SETUP INSTRUCTIONS

Unpacking and Placement

1. Carefully remove the heated blanket from its packaging.
2. Spread the blanket evenly over your mattress, ensuring the heating wires are not bunched or folded. The connectors should be positioned at the foot of the bed.
3. Place a top sheet and any additional bedding over the heated blanket.

Connecting the Controller(s)

1. Locate the connector(s) on the blanket. For King size blankets, there will be two connectors, one for each side.
2. Firmly plug the controller cord(s) into the blanket connector(s). Ensure a secure connection.
3. Plug the power cord(s) from the controller(s) into a 110V-120V AC wall outlet. Avoid using extension cords or power strips.

TROUBLESHOOTING

If you encounter any issues with your Beautyrest Heated Electric Blanket, please refer to the following common problems and solutions:

| Problem | Solution |
|-------------------------------|--|
| Controller light is blinking. | Unplug and reconnect the controller, ensuring it is properly connected. If the issue persists, contact customer support. |
| Blanket is not heating well. | Ensure the blanket is powered on and set to the maximum level. Allow sufficient time for it to heat up. |

| Problem | Solution |
|---|---|
| Only parts of the blanket are getting warm. | <p>This is usually caused by a bunched or pinched heating element. Lay the blanket flat, untucked, and free from heavy objects. Straighten the heating wires as needed to restore function. Run your fingers along the wire, paying special attention to areas where the wire bends or is twisted, and manually twist it back if necessary.</p> |
