## OPERATING INSTRUCTIONS

### Stage 1: Parental Control Mode (10+ Months)

In this stage, the trike functions as a pushchair, with the parent fully controlling direction and movement. The child is secured by the safety harness and rests their feet on the footrests.

- **Intuitive Steering Bar:** The parent handle allows for easy and precise steering of the front wheel.
- **Safety Harness:** Always secure the child with the multi-point safety harness.

- **Retractable Footrests:** Ensure footrests are extended for the child's comfort and safety.
- **Sunshade:** Adjust the 360° sunshade to protect the child from sun exposure.
- **Freewheel System:** Engage the freewheel system on the front wheel to prevent pedals from rotating with the wheel, protecting the child's feet.
- **Brake:** Use the parking brake located on the rear wheels to secure the trike when stationary.

### Stage 2: Assisted Pedaling Mode (15+ Months)

As your child grows and develops motor skills, they can begin to practice pedaling while the parent still maintains control over steering and speed.

- **Engage Pedals:** Disengage the freewheel system to allow the child to pedal.
- **Retract Footrests:** Fold away the footrests to encourage pedaling.
- **Parental Steering:** Continue to use the parent handle for steering and guidance.
- **Safety Harness:** Continue to use the safety harness for security.

### Stage 3: Independent Trike Mode (30+ Months)

Once your child is confident in pedaling and steering, the trike can be converted into a fully independent tricycle.

- **Remove Parent Handle:** Detach the parent steering bar.
- **Remove Sunshade:** Detach the sunshade.
- **Remove Safety Bar/Harness:** Remove any remaining safety bars or harnesses if your child is capable of independent riding.
- **Child Steering:** The child now steers using the handlebars.

## MAINTENANCE

---

Regular maintenance ensures the longevity and safe operation of your trike.

- **Cleaning:** The seat cover is removable and washable. Follow care instructions on the label. For other parts, wipe clean with a damp cloth and mild soap. Do not use abrasive cleaners.
- **Inspection:** Periodically check all screws, bolts, and fasteners to ensure they are tight. Inspect wheels, pedals, and steering for any signs of wear or damage.
- **Storage:** Store the trike in a clean, dry place away from direct sunlight and extreme temperatures to prevent material degradation.

## TROUBLESHOOTING

---

If you encounter any issues with your Smoby Baby Driver Comfort Trike, please refer to the following common solutions:

- **Loose Parts:** If any parts feel loose, check the corresponding fasteners and tighten them securely. Do not overtighten.
- **Steering Issues:** Ensure the parent handle is correctly inserted and locked into place. For independent mode, check that the handlebars are securely attached.
- **Pedals Not Turning:** Verify that the freewheel system is disengaged if the child is attempting to pedal. Check for any obstructions around the pedals or wheels.
- **Squeaking Noises:** Apply a small amount of silicone-based lubricant to moving parts like wheel axles or pedal mechanisms if squeaking occurs. Avoid oil-based lubricants that can attract dirt.
