## Key Features

- **Industrial Sliding Door:** The cabinet features a metal net sliding door that provides a unique industrial aesthetic while allowing flexible access to storage compartments.
- **Versatile Usage:** This cabinet is suitable for various rooms, including the kitchen, living room, dining room, or hallway, offering storage for items such as plates, cups, books, or bathroom supplies.
- **Spacious Design:** Equipped with two open shelves, two drawers, and additional door-covered storage, along with a wide top surface, it provides ample space for organizing and displaying items.
- **Stable & Reliable Construction:** Crafted from quality engineered board and steel, this cabinet is designed for high stability and long-lasting use. It includes a back anti-toppling device for enhanced safety.
- **Compact Dimensions:** With overall dimensions of 35.5 inches (L) x 15.75 inches (W) x 35.5 inches (H), it is designed to fit effectively in various spaces. The top board has a weight capacity of 110 lbs.

## Setup and Assembly

Assembly of the HOMCOM Industrial Sideboard Buffet Cabinet is required. Please refer to the separate assembly instructions included with your product for detailed, step-by-step guidance. Ensure all components are present before beginning assembly. It is recommended to assemble the unit on a soft, clean surface to prevent scratches.

For safety, always install the provided anti-toppling device to secure the cabinet to a wall, especially in households with children or pets. This prevents accidental tipping.

## Operating Instructions

- **Sliding Door Operation:** To open or close the metal mesh door, gently slide it along the top track. Ensure the track is clear of obstructions for smooth movement.
- **Drawer Usage:** The two drawers are designed for easy access and storage. Pull the integrated handles to open and push to close. Avoid overloading drawers to ensure smooth operation.

- **Shelf Utilization:** The open shelves and interior compartments provide space for various items. Arrange items to distribute weight evenly and avoid placing excessively heavy objects on upper shelves.

## Maintenance

- **Cleaning:** Wipe surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners, which can damage the finish.
- **Dusting:** Regularly dust the cabinet with a dry, soft cloth to prevent buildup.
- **Hardware Check:** Periodically check all screws and fasteners to ensure they are tight. Retighten if necessary to maintain stability.
- **Spill Management:** Immediately wipe up any spills to prevent moisture damage to the engineered wood.

## Troubleshooting

- **Wobbly Cabinet:** Ensure the cabinet is placed on a level surface. Check all assembly hardware for tightness.
- **Sliding Door Sticking:** Inspect the sliding track for any debris or obstructions. Clean the track if necessary. Ensure the door is properly aligned on its rollers.
- **Drawers Not Closing Smoothly:** Check for any items obstructing the drawer slides. Ensure the drawer slides are clean and properly aligned.
