

TRIXIE 19533

TRIXIE 19533 OP Body User Manual

Model: 19533 | Brand: TRIXIE

1. INTRODUCTION

This manual provides essential information for the proper use and care of your TRIXIE 19533 OP Body. The TRIXIE OP Body is designed to provide comfortable and protective coverage for your pet, particularly during post-operative recovery or in cases of skin conditions, helping to prevent licking, scratching, and biting of wounds or irritated areas. It is suitable for both cats and dogs.

Image 1: The TRIXIE 19533 OP Body, size 70 cm, shown on a dog. The body is grey with dark grey trim around the neck and leg openings, designed to cover

the torso and upper legs.

2. SAFETY INSTRUCTIONS

- Always supervise your pet while they are wearing the OP Body, especially during the initial period.
- Ensure the body is not too tight, which could restrict movement or circulation, nor too loose, which could allow the pet to remove it or access wounds.
- Regularly check your pet's skin under the body for any signs of irritation, rubbing, or discomfort.
- If your pet shows signs of distress, difficulty breathing, or inability to urinate/defecate, remove the body immediately and consult a veterinarian.
- The OP Body is not a substitute for veterinary care. Always follow your veterinarian's advice regarding wound care and recovery.
- Keep the product away from open flames or excessive heat.

3. PACKAGE CONTENTS

Your TRIXIE 19533 OP Body package should contain:

- 1 x TRIXIE 19533 OP Body (Size XL, 70 cm, Grey)

4. SETUP AND FITTING

Proper fitting is crucial for your pet's comfort and the effectiveness of the OP Body. Follow these steps:

1. **Measure Your Pet:** Before fitting, measure your pet's back length from the base of the neck to the base of the tail. The TRIXIE 19533 OP Body is designed for a back length of 70 cm. Also, consider the chest circumference to ensure a comfortable fit.
2. **Introduce the Body:** Allow your pet to sniff and investigate the body before attempting to put it on. Positive reinforcement with treats can help.
3. **Putting it On:**
 - Gently guide your pet's head through the neck opening.
 - Next, guide each front leg through the respective leg openings.
 - Pull the body over your pet's torso, ensuring it covers the back and extends towards the tail.
 - Guide the hind legs through the rear leg openings.
 - Secure the body using the snap fasteners located on the back or underside, ensuring they are firmly closed.
4. **Check the Fit:**
 - The body should fit snugly but not restrict movement, breathing, or bathroom functions.
 - You should be able to comfortably slide two fingers under the fabric around the neck and leg openings.
 - Ensure the leg openings do not chafe or rub against your pet's skin.
 - The body should cover the intended area (e.g., surgical site) completely.

5. USAGE GUIDELINES

The TRIXIE OP Body is intended for specific uses:

- **Post-operative Recovery:** Provides protection for surgical wounds, preventing your pet from licking or biting the

incision site.

- **Skin Conditions:** Helps manage skin irritations, hot spots, or allergies by preventing direct access to affected areas.
- **Comfort and Warmth:** Can offer a sense of security and warmth for anxious pets or during cooler weather.

Important: Always consult your veterinarian regarding the appropriate duration and specific use of the OP Body for your pet's condition.

6. CARE AND MAINTENANCE

To ensure the longevity and hygiene of your TRIXIE OP Body, follow these care instructions:

- **Cleaning:** The body can be machine washed, dry cleaned, or hand washed. Refer to the product's care label for specific temperature and detergent recommendations. Generally, a gentle cycle with mild detergent is advised.
- **Drying:** Air dry the body flat to maintain its shape and elasticity. Avoid tumble drying, as high heat can damage the fabric and fasteners.
- **Storage:** Store the clean, dry body in a cool, dry place away from direct sunlight when not in use.
- **Inspection:** Regularly inspect the body for any signs of wear and tear, such as loose threads, damaged fasteners, or stretched fabric, which could compromise its effectiveness.

7. TROUBLESHOOTING

Here are some common issues and their potential solutions:

Issue	Possible Cause	Solution
Pet can still access wound/irritated area.	Incorrect size; body is too loose or does not cover the area adequately.	Ensure correct size is used. Re-adjust the body for a snugger fit. Consult your veterinarian for alternative solutions if the body is not effective.
Pet shows discomfort or difficulty moving.	Body is too tight; incorrect size; pet is not accustomed to wearing it.	Check the fit; ensure it's not restricting movement or circulation. Allow your pet time to adjust. If discomfort persists, remove the body and consult a veterinarian.
Skin irritation under the body.	Body is too tight; material rubbing; infrequent cleaning.	Ensure proper fit. Clean the body regularly. If irritation persists, discontinue use and consult a veterinarian.
Snap fasteners come undone easily.	Fasteners are worn or damaged; body is under too much strain.	Inspect fasteners for damage. If damaged, the body may need replacement. Ensure the body is not overly stretched.

8. PRODUCT SPECIFICATIONS

Brand	TRIXIE
Model Number	19533
Type of Animal	Cats, Dogs

Recommended Species	Dogs
Size	XL (70 cm back length)
Color	Grey (Natural)
Material	Polyethylene Terephthalate
