

Hunter PHC-600

Hunter PRO-HC600 Smart WiFi Irrigation Controller User Manual

Model: PHC-600

1. INTRODUCTION

The Hunter PRO-HC600 is a commercial-grade, Wi-Fi enabled irrigation controller designed for managing up to 6 zones. It integrates with the Hydrowise platform, allowing for remote access, advanced diagnostics, and weather-based scheduling. This manual provides essential information for the installation, operation, and maintenance of your PRO-HC600 controller.

Figure 1: Hunter PRO-HC600 Controller with door open, displaying the touchscreen interface and an attached key.

Key Features:

- 6-zone irrigation control.
- Integrated Wi-Fi for Hydrowise app connectivity.
- 2.75-inch full-color touchscreen for direct programming.
- Weather-based scheduling (Predictive Watering™) via Hydrowise.
- Compatibility with flow sensors and Klik sensors.
- Milliamp sensor for wiring fault detection.
- Rugged, UV-resistant plastic cabinet with IP44 rating for indoor/outdoor use.

2. SAFETY INFORMATION

WARNING: Read all safety warnings and instructions before installing or operating this product. Failure to follow these instructions may result in electric shock, fire, or serious injury.

- **Electrical Safety:** Ensure power is disconnected before performing any wiring or maintenance. The unit operates on 120V AC input and provides 24V AC output to valves.
- **Installation:** Install the controller in a location protected from direct sunlight and extreme weather conditions, even though it is rated for outdoor use. Ensure proper ventilation.
- **Water Exposure:** While the enclosure is IP44 rated, avoid direct water spray onto the unit, especially during wiring.
- **Qualified Personnel:** All electrical wiring should be performed by a qualified electrician in accordance with local codes and regulations.
- **Children:** Keep the device out of reach of children.

3. SETUP AND INSTALLATION

3.1 Mounting the Controller

1. Select a suitable mounting location. The controller can be installed indoors or outdoors. For outdoor installations, choose a shaded area to prolong the life of the unit.
2. Use appropriate screws and anchors for your mounting surface.
3. Mount the controller securely to the wall, ensuring it is level.

Figure 2: PRO-HC600 Controller mounted on a wall, showing conduit entry points.

3.2 Wiring the Controller

Before wiring, ensure the power to the controller is disconnected.

1. Open the controller door to access the wiring terminals.
2. Connect the common wire from your irrigation valves to the terminal marked **COM**.
3. Connect each zone valve wire to its corresponding numbered terminal (1-6).
4. If using a master valve or pump start relay, connect its wire to the terminal marked **P/MV**.
5. For sensor integration (e.g., flow sensor, Clik sensor), connect the sensor wires to the designated sensor ports. Refer to the sensor's specific instructions for wiring details.
6. Connect the 120V AC power cord to a grounded outlet. The controller comes with a pre-installed 5-foot cord.

Figure 3: Internal view of the PRO-HC600, highlighting the wiring terminal block.

3.3 Initial Configuration and Wi-Fi Setup

1. Once wired and powered on, the touchscreen will activate.
2. Follow the on-screen prompts to set the date, time, and region.
3. To connect to Wi-Fi, navigate to the *Settings* menu on the touchscreen.
4. Select *Wi-Fi Setup* and choose your network from the list. Enter the password.
5. Download the Hydrowise app from the App Store (iOS) or Google Play Store (Android).
6. Create a Hydrowise account or log in if you already have one.
7. Add your controller to your Hydrowise account by following the in-app instructions. You may need the controller's serial number, typically found on a label inside the unit.

4. OPERATING THE CONTROLLER

4.1 Using the Touchscreen Interface

The 2.75-inch full-color touchscreen allows for direct control and programming without a mobile device.

- **Zones:** Access individual zone controls, including manual run, test, and status.
- **Settings:** Configure system settings, Wi-Fi, date/time, and sensor options.
- **Status:** View current watering status, alerts, and system diagnostics.

4.2 Hydrawise App Operation

The Hydrawise app provides comprehensive remote control and monitoring capabilities.

