6. MAINTENANCE

Regular maintenance ensures the longevity and efficient operation of your air conditioner.

6.1 Air Filter Cleaning

The air filter should be cleaned every two weeks or more frequently depending on usage and air quality.

1. Unplug the unit from the power outlet.
2. Locate the air filter on the back of the unit.
3. Gently pull out the filter.
4. Wash the filter under running water (warm, soapy water if very dirty) or use a vacuum cleaner to remove dust.
5. Allow the filter to air dry completely before reinserting it into the unit. Do not expose to direct sunlight.

6.2 Water Drainage

In dehumidifier mode, or if the internal water tank becomes full in cooling mode, the unit will require drainage. The unit has a continuous drain option for dehumidifier mode.

- **Continuous Drainage (Dehumidifier Mode):** Attach the provided drain hose to the continuous drain port on the back of the unit. Position the other end of the hose into a floor drain or suitable container.
- **Manual Drainage (Cooling Mode):** If the internal tank is full, the unit may stop operating and display an error code. Place a shallow pan or tray under the drain plug at the bottom rear of the unit. Remove the drain plug to allow water to flow out. Replace the plug once drained.

6.3 Storage

Before storing the unit for an extended period:

1. Drain all condensed water from the unit.
2. Clean the air filter.
3. Unplug the power cord and coil it neatly.
4. Store the unit in a cool, dry place, away from direct sunlight and extreme temperatures.

7. TROUBLESHOOTING

Before contacting customer support, please refer to the following troubleshooting guide for common issues.

Problem	Possible Cause	Solution
Unit does not turn on.	No power, power cord unplugged, circuit breaker tripped.	Check power connection, reset circuit breaker.
Unit does not cool effectively.	Air filter dirty, room too large, windows/doors open, exhaust hose blocked or disconnected.	Clean air filter, ensure room size is within specifications, close windows/doors, check exhaust hose connection.
Water leakage.	Drain plug loose, unit not level, drain hose improperly connected (dehumidifier mode).	Ensure drain plug is secure, place unit on a level surface, check drain hose connection.
Noisy operation.	Unit not on a level surface, foreign object in fan.	Place unit on a level surface. If noise persists, contact customer support.
