SETUP

1. Powering On and Placement

Connect the power adapter to the projector and a power outlet. The M2e features an adjustable stand for flexible placement. Position the projector on a stable surface, adjusting the stand to achieve the desired projection angle.

Figure 2: The portable design of the M2e allows for easy setup in various environments.

For portable use without a direct power outlet, the M2e can be powered by a USB-C power bank. Ensure the power bank is at least 45W (15V/3A) and supports Power Delivery (PD) protocol output.

2. Connectivity

The M2e offers a variety of input and output options for connecting your devices:

- **HDMI 1.4 (HDCP 1.4):** For connecting laptops, gaming consoles, and other media players.
- **USB-C:** For direct streaming from compatible devices like Switch gaming consoles or smartphones. (Note: For iOS devices, an Apple-authorized Lightning to HDMI adapter may be required).
- **USB-A (5V/2A):** For connecting USB drives or charging devices.
- **Micro SD (64GB, SDXC):** For playing media directly from a Micro SD card.
- **Audio Out:** 3.5mm jack for connecting external speakers or headphones.
- **Wi-Fi:** For network connectivity and screen mirroring.
- **Bluetooth:** For connecting external Bluetooth speakers or using the projector as a Bluetooth speaker.

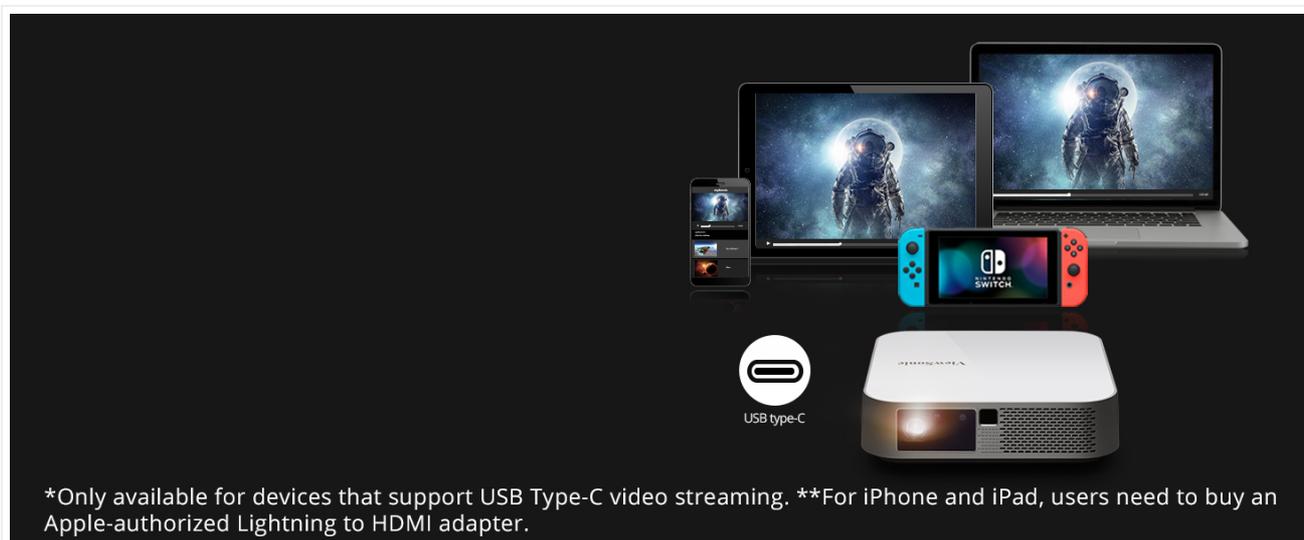

Figure 4: Direct content streaming via USB-C from compatible devices.

3. Screen Mirroring

The M2e supports screen mirroring from both iOS and Android devices. Ensure your device is connected to the same Wi-Fi network as the projector. Follow the on-screen instructions for your specific device to initiate screen mirroring.

