Sinbo SCM-2957 Electric Turkish Coffee Pot Instruction Manual

Model: SCM-2957

1. IMPORTANT SAFETY INSTRUCTIONS

Please read all instructions carefully before using the Sinbo SCM-2957 Electric Turkish Coffee Pot. Retain this manual for future reference.

- Do not immerse the power base, cord, or plug in water or any other liquid.
- Ensure the voltage indicated on the appliance matches your local mains voltage before connecting.
- Always place the appliance on a stable, heat-resistant surface, away from edges.
- Do not operate the appliance with a damaged cord or plug, or if the appliance malfunctions or has been damaged in any manner.
- Close supervision is necessary when the appliance is used by or near children.
- Unplug from the outlet when not in use and before cleaning. Allow to cool before putting on or taking off parts, and before cleaning the appliance.
- Do not use attachments not recommended by the manufacturer.
- This appliance is intended for household use only.
- Avoid contact with hot surfaces. Use handles or knobs.
- Do not overfill the coffee pot beyond the maximum fill line to prevent boiling over.

2. PRODUCT OVERVIEW

The Sinbo SCM-2957 is an electric Turkish coffee pot designed for ease of use and efficient coffee preparation. It features a stainless steel body and a detachable power base.

Image 1: The Sinbo SCM-2957 Electric Turkish Coffee Pot on its power base, ready for use.

Image 2: The coffee pot can be easily lifted from its detachable power base for serving and cleaning.

3. SETUP

1. **Unpacking:** Carefully remove all packaging materials and inspect the appliance for any damage.

2. **Initial Cleaning:** Before first use, wipe the exterior of the coffee pot with a damp cloth. Wash the interior of the coffee pot with warm, soapy water, then rinse thoroughly. Do not immerse the power base in water.
3. **Placement:** Place the power base on a dry, flat, and stable surface, away from heat sources and water.
4. **Power Connection:** Ensure the power switch on the base is in the 'OFF' position before plugging the power cord into a suitable electrical outlet.

4. OPERATING INSTRUCTIONS

1. **Add Ingredients:** Fill the coffee pot with water, Turkish coffee, and sugar (optional) according to your desired recipe and number of servings. Do not exceed the maximum fill line. The capacity is approximately 5 cups (0.4 liters).
2. **Place on Base:** Carefully place the coffee pot onto the power base, ensuring it is seated correctly.
3. **Start Brewing:** Press the power switch on the base to the 'ON' position. The indicator light will illuminate.
4. **Monitor Brewing:** The coffee will begin to heat and foam. Stay near the appliance and monitor the brewing process closely to prevent boiling over.
5. **Serve:** Once the coffee reaches the desired foam and temperature, switch the appliance 'OFF' and carefully lift the coffee pot from the base by its handle. Pour the coffee into cups.
6. **Cool Down:** Allow the appliance to cool down before cleaning or storing.

5. MAINTENANCE AND CLEANING

Regular cleaning ensures optimal performance and extends the life of your appliance.

- **Always unplug** the appliance from the power outlet and allow it to cool completely before cleaning.
- **Coffee Pot:** Wash the interior of the coffee pot with warm, soapy water and a soft sponge. Rinse thoroughly and dry. The exterior can be wiped with a damp cloth.
- **Power Base:** Wipe the power base with a dry or slightly damp cloth. Never immerse the power base in water or other liquids.
- **Do not use** abrasive cleaners, scouring pads, or harsh chemicals, as these can damage the surface.
- **Descaling:** Over time, mineral deposits may accumulate. To descale, fill the pot with a mixture of water and white vinegar (1:1 ratio) or a commercial descaling solution. Heat the mixture (do not boil), then let it sit for 15-30 minutes. Empty and rinse thoroughly several times.

6. TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Appliance does not turn on.	Not plugged in; power switch is off; no power at outlet.	Ensure plug is securely in outlet; turn power switch to 'ON'; check outlet with another appliance.
Coffee boils over.	Pot is overfilled; not monitored during brewing.	Do not exceed the maximum fill line; always monitor the brewing process and switch off when ready.
Coffee tastes burnt or weak.	Incorrect coffee-to-water ratio; coffee brewed too long or not long enough.	Adjust coffee and water quantities; switch off the appliance as soon as foam rises.
Slow heating.	Mineral deposits inside the pot.	Descale the coffee pot as described in the Maintenance section.
