

N-brand PAN875W

N-brand Replacement Blower Fan Belt for Panda 3.75 cu. ft. Compact Dryer (Model PAN875W)

Model: PAN875W | Brand: N-brand

1. INTRODUCTION

This instruction manual provides essential information for the proper installation, maintenance, and troubleshooting of the N-brand replacement blower fan belt, specifically designed for the Panda 3.75 cu. ft. Compact Dryer, model PAN875W. Please read this manual thoroughly before attempting any installation or repair to ensure safety and optimal performance of your appliance.

2. SAFETY INFORMATION

Always prioritize safety when working with electrical appliances. Failure to follow these safety guidelines may result in injury or damage to property.

- **Disconnect Power:** Always unplug the dryer from the electrical outlet before performing any service or maintenance.
- **Qualified Personnel:** If you are not comfortable performing appliance repairs, seek assistance from a qualified technician.
- **Protective Gear:** Wear appropriate personal protective equipment, such as gloves, to prevent injury.
- **Original Parts:** Use only genuine or approved replacement parts to ensure compatibility and safety.
- **Sharp Edges:** Be aware of sharp edges or components inside the dryer.

3. INSTALLATION (SETUP)

This section outlines the general steps for replacing the blower fan belt. Specific disassembly procedures for your Panda PAN875W dryer may vary. Refer to your dryer's service manual for detailed instructions on accessing internal components.

1. **Prepare the Dryer:** Ensure the dryer is unplugged from the power source. Move the dryer to an open area for easier access.
2. **Access Internal Components:** Depending on your dryer model, you may need to remove the back

panel, top panel, or front panel to access the blower assembly and belt. Carefully remove any screws or fasteners.

3. **Locate the Blower Fan Belt:** Identify the existing belt connected to the blower motor and fan.
4. **Remove Old Belt:** Carefully remove the old belt. Note its routing path for correct installation of the new belt.
5. **Install New Belt:** Position the new N-brand replacement belt around the blower fan and motor pulley. Ensure it is seated correctly and has proper tension. The belt is made of polyurethane and is green in color.
6. **Reassemble Dryer:** Once the new belt is securely in place, reattach all panels and fasteners that were removed.
7. **Test Operation:** Plug the dryer back into the power outlet and run a short cycle to ensure the blower fan operates correctly and quietly.

Image 2: The N-brand replacement blower fan belt laid flat on a textured surface, highlighting its green color and circular shape. This image provides a clearer view of the belt's material and form.

4. OPERATING INSTRUCTIONS

The blower fan belt is a component part of your dryer and does not have separate operating instructions.

Its function is to transmit power from the motor to the blower fan, which circulates air within the dryer. Once correctly installed, the dryer should operate as intended by its manufacturer. Refer to your Panda 3.75 cu. ft. Compact Dryer's user manual for specific operating instructions.

5. MAINTENANCE

Regular inspection of the blower fan belt can help prevent future issues. It is recommended to periodically check the belt for signs of wear, cracking, fraying, or stretching. If any damage is observed, replace the belt promptly to maintain optimal dryer performance and prevent further damage to the appliance. The lifespan of the belt can be affected by usage patterns and environmental factors.

6. TROUBLESHOOTING

If your dryer is experiencing issues after belt replacement, consider the following common problems:

- **Dryer Not Tumbling:** Ensure the belt is correctly routed and tensioned. A loose or improperly installed belt can prevent the drum from turning.
- **Unusual Noises (Squealing, Grinding):** This could indicate improper belt alignment, a worn idler pulley, or issues with the motor or blower fan itself. Recheck belt installation.
- **No Airflow/Poor Drying:** While less common for a blower belt, if the blower fan is not spinning due to a broken or slipping belt, airflow will be affected. Verify the blower fan is rotating.
- **Belt Slipping Off:** Ensure the belt is correctly seated on all pulleys and that the pulleys themselves are not damaged or misaligned.

If troubleshooting steps do not resolve the issue, consult a qualified appliance technician.

7. SPECIFICATIONS

Brand	N-brand
Model Number	PAN875W
Compatible Dryer	Panda 3.75 cu. ft. Compact Dryer
Material	Polyurethane (PU)
Color	Green
UPC	704219242571

8. WARRANTY AND SUPPORT

This N-brand replacement blower fan belt comes with a **1-year warranty** from the date of purchase. This warranty covers defects in material and workmanship under normal use.

For warranty claims, technical support, or further assistance, please contact the N-brand customer service department. Keep your proof of purchase for warranty validation.
