

Nanit N311NW

Nanit Pro Smart Baby Monitor & Wall Mount Instruction Manual

Model: N311NW

INTRODUCTION

Welcome to the Nanit Pro Camera, the most awarded, connected baby monitor and app on the market. This manual provides essential information for setting up, operating, and maintaining your Nanit Pro Smart Baby Monitor with Wall Mount. It offers a 1080p HD bird's eye view of your baby with secure, 256-bit encryption, along with features like sensor-free sleep and breathing motion tracking, 2-way audio, sound and motion alerts, and night vision.

Setup

Proper setup ensures optimal performance and safety. The Nanit Pro Camera with Wall Mount is designed for secure installation above your baby's crib.

What's Included

- Nanit Pro Camera
- Easy-install ASTM-certified Wall Mount
- Small sensor-free Breathing Band (0-3 months)
- Power Adapter and Mounting Kit

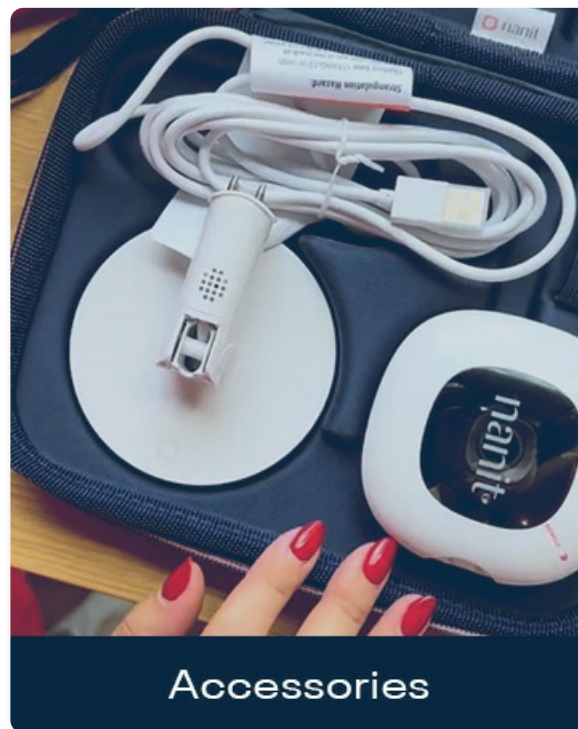

Image: Unboxed components of the Nanit Pro Smart Baby Monitor, including the camera, wall mount pieces, power adapter, and breathing band.

Installation Steps (Wall Mount)

1. **Choose Location:** Select a wall directly above the center of your baby's crib. Ensure the wall is sturdy and free from obstructions.
2. **Mounting:** Use the provided mounting kit to securely attach the wall mount to the wall. The design ensures no wires are exposed, enhancing safety.
3. **Attach Camera:** Connect the Nanit Pro Camera to the wall mount. It is designed to provide a clear, overhead view of the crib.
4. **Power On:** Plug in the power adapter. The camera will power on and begin its initial setup sequence.
5. **App Download & Pairing:** Download the Nanit App from your device's app store. Follow the in-app instructions to pair your camera with your smartphone or tablet. This involves connecting the camera to your home Wi-Fi network.

THE #1 BABY MONITOR, 2 STAND OPTIONS

Which set up is right for you?

Floor Stand

- Bestselling stand
- Minimal assembly
- Freestanding with adjustable height

Wall Mount

- Secured to the wall next to crib
- Installation required
- Perfect for small areas

OPERATING INSTRUCTIONS

The Nanit Pro Camera offers a suite of features accessible through the Nanit App to help you monitor your baby.

Live Monitoring & Two-Way Audio

- Access 1080p HD video livestream from anywhere via the app.
- Use the 2-way audio feature to hear your baby and speak to them directly through the monitor.
- Night vision automatically activates in low-light conditions, providing clear visibility.

