SETUP

1. Charging Your Beats Flex

Before first use, it is recommended to fully charge your Beats Flex. Connect the included USB-C to USB-C charging cable to the charging port on the right control module of your Beats Flex and to a compatible USB-C power adapter (sold separately) or a USB-C port on a computer.

- A full charge provides up to 12 hours of listening time.
- With Fast Fuel charging, a 10-minute charge can provide 1.5 hours of playback when the battery is low.

2. Powering On and Pairing

The Beats Flex are compatible with both Apple and Android devices, offering seamless connectivity via Bluetooth.

1. **Power On:** Press and hold the power button on the right control module for 1 second until the indicator light turns on.
2. **Pairing with Apple Devices (iOS 14 or later):**

   - Unlock your iPhone or iPad and hold your Beats Flex near it.
   - A setup animation will appear on your device's screen.
   - Follow the on-screen instructions to connect.

3. **Pairing with Android Devices or Other Bluetooth Devices:**

   - With your Beats Flex powered on, press and hold the power button until the indicator light begins to flash, indicating pairing mode.
   - On your device, go to Bluetooth settings and select "Beats Flex" from the list of available devices.

3. Choosing the Right Eartips

For optimal sound quality and comfort, select the eartips that best fit your ears. The Beats Flex come with four size options (XS, S, M, L). Experiment with different sizes to find the most secure and comfortable seal.

OPERATING YOUR BEATS FLEX

On-Device Controls

The integrated controls on the left control module allow you to manage music playback, calls, and voice assistant activation.

- **Volume Buttons:** Press the '+' button to increase volume, and the '-' button to decrease volume.
- **Multi-function Button (between volume buttons):**
  - Press **once**: Play/Pause audio, Answer/End call.

- Press **twice**: Skip forward.
- Press **three times**: Skip backward.
- Press and **hold**: Activate voice assistant (Siri, Google Assistant, etc.).

