ABUS Bordo Lite 6055C SH Folding Lock User Manual

Model: 62110

INTRODUCTION

This manual provides instructions for the proper use, setup, and maintenance of your ABUS Bordo Lite 6055C SH folding lock. Please read this manual carefully before using the product to ensure optimal performance and security.

PRODUCT OVERVIEW

The ABUS Bordo Lite 6055C SH is a lightweight and compact folding lock designed for bicycle security. It features a 4-digit adjustable combination code and comes with an SH 6055 holder for convenient transport on your bicycle frame. The lock's special steel construction is covered with a plastic coating to protect your bike's paintwork.

- **Model:** Bordo Lite 6055C SH
- **Security Level:** ABUS Security Level 7
- **Lock Type:** 4-digit adjustable combination lock
- **Material:** Special steel with plastic coating
- **Included:** SH 6055 holder for frame mounting

SETUP

1. Setting Your Personal Combination Code

Your ABUS Bordo Lite 6055C SH lock comes with a factory-set combination, usually "0000". Follow these steps to set your personal 4-digit combination:

1. Open the lock using the current combination (factory default "0000").
2. Locate the reset mechanism. This is typically a small button or screw on the side of the lock body. Consult the diagram below for its exact location.
3. Using a pointed object (like a pen tip), press and hold the reset button/screw.
4. While holding the reset mechanism, rotate the number wheels to your desired 4-digit combination. Choose a memorable but secure combination.
5. Release the reset mechanism. Your new combination is now set.

6. Scramble the numbers to lock the device. Test your new combination to ensure it opens the lock correctly before securing your bicycle.

2. Mounting the SH 6055 Holder

The SH 6055 holder allows for convenient transport of your Bordo Lite lock on your bicycle frame. It can be mounted without tools using tensioning straps.

1. Identify a suitable location on your bicycle frame for the holder. Ensure it does not interfere with pedaling, steering, or other bike components.
2. Wrap the tensioning straps around the frame tube.
3. Thread the straps through the holder's attachment points and secure them firmly. The holder should be stable and not move during riding.
4. Insert the folded lock into the holder. The lock can be removed from the front of the holder for quick access.

OPERATION

1. Locking Your Bicycle

To secure your bicycle with the ABUS Bordo Lite 6055C SH lock:

1. Remove the lock from its holder.
2. Unfold the lock segments.
3. Wrap the lock around your bicycle frame and a fixed object (e.g., a bike rack, lamppost). Ensure the fixed object is secure and cannot be easily moved or cut.
4. Insert the locking bar into the lock body.
5. Scramble the combination wheels to a random set of numbers. This prevents unauthorized opening.

2. Unlocking Your Bicycle

To unlock your bicycle:

1. Align the combination wheels to your personal 4-digit code.
2. Pull the locking bar out of the lock body.
3. Unfold the lock and remove it from your bicycle and the fixed object.
4. Fold the lock segments back together and place it in the SH 6055 holder for transport.

MAINTENANCE

Regular maintenance ensures the longevity and smooth operation of your ABUS Bordo Lite 6055C SH lock.

- **Cleaning:** Wipe the lock body and segments with a damp cloth to remove dirt and grime. Avoid harsh chemicals that could damage the plastic coating.
- **Lubrication:** Periodically apply a small amount of lock lubricant (e.g., graphite-based or silicone spray) to the combination wheels and the locking mechanism. This helps prevent sticking and ensures smooth operation. Do not use oil-based lubricants as they can attract dirt.
- **Storage:** When not in use, store the lock in a dry place to prevent corrosion.
- **Inspection:** Regularly inspect the lock segments, rivets, and plastic coating for any signs of wear, damage, or corrosion. If significant damage is observed, consider replacing the lock.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Lock will not open with the correct combination.	Combination wheels are not perfectly aligned; combination was accidentally changed; internal mechanism is stuck.	Ensure each number wheel clicks precisely into place. Double-check your combination. Apply lock lubricant to the wheels and try again. If the combination was accidentally changed, you may need to try nearby numbers or contact ABUS support.
Locking bar is difficult to insert or remove.	Dirt or debris in the mechanism; lack of lubrication; slight misalignment.	Clean the locking mechanism. Apply lock lubricant. Ensure the lock is held straight when inserting/removing the bar.

Problem	Possible Cause	Solution
Holder is loose on the bike frame.	Straps are not tightened sufficiently.	Re-tighten the tensioning straps on the SH 6055 holder. Ensure they are securely fastened.