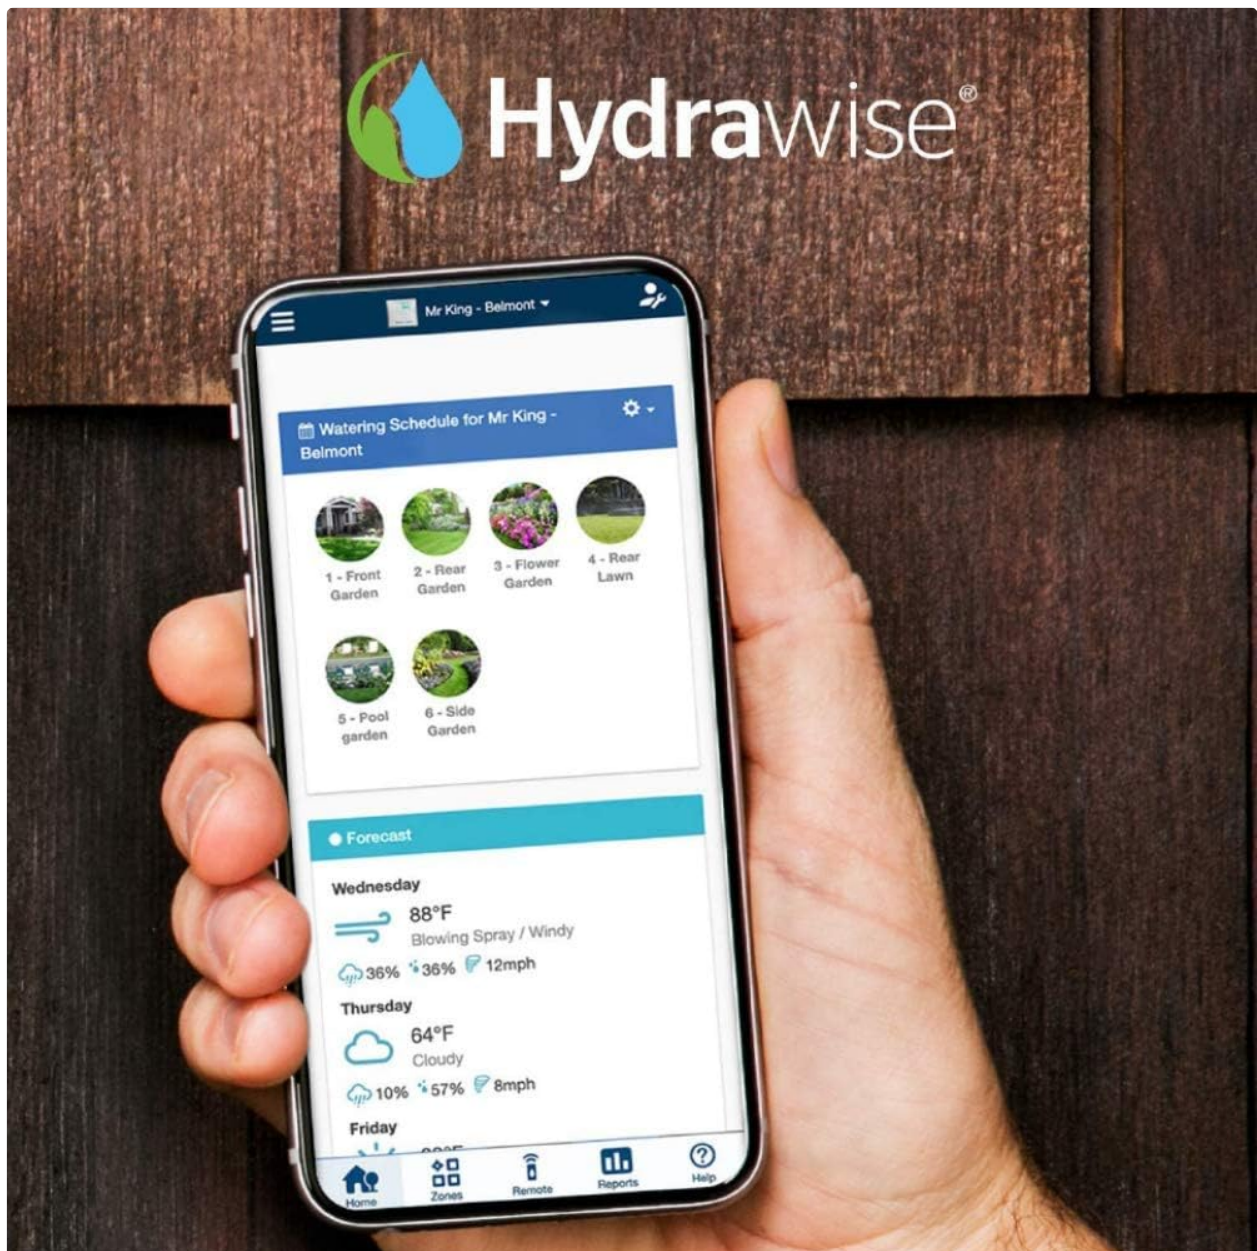

Figure 4: Hydrawise app interface on a smartphone, showing watering schedules and weather data.

- **Dashboard:** Overview of system status, upcoming watering, and weather.
- **Zones:** Create and manage watering schedules for each zone. Set run times, start times, and watering days.

- **Sensors:** Monitor connected sensors (e.g., flow, rain) and configure their actions.
- **Reports:** Access detailed reports on water usage, watering history, and system alerts.
- **Predictive Watering™:** The app automatically adjusts schedules based on local weather forecasts (temperature, rainfall, humidity, wind) to optimize water usage.

For detailed instructions on advanced programming and features within the Hydrowise app, refer to the Hydrowise online support documentation available at www.hydrowise.com/support.