Magnetic Earbuds with Auto-Play/Pause
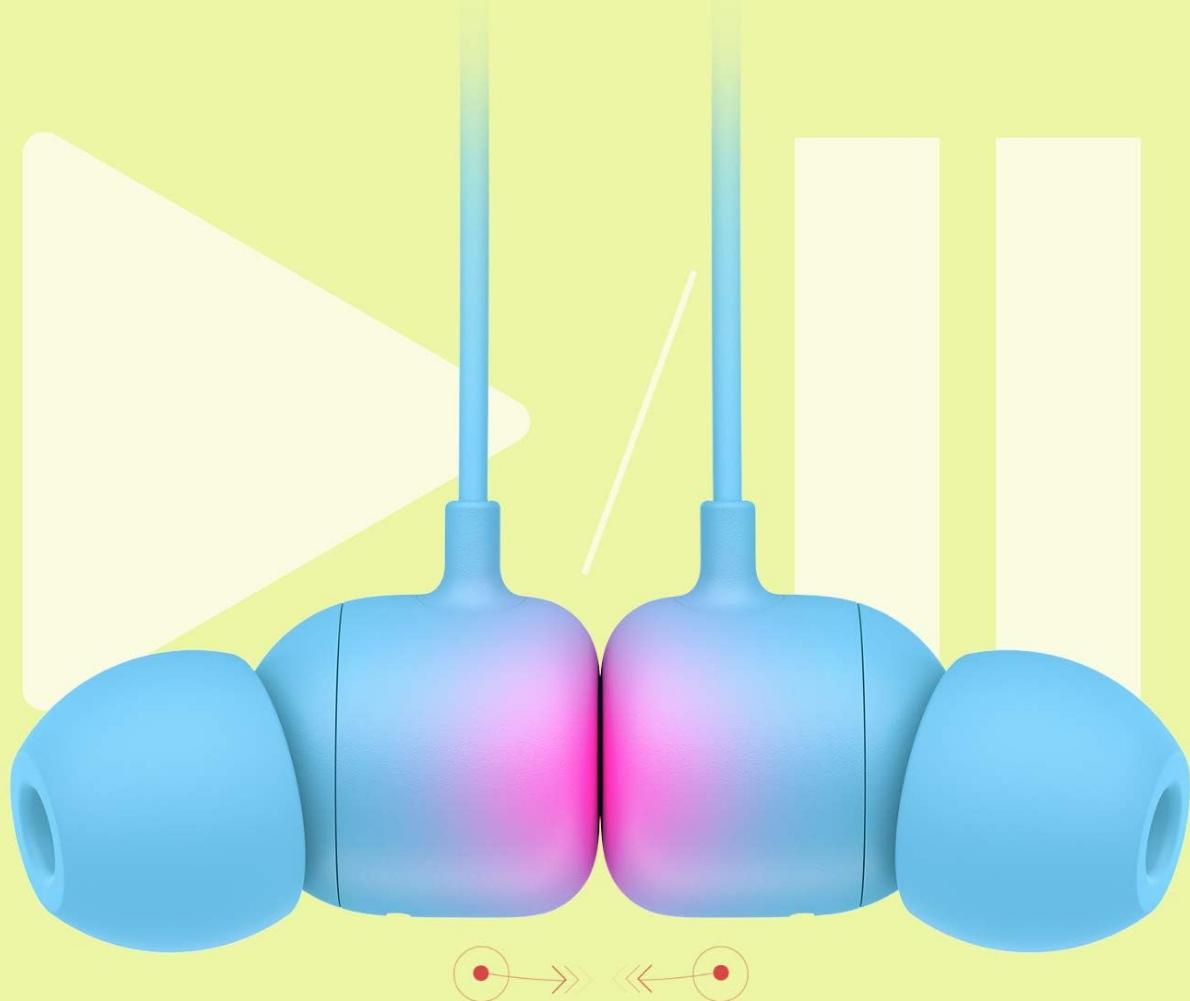

The Beats Flex feature magnetic earbuds that automatically pause your audio when snapped together around your neck and resume playback when separated. This intelligent design helps conserve battery life and provides a convenient listening experience.

Audio Sharing (Apple Devices)

With Audio Sharing, you can wirelessly share audio from your iPhone, iPad, or Apple TV to another pair of Beats headphones or AirPods. Simply bring the second pair of headphones near your device and follow the on-screen prompts to connect and share your audio.

Image: An iPhone screen displaying the Audio Sharing interface, showing two pairs of Beats headphones connected and sharing audio simultaneously.

Built-in Microphone

The Beats Flex feature a built-in microphone with wind reduction technology, ensuring clear voice quality during calls and voice assistant interactions.

MAINTENANCE

Proper maintenance helps extend the life of your Beats Flex earbuds:

- **Cleaning:** Gently wipe the earbuds and cable with a soft, dry, lint-free cloth. Do not use abrasive cleaners or submerge the device in liquids.
- **Eartips:** Remove the eartips periodically and clean them with a damp cloth. Ensure they are completely dry before reattaching.
- **Storage:** When not in use, store your Beats Flex in a clean, dry place away from extreme temperatures. The magnetic earbuds help prevent tangling.

- **Water Resistance:** The Beats Flex are water resistant, meaning they can withstand splashes and light rain. They are not waterproof and should not be submerged in water. Avoid exposing them to pressurized water or high-velocity water.

TROUBLESHOOTING

If you encounter issues with your Beats Flex, try the following steps:

- **No Power:** Ensure the earbuds are fully charged. Connect them to a power source using the USB-C cable.
- **Cannot Pair:**

  - Make sure Bluetooth is enabled on your device.
  - Ensure the Beats Flex are in pairing mode (indicator light flashing).
  - Move the earbuds closer to your device.
  - Forget "Beats Flex" from your device's Bluetooth settings and attempt to re-pair.

- **No Sound or Low Volume:**

  - Check the volume levels on both your Beats Flex and your connected device.
  - Ensure the earbuds are properly seated in your ears.
  - Try playing audio from a different application or source.

- **Intermittent Connection:**

  - Ensure there are no obstructions between your device and the earbuds.
  - Move away from other wireless devices that might cause interference.

- **Resetting Your Beats Flex:** If issues persist, you may need to reset your earbuds. Consult the official Beats support website or the included Quick Start Guide for specific reset instructions.

SPECIFICATIONS

Model Name	Beats Flex
