## Hestom TKJ400F-A5

# Hestom H13 True HEPA Replacement Filter for TKJ400F-A5 User Manual

Model: TKJ400F-A5

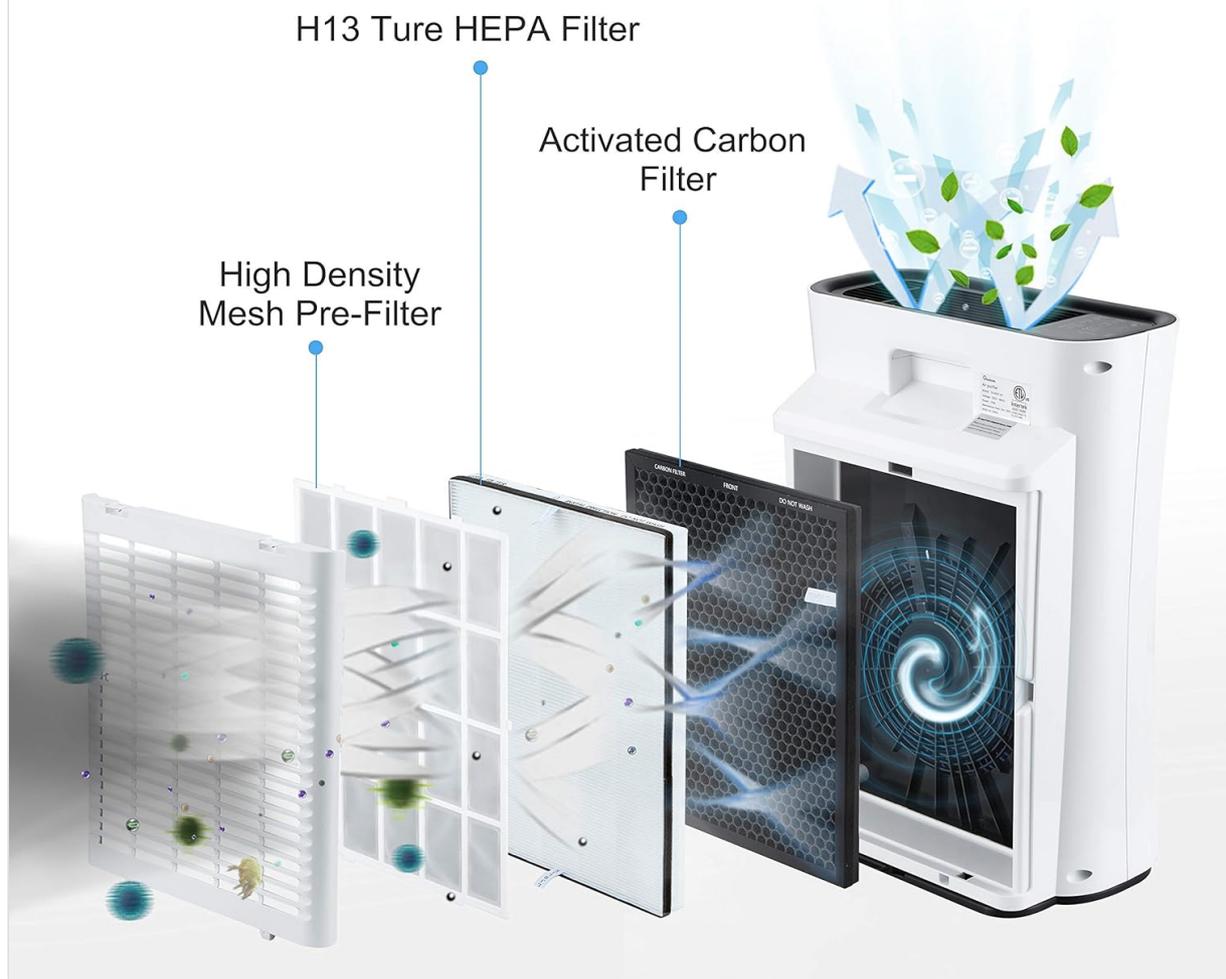

## INTRODUCTION

This manual provides instructions for the proper installation and maintenance of your Hestom H13 True HEPA Replacement Filter, designed specifically for the Hestom TKJ400F-A5 air purifier. Adhering to these guidelines will ensure optimal performance and longevity of your air purification system.

