TUMAKOU R01

TUMAKOU RF Facial Skin Radiofrecuencia Device

Instruction Manual

1. Product Overview

The TUMAKOU Radio Frequency Skin Tightening Machine is an advanced device utilizing bipolar radio frequency technology for skin tightening, wrinkle reduction, lifting, and overall skin rejuvenation on both the face and body. It is designed for convenient at-home use, offering salon-grade results.

Image: Illustration highlighting various treatment areas including face, eye area, neck, jaw, belly, buttocks, legs, and arms.

This device features a dual probe design, with a smaller probe for facial areas and a larger probe for body treatment. It offers 3 adjustable energy levels and 3 preset time settings (10, 20, 30 minutes) to customize your treatment experience.

What Is RF Work?

TUMAKOU radio frequency skin tightening machine adopts **bipolar** RF technology to promote collagen and elastic fiber regeneration, so as to achieve skin tightening, wrinkle removal, lifting, skin rejuvenation, skin improvement, anti-aging and so on.

Working temperature range is about 55°C-65°C/131°F-149°F

Image: A cross-section diagram of skin showing how bipolar RF technology targets both the epidermis and dermis layers to promote collagen and elastic fiber regeneration. The working temperature range is approximately 55°C-65°C (131°F-149°F).

1. **Install the Probe:** Select either the face probe or the body probe and securely screw it onto the handle. Ensure it is clean before attachment.

Image: A hand demonstrating the installation of a treatment probe onto the device handle.

2. **Connect Power Cords:** Plug both the handle's coiled cord and the main power cord into their respective ports on the back of the device. Ensure they are inserted **TIGHTLY**. Then, connect the main power cord to a suitable electrical outlet.

Image: A close-up view showing the proper connection of the handle cable and power cable into the device's ports. It is crucial to plug them in tightly and avoid alternating their positions.

3. **Turn On the Device:** Flip the power switch located on the back of the main unit to the 'ON' position.
4. **Apply Gel or Cream:** Before starting treatment, apply a suitable conductive gel or cream to the area of skin you intend to treat. *Note: This product does not include gel or cream.*

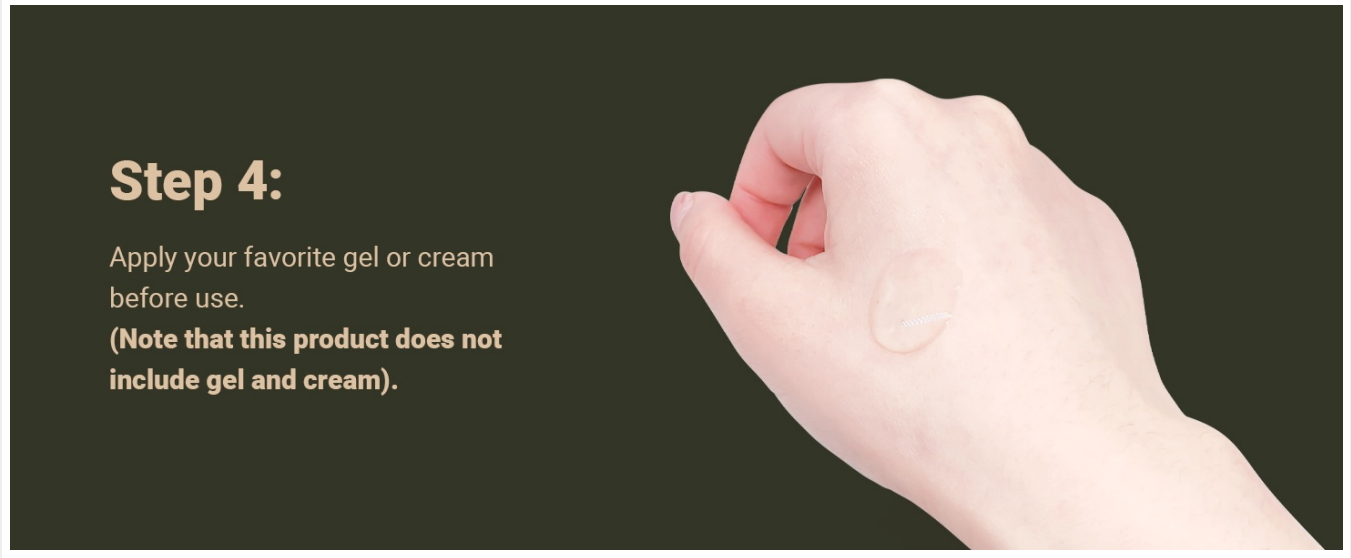

Image: A hand applying a clear gel or cream to the skin, emphasizing the need for a conductive medium before using the device.

