5. MAINTENANCE

To ensure the longevity and optimal performance of your ROG Strix Scope RX keyboard, regular maintenance is recommended:

- **Cleaning:** Use a soft, dry cloth to wipe down the keyboard surface. For deeper cleaning, gently remove keycaps (if applicable and with proper tools) and use compressed air to clear debris from beneath the keys.
- **Liquid Spills:** Due to its IP57 water resistance, minor spills can be wiped away. However, for significant liquid exposure, disconnect the keyboard immediately, dry it thoroughly, and allow it to air dry completely before reconnecting. Avoid submerging the keyboard.
- **Dust:** Regularly use compressed air to remove dust from between the keys and from the USB passthrough port to prevent accumulation.

6. TROUBLESHOOTING

If you encounter issues with your ROG Strix Scope RX keyboard, try the following troubleshooting steps:

- **Keyboard Not Responding:** Ensure the USB cable is securely connected to both the keyboard and your computer. Try connecting to a different USB port. Restart your computer.
- **Lighting Issues:** If RGB lighting is not working or is incorrect, ensure the Armoury Crate software is installed and up to date. Check lighting settings within the software. Try resetting the lighting profile.
- **Keys Not Registering:** Clean around the affected key to ensure no debris is obstructing the switch. If the issue persists, it may indicate a hardware problem.
- **USB Passthrough Not Working:** Verify that the keyboard's USB cable is fully plugged in. Test the passthrough port with a different device.
