Troubleshooting

If you encounter issues with your Shark Vertex vacuum, refer to the following common solutions:

- **No Power:** Ensure the battery is fully charged and properly inserted. Check if the power button is pressed and the correct cleaning mode is selected.
- **Reduced Suction:** Empty the dust cup. Clean or replace the foam filters. Check the nozzle and wand for any blockages.
- **Brushroll Not Spinning:** Ensure the vacuum is in a mode that activates the brushroll (e.g., Carpet mode). Check the brushroll for any obstructions or tangled hair. The self-cleaning feature minimizes this, but manual inspection may be needed.
- **Battery Not Charging:** Ensure the charger is correctly connected to both the battery and a working power outlet.