## PRODUCT OVERVIEW

The Hestom H13 True HEPA Replacement Filter features a multi-stage filtration system engineered to capture a wide range of airborne contaminants, ensuring cleaner air in your environment.

# THREE STAGE FILTRATION

This image illustrates the three-stage filtration process of the Hestom H13 True HEPA filter. It includes a High Density Mesh Pre-Filter, an Activated Carbon Filter, and an H13 True HEPA Filter, working together to capture various airborne particles and odors.

## Filtration Stages:

- **High Density Mesh Pre-Filter:** Designed to capture larger particles such as dust, lint, and pet dander, extending the life of subsequent filters.
- **Activated Carbon Filter:** Effectively removes common household odors, smoke, and harmful gases, improving air freshness.
- **H13 True HEPA Filter:** Filters fine dust and captures 99.97% of allergens as small as 0.3 microns, including pollen, pet dander, and smoke particles, providing superior air purification.

## INSTALLATION INSTRUCTIONS

Follow these steps to correctly replace the filter in your Hestom TKJ400F-A5 air purifier.

This image sequence demonstrates the steps for replacing the filter. It shows opening the air purifier's filter compartment, removing the old filter, inserting the new filter, and closing the compartment.

1. **Step 1: Power Off and Unplug:** Ensure the air purifier is turned off and completely unplugged from the power outlet before proceeding.
2. **Step 2: Access Filter Compartment:** Locate the filter compartment cover on your Hestom TKJ400F-A5 air purifier. Gently open or remove the cover according to your air purifier's design.
3. **Step 3: Remove Old Filter:** Carefully remove the old filter from the compartment. Dispose of the used filter responsibly according to local regulations.
4. **Step 4: Prepare New Filter:** Unpack the new Hestom H13 True HEPA Replacement Filter. Ensure the filter is oriented correctly according to any markings on the filter or the air purifier itself.
5. **Step 5: Insert New Filter:** Insert the new filter into the compartment, making sure it fits snugly and securely.
6. **Step 6: Close Compartment:** Close or reattach the filter compartment cover securely.
7. **Step 7: Power On:** Plug in the air purifier and turn it on.

## MAINTENANCE

Regular filter replacement is crucial for maintaining the efficiency and effectiveness of your air purifier.

- **Filter Lifespan:** The Hestom H13 True HEPA Replacement Filter is designed for use for up to 6 months

under normal operating conditions. Actual filter life may vary based on air quality, usage frequency, and environmental factors.

- **Replacement Indicator:** Your Hestom TKJ400F-A5 air purifier may feature a filter replacement indicator light. Replace the filter promptly when this indicator illuminates.
- **Cleaning:** The filter is not washable. Do not attempt to clean the filter with water, vacuum cleaners, or any other liquids or methods, as this can damage the filtration media and reduce its effectiveness.

## TROUBLESHOOTING

### Filter Replacement Light Remains On After Replacement

If the filter replacement indicator light on your air purifier remains illuminated after installing a new filter, follow these steps:

- **Resetting the Indicator:** Most air purifiers require a manual reset of the filter replacement indicator after a new filter is installed. Refer to your Hestom TKJ400F-A5 air purifier's main user manual for specific instructions on how to reset this indicator. This often involves pressing and holding a specific button or a combination of buttons for a few seconds.
- **Re-check Installation:** Ensure the new filter is correctly installed and that the filter compartment cover is securely closed. An improperly seated filter or cover can prevent the sensor from recognizing the new filter.

## SPECIFICATIONS

Feature	Description
Model	H13 True HEPA Replacement Filter
Compatibility	Hestom TKJ400F-A5 Air Purifier
Filtration Type	Three-stage (High Density Mesh Pre-filter, Activated Carbon, H13 True HEPA)
HEPA Efficiency	99.97% particle removal for particles as small as 0.3 microns
Activated Carbon	Yes, for odor and harmful gas removal
Estimated Lifespan	Up to 6 months

## WARRANTY AND SUPPORT

For warranty information or technical support regarding your Hestom H13 True HEPA Replacement Filter or TKJ400F-A5 air purifier, please refer to the documentation provided with your original air purifier unit or visit the official Hestom website for the most current information.

*Note: This manual pertains specifically to the replacement filter. For detailed operation, features, and troubleshooting of the air purifier itself, consult the air purifier's main user manual.*