3. Operating Instructions

For optimal results, use the device 2-3 times a week, for 10-15 minutes per treatment area.

1. **Select Energy Level:** Press the 'LEVEL' button to choose your desired energy level (1, 2, or 3). For first-time users, it is recommended to start with Level 1. The higher the level, the more intense the effect.

Image: A finger pressing the 'LEVEL' button on the device's control panel, indicating the selection of energy intensity.

2. **Set Treatment Time:** Press the 'TIME' button to select a preset treatment duration (10, 20, or 30 minutes).
3. **Begin Treatment:** Gently move the device's probe in a circular motion over the treated area. Maintain continuous movement to ensure even heat distribution and avoid prolonged contact in one spot.

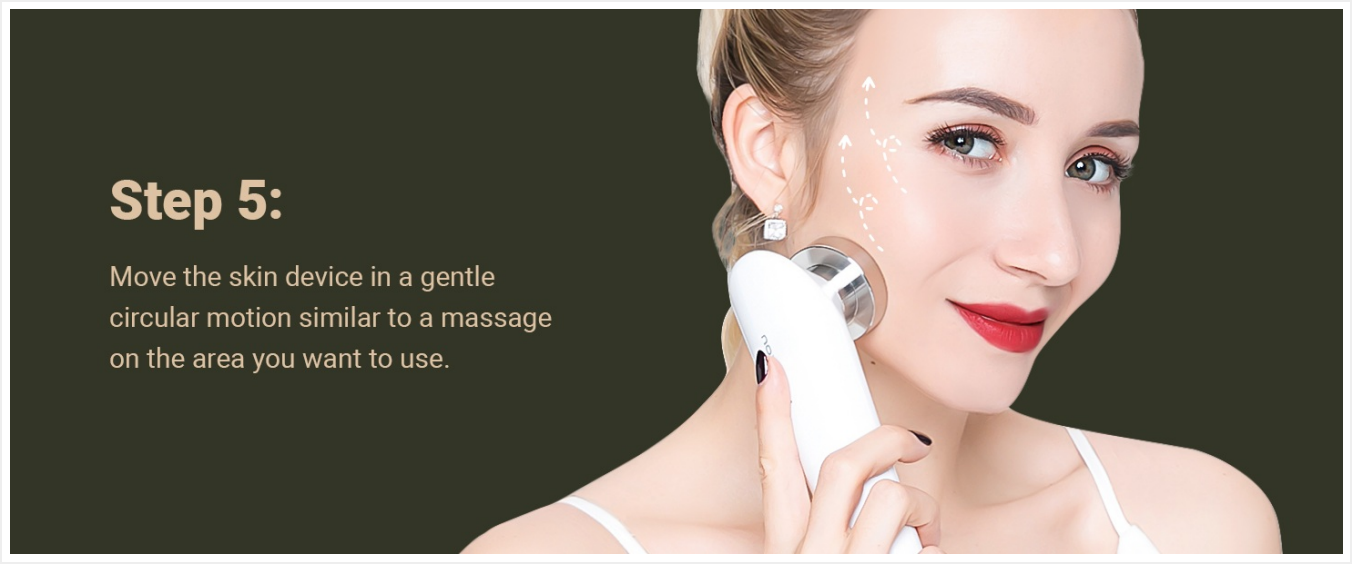

Image: A woman demonstrating the use of the RF device on her face, moving it in a gentle circular motion, similar to a massage.

4. **Post-Treatment:** After the session, turn off the device, unplug it, and clean the probe and main unit as described in the Maintenance section.

4. Maintenance

- **Cleaning:** After each use, wipe the probes and the main unit with a soft, damp cloth. Do not use abrasive cleaners or immerse the device in water.
- **Storage:** Store the device in a cool, dry place, away from direct sunlight and extreme temperatures. Keep it out of reach of children.
- **Handle with Care:** Avoid dropping the device or subjecting it to strong impacts.

