## Mueller MCJ-730

# Mueller Professional Citrus Juicer MCJ-730 Instruction Manual

Model: MCJ-730

## 1. INTRODUCTION

---

Thank you for choosing the Mueller Professional Citrus Juicer MCJ-730. This manual provides essential information for the safe and efficient operation, maintenance, and care of your new manual citrus juicer. Please read these instructions thoroughly before first use and retain them for future reference.

This manual juicer is designed for extracting juice from various citrus fruits such as oranges, lemons, limes, grapefruits, and pomegranates. Its heavy-duty construction ensures durability and maximum juice extraction without electricity.

## STURDY HEAVY DUTY CAST IRON CONSTRUCTION

**FOOD-GRADE**  
Stainless Steel

**BPA**  
Free

**NON-SLIP**  
Rubber Feet

## PROFESSIONAL QUALITY

### 2. PRODUCT COMPONENTS

The Mueller Professional Citrus Juicer consists of several key components designed for efficient and easy juicing:

- **Base:** Provides stability for the juicer.
- **Lever Handle:** Used to apply pressure for juicing.
- **Press Cone:** The upper part that presses down onto the fruit.
- **Strainer:** Filters pulp and seeds from the juice.
- **Funnel:** Directs the juice into your container.
- **Non-slip Suction Feet:** Located on the base for secure placement.

NO ELECTRICITY

ECO-FRIENDLY

SILENT OPERATION

REMOVABLE  
STAINLESS STEEL PRESS CONE,  
STRAINER AND FUNNEL

## EFFICIENT JUICING

Image: A detailed view of the Mueller Professional Citrus Juicer, illustrating its dimensions (17.5" height, 9" depth, 7" width) and highlighting the removable stainless steel press cone, strainer, and funnel for easy cleaning.

### 3. SETUP

Before using your juicer for the first time, ensure all packaging materials are removed. Place the juicer on a stable, flat, and dry surface. The non-slip suction feet will help secure the unit during operation.

1. Unpack all components from the box.
2. Wash the removable stainless steel press cone, strainer, and funnel with warm, soapy water. Rinse thoroughly and dry.
3. Assemble the strainer and funnel onto the juicer base.
4. Ensure the juicer is placed on a stable surface to prevent movement during use.

### 4. OPERATING INSTRUCTIONS

Follow these steps to extract fresh juice:

1. Cut the fruit (e.g., orange, lemon, lime) in half.
2. Place a glass or container directly under the funnel to collect the juice.

3. Position one half of the fruit, cut-side down, onto the strainer cone.
4. Firmly grasp the lever handle and pull it down slowly and steadily to press the fruit. Apply consistent pressure until all juice is extracted.
5. Release the handle and remove the squeezed fruit. Repeat with remaining fruit halves.

### 3 EASY STEPS TO THE FRESHEST JUICE

1. Insert fruit half cut-side down

2. Firmly hold juicer and press down handle

3. Enjoy your refreshing juice!

Image: A three-step visual guide demonstrating the juicing process: 1. Insert fruit half cut-side down. 2. Firmly hold the juicer and press down the handle. 3. Enjoy your refreshing juice.

## MAXIMUM JUICE EXTRACTION

Full Flavor without the Seeds and Pulp

Image: The Mueller Professional Citrus Juicer in action, demonstrating maximum juice extraction from an orange half into a glass, with minimal pulp and seeds.

## 5. CLEANING AND MAINTENANCE

---

Regular cleaning ensures the longevity and hygiene of your juicer.

- **Daily Cleaning:** After each use, remove the press cone, strainer, and funnel. Wash these parts with warm, soapy water. Rinse thoroughly and dry immediately to prevent water spots or mineral buildup.
- **Dishwasher Safe Parts:** The removable stainless steel parts (press cone, strainer, funnel) are dishwasher safe for convenience.
- **Base Cleaning:** Wipe the main body and base of the juicer with a damp cloth. Do not immerse the entire unit in water.
- **Storage:** Store the juicer in a clean, dry place when not in use.

## 6. SAFETY INFORMATION

---

Please observe the following safety precautions:

- Keep the juicer out of reach of children.
- Always place the juicer on a stable, level surface before operation.
- Ensure your hands are clear of the press cone and strainer when lowering the handle to prevent pinching.
- Do not force the handle down excessively, as this may damage the unit or cause injury.
- Use only for its intended purpose of juicing citrus fruits.
- Exercise caution when handling the juicer, especially during cleaning, to avoid accidental drops due to its weight.

## 7. TROUBLESHOOTING

---

If you encounter any issues with your juicer, refer to the following common solutions:

- **Juicer feels unstable during use:** Ensure the juicer is placed on a completely flat and dry surface. The non-slip feet require a clean surface to grip effectively. You may need to hold the base with one hand while pressing the handle with the other for added stability.
- **Handle feels loose or wobbly:** Check the screws at the pivot points of the handle mechanism. Tighten them gently with an appropriate tool if they have become loose over time. Do not overtighten.
- **Incomplete juice extraction:** Ensure the fruit is cut in half and placed correctly, cut-side down, on the strainer cone. Apply firm, steady pressure throughout the pressing motion.
