# UNIVERSEEL Orange Round Indicator Light User Manual

Model: 064.00.0092 | Brand: Paxanpax (Manufactured by UNIVERSEEL)

## 1. INTRODUCTION

This user manual provides essential information for the safe and effective installation, operation, and maintenance of your UNIVERSEEL Orange Round Indicator Light. Please read this manual thoroughly before use and retain it for future reference.

## 2. PRODUCT OVERVIEW

The UNIVERSEEL Orange Round Indicator Light is a compact and durable signaling component designed for various applications, particularly in household appliances such as hobs and ovens. It features a bright orange illumination and comes with pre-attached wires for easy integration.

## 3. SPECIFICATIONS

Attribute	Value
Manufacturer	UNIVERSEEL

Product Brand	Paxanpax
Model Number	064.00.0092
Product Code	VEC0000320
Indicator Diameter	9mm
Wire Length	18 cm
Color	Orange
Item Weight	200 grams
Units per Item	1

## 4. SETUP AND INSTALLATION

---

**Important Safety Information:** Installation should only be performed by a qualified professional or individuals with appropriate electrical knowledge. Always disconnect power to the appliance before beginning any installation work to prevent electric shock.

- Power Disconnection:** Ensure the main power supply to the appliance (e.g., hob, oven) is completely disconnected at the circuit breaker or fuse box. Verify with a voltage tester.
- Identify Mounting Location:** Locate the designated mounting hole for the indicator light. The light is designed for a 9mm diameter opening.
- Insert Indicator:** Carefully insert the indicator light into the mounting hole until it is securely seated.
- Wire Connection:** Connect the two wires of the indicator light to the appropriate electrical terminals within the appliance. The indicator light typically connects in parallel with the circuit it is monitoring (e.g., across a heating element's power supply) or to a dedicated indicator output. Consult the appliance's wiring diagram for correct connection points. There is no specific polarity for this type of indicator light.
- Secure Connections:** Ensure all electrical connections are secure and properly insulated to prevent short circuits.
- Restore Power:** Once installation is complete and all connections are verified, restore power to the appliance.

## 5. OPERATING INSTRUCTIONS

---

The UNIVERSEEL Orange Round Indicator Light operates as a visual signal. It will illuminate when electrical current flows through the circuit to which it is connected. For example, if installed in an oven, it may light up when the oven's heating element is active, indicating that the oven is heating.

- Illumination:** The light will glow orange when power is supplied to its terminals.
- Indication:** Its primary function is to provide a clear visual indication of a circuit's status (e.g., ON/OFF, heating active).

## 6. MAINTENANCE

---

The UNIVERSEEL Orange Round Indicator Light requires minimal maintenance.

- **Cleaning:** If the indicator light becomes dirty, gently wipe the surface with a soft, dry cloth. Do not use abrasive cleaners or solvents, as these may damage the plastic housing.
- **Inspection:** Periodically inspect the light for any signs of physical damage or loose connections. Ensure the wires are not frayed or exposed.
- **Replacement:** If the indicator light ceases to function or is physically damaged, it should be replaced with an identical or equivalent part. Always disconnect power before attempting replacement.

## 7. TROUBLESHOOTING

---

If the indicator light is not functioning as expected, consider the following troubleshooting steps:

- **Light Does Not Illuminate:**
  - **No Power:** Check if the appliance or the specific circuit the light is connected to is receiving power. Ensure the appliance is turned on and functioning correctly.
  - **Loose Connection:** Disconnect power and check the wiring connections to the indicator light. Ensure they are secure and making good contact.
  - **Faulty Light:** The indicator light itself may be faulty. If power is confirmed to be reaching the light's terminals and connections are secure, the light may need replacement.
- **Light Flickers:**
  - **Intermittent Connection:** This often indicates a loose or poor electrical connection. Disconnect power and re-secure the wiring.
  - **Voltage Fluctuations:** Less common, but unstable power supply can cause flickering. This would typically affect other components as well.

If issues persist after troubleshooting, it is recommended to consult a qualified technician.

## 8. WARRANTY INFORMATION

---

Specific warranty details for the UNIVERSEEL Orange Round Indicator Light are not provided in this manual. Please refer to the original purchase documentation, the seller's terms and conditions, or the manufacturer's official website for information regarding product warranty.

## 9. SUPPORT

---

For technical support, replacement parts, or further inquiries regarding the UNIVERSEEL Orange Round Indicator Light, please contact the retailer from whom the product was purchased or refer to the contact information provided by the manufacturer, UNIVERSEEL, or brand, Paxanpax, on their official websites.