5. MAINTENANCE

- **Cleaning:** Periodically wipe the exterior of the controller with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- **Firmware Updates:** The controller's firmware is updated automatically via Wi-Fi. Ensure your controller remains connected to the internet for optimal performance and access to new features.
- **Wiring Inspection:** Annually inspect all wiring connections for corrosion or damage. Ensure all terminals are secure.
- **Sensor Check:** If using external sensors, periodically check them for debris or obstructions that might affect their operation.

6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Controller not powering on.	No power to outlet; faulty power cord; internal fuse.	Check outlet with another device. Inspect power cord for damage. Contact support if issue persists.
Zone not watering.	Valve issue; wiring fault; schedule not set correctly; master valve/pump issue.	Check valve manually. Inspect wiring for breaks or loose connections. Verify schedule in app/touchscreen. Check P/MV wiring.
Wi-Fi connection lost.	Router issue; weak signal; incorrect password.	Restart router. Ensure controller is within Wi-Fi range. Re-enter Wi-Fi password on touchscreen.
Milliamp sensor alert.	Short circuit or open circuit in zone wiring.	Inspect wiring for the affected zone for damage, cuts, or loose connections.

For further troubleshooting assistance, visit the Hunter Hydrowise support page or contact Hunter customer service.

7. SPECIFICATIONS

Feature	Detail
Model Number	PHC-600
Zones	6
Input Voltage	120V AC
Output Voltage	24V AC
Display Type	Touchscreen (2.75 inch full-color)
Wi-Fi Frequency	2.4 GHz
Enclosure Rating	IP44 (Indoor/Outdoor)
Material	UV-resistant Plastic
Product Dimensions	3.75 x 7 x 8.6 inches
Item Weight	3.06 pounds
UPC	611698295144

8. WARRANTY AND SUPPORT

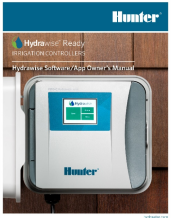

The Hunter PRO-HC600 Smart WiFi Irrigation Controller is backed by a **2-year warranty** from the date of purchase, covering defects in materials and workmanship under normal use.

For warranty claims, technical support, or additional product information, please contact Hunter Industries customer service or visit their official website:

- **Hunter Industries Website:** www.hunterindustries.com
- **Hydrawise Support:** www.hydrawise.com/support

Please have your model number (PHC-600) and purchase date available when contacting support.

RESIDENTIAL & COMMERCIAL IRRIGATION
Built on Innovation

- 01 **Save time:** Manage irrigation from anywhere using your smartphone, tablet, or computer.
- 02 **Save water:** Predictive Watering™ technology adjusts irrigation schedules based on actual weather data.
- 03 **Easy to use:** Dashboard control and touchscreen interface simplify programming.

Hydrowise® Ready

Manage Landscape Irrigation from Anywhere with the Wi-Fi Enabled Pro-HC Controller and Hydrowise Platform

Achieve maximum efficiency when you combine Hydrowise cloud-based software with Hunter Pro-HC irrigation controllers. The powerful Hydrowise platform equips you with the tools you need to successfully manage residential applications.

Predictive Watering technology adjusts schedules based on temperature forecast, wind probability, wind speed, and humidity to maximize water savings while keeping landscapes healthy and beautiful. Hydrowise monitors for watering to call attention to unexpected needs before costly landscape damage occurs. For the highest level of protection, add a simple-to-install AC flow meter to alert you of broken pipes or sprinklers.

Learn more: Visit hunterindustries.com or contact your local sales manager.

Hunter

RESIDENTIAL & COMMERCIAL IRRIGATION
Built on Innovation

- 01 **Save time:** Manage irrigation from anywhere around the world.
- 02 **Save money:** Avoid costly on-site visits by making schedule changes from anywhere.
- 03 **Predictive Watering™ adjustments:** Integrated cloud weather data to make water-saving scheduling adjustments.

Hydrowise® Ready

PRO-HC OUTDOOR PROFESSIONAL-GRADE WI-FI CONTROLLER WITH HYDROWISE WEB-BASED SOFTWARE

Manage your Pro-HC irrigation controller from anywhere worldwide using your smart device or web browser with Hydrowise cloud software. Predictive Watering adjusts schedules based on temperature forecast, wind probability, wind speed, and humidity to provide maximum water savings while keeping landscapes healthy and beautiful. Add a simple-to-install flow meter and set up automatic notifications to alert you of broken pipes or sprinklers.

Hydrowise cloud software is a user-friendly water management tool. Homeowners can use Predictive Watering adjustments to lower their water bills. Hydrowise software enables professional managers to conduct in-depth water management while monitoring the piping and electrical systems. The professional cloud-based irrigation software enables the manager.

The Pro-HC Controller is EPA WaterSense approved when connected to Hydrowise web-based software.