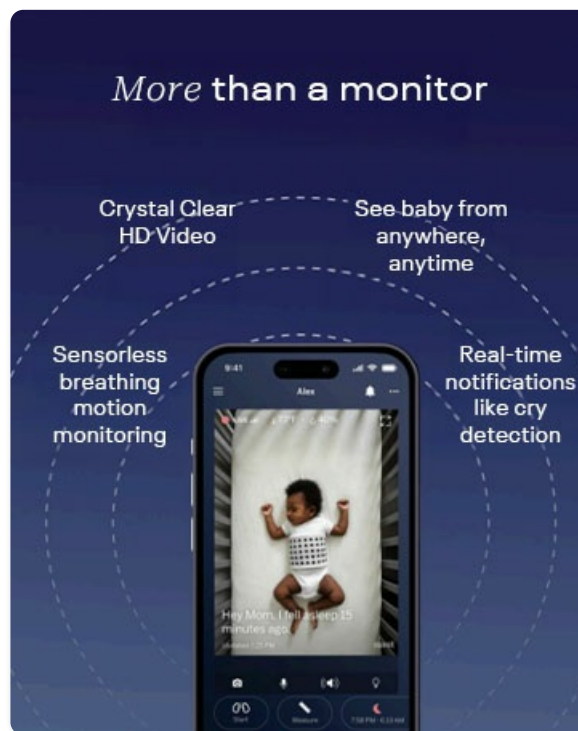

Image: The Nanit App displaying a live video feed of a baby in a crib, with overlaid text indicating features like crystal clear HD video, baby's sleep status, real-time notifications, 2-way audio, temperature + humidity, and split screen.

Sound & Motion Alerts

- Receive real-time alerts for detected sound and motion in the crib.
- Custom Smart Alerts, such as Cry Detection, are available with Nanit Insights Sleep Plan.

Real-time notifications, customized for you and your baby

Image: A smartphone screen showing a Nanit app notification: "Nanit Alex is standing up", with a live view of a toddler standing in a crib, illustrating real-time customized notifications.

Breathing Motion Monitoring

- Utilize the included Small sensor-free Breathing Band (0-3 months) with the Pro Camera.
- The camera detects baby's breathing motion through the unique pattern on the band, without direct sensors on the baby.
- Nanit tracks breaths per minute and sends alerts if changes are detected.

Sensor-free Breathing Motion Monitoring

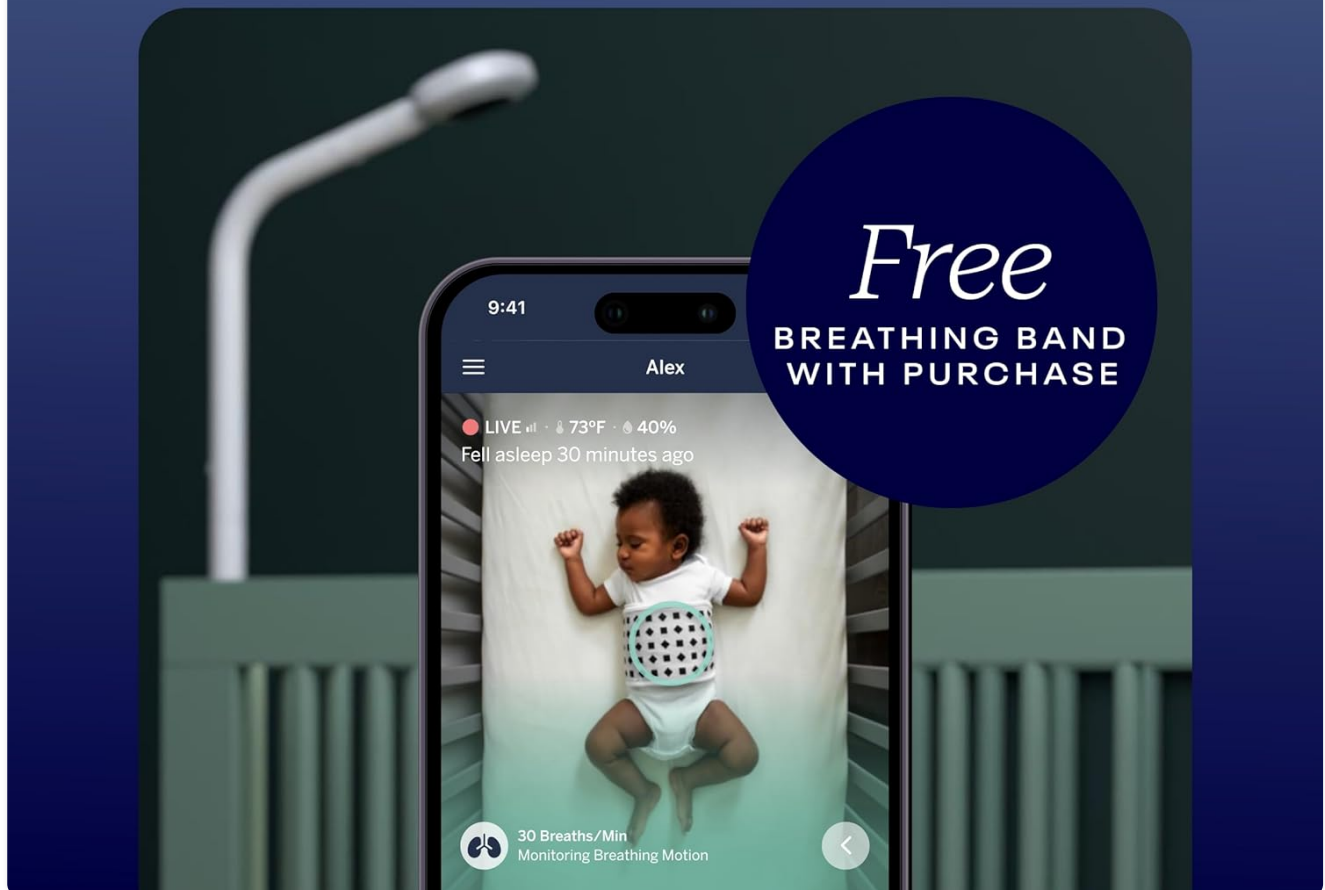

Image: The Nanit App displaying "30 Breaths/Min Monitoring Breathing Motion" with a baby in a crib wearing the sensor-free breathing band, demonstrating the monitoring feature.

Sleep Tracking & Insights (Nanit Insights Sleep Plan)

- The included 6-month trial of Nanit Insights Sleep Plan unlocks features like auto-captured sleep data, live-status Sleep dashboard, and video clips/history.
- Track sleep onset, time asleep, and longest stretches.
- After the trial, choose from different Insights Plans for continued access to advanced features and developmental milestones tracking.

Nanit tracks every nap + night, effortlessly

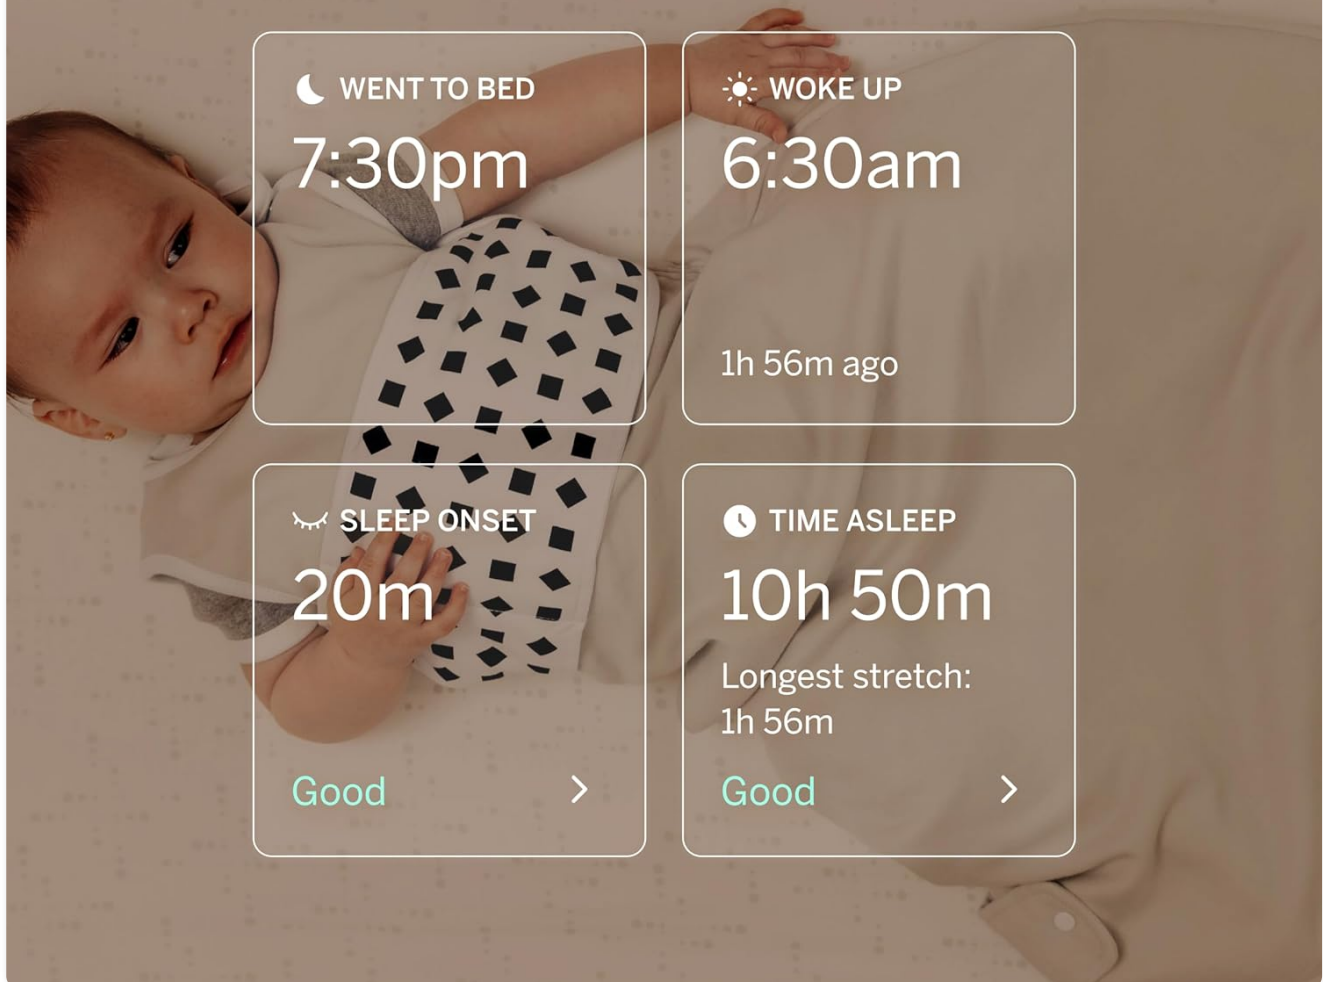

Image: The Nanit App showing detailed sleep tracking metrics for a baby, including "Went to Bed," "Woke Up," "Sleep Onset," and "Time Asleep," indicating effortless tracking of naps and nights.

Additional Features

- **Split Screen:** View up to two cameras at once if you have multiple Nanit cameras.
- **Room Conditions:** Track temperature and humidity of the baby's room.
- **Soothing Sounds:** Soothe your baby to sleep with a selection of nature sounds, white noise, or lullabies.
- **Multi-User Access:** Add multiple users and control access for family members.

MAINTENANCE

To ensure the longevity and optimal performance of your Nanit Pro Smart Baby Monitor, follow these maintenance guidelines:

- **Cleaning:** Gently wipe the camera lens and body with a soft, dry cloth. Avoid using harsh chemicals or abrasive materials.
- **Cable Management:** Periodically check the wall mount and cable covers to ensure they remain securely in place and no wires are exposed.
- **Software Updates:** Keep the Nanit App updated to the latest version to access new features and ensure compatibility.
- **Breathing Band Care:** Follow the washing instructions provided with the Breathing Band to maintain its integrity and pattern for accurate monitoring.

TROUBLESHOOTING

If you encounter issues with your Nanit Pro Smart Baby Monitor, consider the following common solutions:

- **No Video/Offline Camera:**
 - Ensure the camera is properly plugged into a power source.
 - Check your home Wi-Fi connection. The camera requires a stable Wi-Fi signal.
 - Restart the camera by unplugging it for 10 seconds and plugging it back in.
 - Verify the camera is correctly attached to the wall mount.

- **Breathing Motion Not Detected:**

- Ensure the Breathing Band is worn correctly and the patterned area is visible to the camera.
- Remove any objects obscuring the Breathing Wear pattern (e.g., blankets).
- Confirm the camera has a clear line of sight to the Breathing Wear pattern.
- Check that the camera is at an appropriate distance from the crib.

- **App Connectivity Issues:**

- Ensure your smartphone/tablet has a stable internet connection (Wi-Fi or cellular data).
- Update the Nanit App to the latest version.
- Restart your mobile device.

- **Subscription Features Not Accessible:**

- Verify your Nanit Insights Sleep Plan subscription status in the app settings.
- Ensure your trial period has not expired.