5. Troubleshooting

If you encounter issues with your TUMAKOU RF device, please refer to the following common problems and solutions:

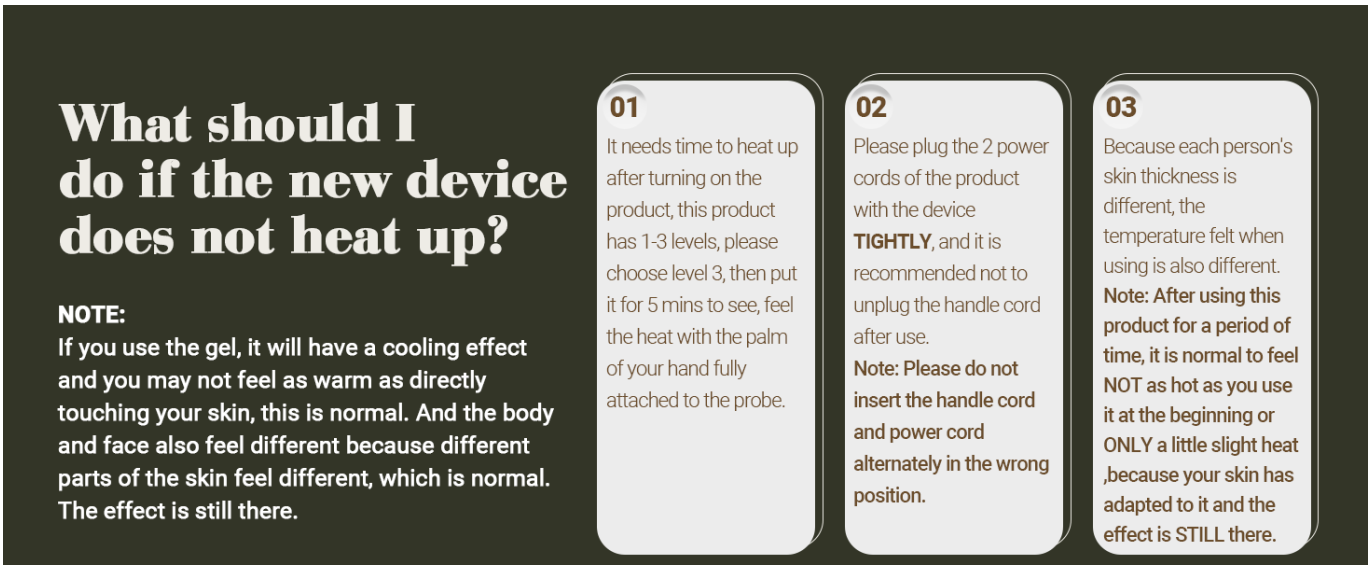

Image: A troubleshooting guide addressing the issue of the device not heating up, providing three key points for resolution.

Problem	Possible Cause / Solution

Problem	Possible Cause / Solution
Device does not heat up.	**Needs to heat up:** After turning on, the product needs time to heat up. Choose level 3 and wait for 5 minutes to feel the heat with your palm. **Loose connection:** Ensure both power cords are plugged in **TIGHTLY**. Do not unplug the handle cord during use. **Skin adaptation:** Over time, your skin may adapt, and the heat sensation might feel less intense than at the beginning. This is normal, and the effect is still present. **Gel's cooling effect:** If using a gel, it may have a cooling effect, making the heat less noticeable. This is normal.
Probes are difficult to attach/detach.	Ensure the probes are aligned correctly with the handle's threading before screwing them on or off. Do not force them.
Device not turning on.	Check if the main power cord is securely plugged into both the device and the wall outlet. Ensure the power switch on the back of the unit is in the 'ON' position.

6. Specifications

Feature	Detail
Brand	TUMAKOU
Model Name	R01
Product Dimensions	8.27 x 8.27 x 5 inches
Item Weight	4.72 Pounds (2.14 Kilograms)
Power Supply	100-240V
Rated Frequency	50-60Hz
Power	50W
Energy Levels	1, 2, 3 levels
Timer Settings	10, 20, 30 mins
Skin Type	Normal
Manufacturer	Shenzhen Shishibang Technology Co., Ltd.

7. Warranty and Support

For information regarding product warranty, returns, or technical support, please refer to the documentation included with your purchase or contact the manufacturer directly. You may also visit the TUMAKOU brand store on Amazon for additional resources and contact information.
