3. Product Features

- **2-in-1 Charging Capability:** Equipped with two advanced coils for a wider sensing range, enabling efficient wireless charging for Qi-enabled smartphones. An additional USB-A port (15W Max output) on the back allows simultaneous wired charging for non-wireless devices like tablets or earphones, using the included cable or your device's original cable.
- **Fast Charging:** Comes with a 30W high-output Power Delivery (PD) adapter. Delivers up to 7.5W for iPhone

14/13/12 series and up to 10W for Samsung Galaxy S22/S21/Note20 and other fast-charge compatible devices. This significantly reduces charging time compared to standard 5W adapters.

- **Ergonomic Design & Stability:** Features a 60-degree ergonomic incline, ideal for both horizontal video viewing and vertical use (e.g., Face ID). Anti-slip rubber pads on the base and charging surface ensure your device remains stable and protected during charging, preventing accidental displacement.
- **Case Compatibility:** Supports wireless charging through non-metallic cases up to 5mm thick (3mm for iPhone 12/13/14 series). For optimal performance and safety, remove any metallic cases, magnetic attachments, or credit cards before charging. The product includes Foreign Object Detection (FOD) for safety.

4. Setup Guide

1. Connect the provided 30W PD charger to a power outlet.
2. Connect the USB Type-C to C cable from the PD charger to the Type-C input port on the back of the wireless charging stand. Ensure the cable is fully inserted until it clicks into place.
3. The charging stand is now ready for use.

5. Operating Instructions

5.1 Wireless Charging

Place your Qi-compatible smartphone directly onto the charging surface of the stand. The LED indicator on the stand will illuminate to confirm that charging has begun. You can place your phone vertically for Face ID or horizontally for media consumption.

This allows for simultaneous charging of two devices.

5.3 Usage Scenarios

The ergonomic design allows for versatile use while charging:

- **Video Viewing:** Place your phone horizontally to watch videos comfortably.
- **FaceTime/Video Calls:** Place your phone vertically for hands-free video calls.
