort and sound isolation.

## 5. MAINTENANCE

Proper care will extend the life and maintain the appearance of your H03 headband:

- **Cleaning:**
  - For the PU leather padding, gently wipe with a soft, damp cloth. Avoid using harsh chemicals, abrasive cleaners, or excessive moisture.
  - For the plastic frame, use a dry or slightly damp cloth to remove dust and grime.
- **Storage:** Store the headband in a cool, dry place away from direct sunlight and extreme temperatures. If detached from the speaker units, ensure it is stored in a way that prevents bending or damage to the frame.
- **Avoid Liquids:** The headband is not water resistant. Avoid exposure to liquids to prevent damage to the materials and internal components.

## 6. TROUBLESHOOTING

While the H03 headband is a passive component, here are some common considerations:

- **Headband feels too tight/loose:** Adjust the position of the speaker units along the headband's rails. Ensure they are evenly spaced and slide them until a comfortable and secure fit is achieved.
- **Speaker units not connecting securely:** Ensure the 3.5mm jacks from the headband are fully inserted into the speaker unit ports. Check for any debris in the ports that might obstruct the connection.
- **Visible wear on padding:** Over time, PU leather may show signs of wear. Regular cleaning and proper storage can prolong its life. Replacement headbands are available if needed.

For issues not covered here, please refer to the official AIAIAI support resources.

## 7. SPECIFICATIONS

Feature	Detail
Model Name	H03
Model Number	12003

Feature	Detail
Style	High comfort - PU leather padding
Material	Faux Leather
Item Weight	9 Grams
Product Dimensions	21.59 x 19.05 x 7.62 cm
Connectivity Technology	Wireless (refers to overall headphone system, headband itself is passive)
Included Components	Individual Modular Part
Water Resistance Level	Not Water Resistant

## 8. WARRANTY AND SUPPORT

AIAIAI products are designed for durability and performance. For specific warranty information regarding your H03 High Comfort Headband, please refer to the official AIAIAI website or the documentation included with your original TMA-2 headphone purchase.

For further assistance, technical support, or to explore other modular components, please visit the official AIAIAI store or contact their customer service:
