- **Day Subdial:** Displays the current day of the week.

3.2 Water Resistance

This watch is water resistant to 50 meters (165 feet). This rating means the watch is suitable for short periods of recreational swimming. It is **not** suitable for diving, snorkeling, or prolonged water activities. Always ensure the crown is fully pushed in before any contact with water.

4. MAINTENANCE

4.1 Cleaning

To maintain the appearance of your watch, wipe the case and bracelet regularly with a soft, dry cloth. For stubborn dirt, a slightly damp cloth can be used, followed by immediate drying. Avoid using chemical cleaners or abrasive materials.

4.2 Battery Replacement

The watch is powered by a Lithium Metal battery. When the watch stops running, it indicates the battery needs replacement. It is highly recommended to have the battery replaced by an authorized GUESS service center or a professional watchmaker to ensure proper sealing and maintain water resistance.

4.3 Storage

When not in use, store your watch in a cool, dry place, away from direct sunlight and extreme temperatures. Keep it away from strong magnetic fields, which can affect the watch's accuracy.

5. TROUBLESHOOTING

- Watch not running:** Check if the crown is fully pushed in. If it is, the battery may need replacement.
- Incorrect time/date:** Refer to Section 2.1 for instructions on how to reset the time and date.
- Condensation under crystal:** This may indicate a loss of water resistance. Avoid further contact with water and have the watch inspected by a professional service center immediately.
