46 in. 9-Drawer Mobile Storage Cabinet with Solid Wood Top - White Workbench User Manual

INTRODUCTION

This manual provides essential information for the safe and effective use of your HFT 46-inch 9-Drawer Mobile Storage Cabinet. Designed for durability and functionality, this cabinet offers extensive storage capacity and a robust work surface. Please read this manual thoroughly before assembly and operation.

Image: The HFT 46-inch 9-Drawer Mobile Storage Cabinet in white, featuring a solid wood top and nine drawers with stainless steel handles, resting on casters.

SAFETY INFORMATION

WARNING: Always ensure that the total weight stored in the cabinet does not exceed the cabinet's weight capacity to prevent structural failure or accidents. Keep the key to the locking system in a safe place and out of reach of children to prevent unauthorized access or accidental drawer opening.

- Do not overload drawers. Refer to specifications for individual drawer weight limits.
- Ensure the cabinet is placed on a level surface to prevent tipping.
- Lock casters when the cabinet is stationary to prevent unintended movement.
- Use caution when moving the cabinet, especially when fully loaded.

PRODUCT FEATURES

- 10,300 cu. in. / 1200 lbs. tool storage capacity
- Smooth ball-bearing drawer slides with secure drawer retention system
- Two 200 lb. and seven 100 lb. rated drawers
- Rust resistant powder coat finish
- Keyed locking system
- Solid wood top for a durable work surface
- Heavy gauge steel construction
- Mobile design with casters for easy relocation

SETUP

Assembly is required for this product. Please follow these general steps:

1. **Unpacking:** Carefully unpack all components from the packaging. Verify that all parts listed in the packing list are present and undamaged.
2. **Caster Installation:** Attach the four casters to the designated mounting points on the bottom of the cabinet using the provided hardware (bolts, washers, nuts). Ensure all casters are securely tightened.
3. **Positioning:** Move the assembled cabinet to its desired location. Ensure the surface is flat and stable.
4. **Locking Casters:** Engage the locking mechanism on the casters to prevent the cabinet from moving unintentionally during use.

OPERATING INSTRUCTIONS

- **Opening Drawers:** Gently pull the drawer handle to open. The ball-bearing slides ensure smooth and effortless extension.
- **Closing Drawers:** Push the drawer firmly until it is fully closed and latched.
- **Loading Drawers:** Distribute the weight of your tools and equipment evenly within each drawer. Do not exceed the individual drawer weight capacities (200 lbs for the two larger drawers, 100 lbs for the seven smaller drawers). The total cabinet capacity is 1200 lbs.
- **Locking System:** Insert the key into the lock on the top drawer and turn to engage the central locking system, which secures all drawers. Remove the key after locking.
- **Mobility:** To move the cabinet, unlock the casters and use the side handle to guide it. Relock casters once the

cabinet is in its new position.

MAINTENANCE

- **Cleaning:** Wipe the exterior surfaces of the cabinet with a damp cloth as needed. Avoid abrasive cleaners that could damage the powder coat finish.
- **Drawer Slides:** Periodically inspect the ball-bearing drawer slides for smooth operation. If they become stiff, clean any accumulated dust or debris and apply a light lubricant suitable for metal slides.
- **Casters:** Keep the casters free of debris (e.g., string, hair, dirt) to ensure smooth rolling and proper locking functionality.
- **Wood Top:** The solid wood top can be cleaned with a damp cloth. For deeper cleaning or to maintain its finish, use wood-safe cleaning products as necessary.

TROUBLESHOOTING

- **Drawer is Sticking/Hard to Open:**
Solution: Check for obstructions inside the drawer or along the slides. Ensure the drawer is not overloaded. Clean and lubricate the ball-bearing slides if necessary.
- **Cabinet is Unstable/Wobbles:**
Solution: Verify that the cabinet is placed on a flat, level surface. Ensure all casters are locked when the cabinet is stationary. Check that all assembly hardware, especially for the casters, is securely tightened.
- **Lock Not Engaging/Drawers Not Securing:**
Solution: Ensure all drawers are fully closed before attempting to lock the cabinet. The central locking mechanism requires all drawers to be completely shut. Check if the key is fully inserted and turned correctly.
- **Casters Not Rolling Smoothly:**
Solution: Inspect casters for tangled debris (e.g., hair, string) and remove it. Clean the wheels and axles.

SPECIFICATIONS

Attribute	Detail
Brand	HFT
Model Number	0792363566131
Color	White
Dimensions (L x W x H)	20 x 40 x 20 inches
Weight Limit	1200 Pounds
Number of Drawers	9
Drawer Slide Type	Ball-bearing
Top Material	Solid Wood
Frame Material	Wood
