## 5. TROUBLESHOOTING

If you encounter any issues with your TV stand, refer to the following common troubleshooting tips:

Problem	Possible Cause	Solution
TV is not stable or wobbles.	Loose connections; TV too heavy; uneven floor.	Ensure all screws are tightened. Verify TV weight is within limits (max 66 lbs). Adjust foot pads or move to a level surface.

Problem	Possible Cause	Solution
Cannot mount TV to bracket.	Incorrect VESA pattern; wrong screws used.	Check your TV's VESA pattern against the stand's compatibility (100x100 to 600x400 mm). Use the correct screws and spacers provided.
Height adjustment is difficult.	Adjustment mechanism is too tight or dirty.	Loosen the adjustment knob/lever. Clean any dust or debris from the sliding parts.
Cables are not neatly managed.	Improper routing.	Reroute cables through the designated cable management clips or channels on the stand's column.