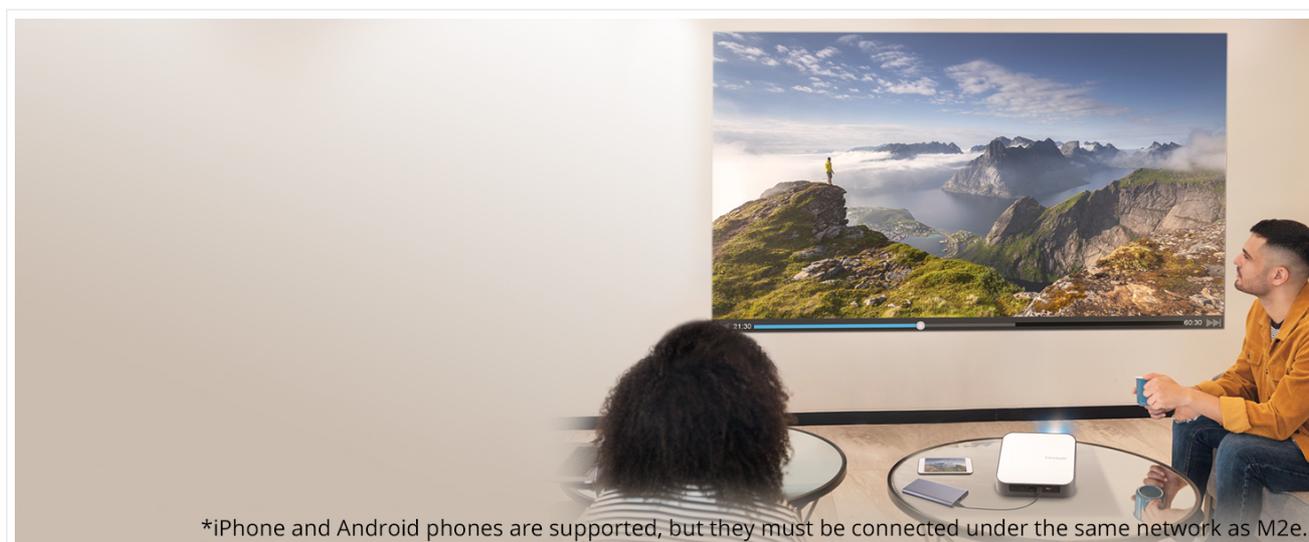

Figure 5: Share content from your mobile device on a bigger screen via Wi-Fi.

OPERATING THE PROJECTOR

1. Initial Power On and Auto Adjustments

Once powered on, the M2e features advanced instant auto-focus and auto H/V keystone correction. This automatically adjusts the image to be perfectly proportioned and sharp within seconds, even if the projector is placed at an angle.

Figure 6: Automatic keystone correction ensures a perfectly rectangular image.

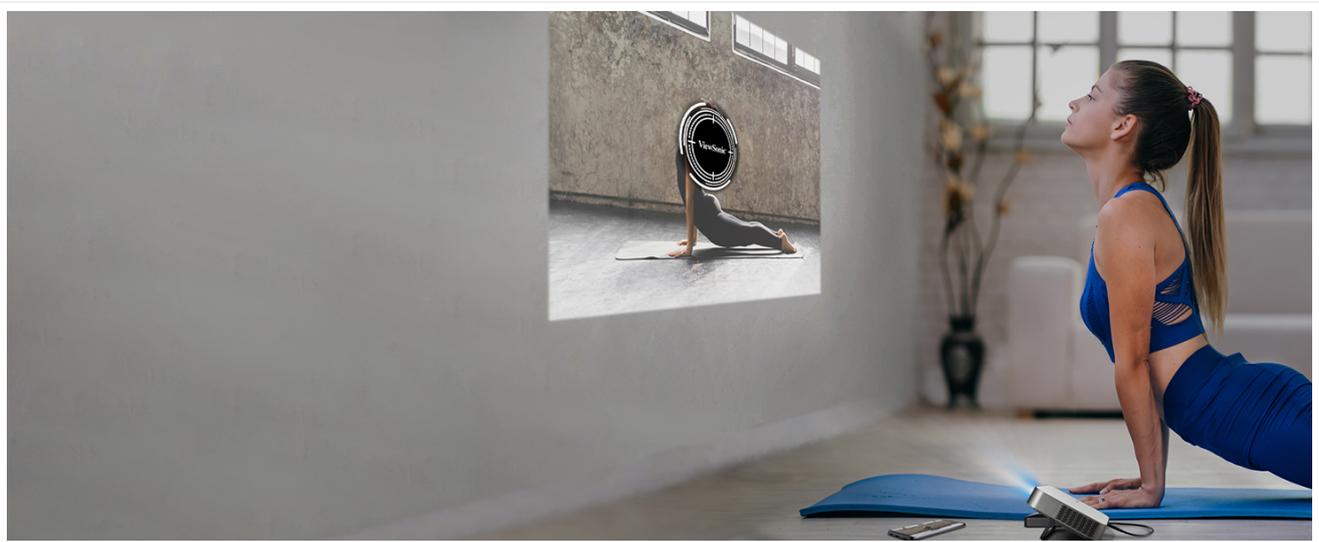

Figure 7: Instant auto-focus provides a clear and sharp image without manual adjustment.

2. Image Size and Quality

The M2e can project up to a 100-inch screen from approximately 9 feet away. For optimal sharpness and clarity, it is recommended to keep the projection size between 60 and 100 inches.

Figure 8: Projection distances for various screen sizes.

The projector delivers Full HD 1080p resolution with 125% Rec. 709 color accuracy, providing vivid and lifelike images. You can adjust color settings (warmth, gain) through the projector's menu to achieve your preferred visual output.

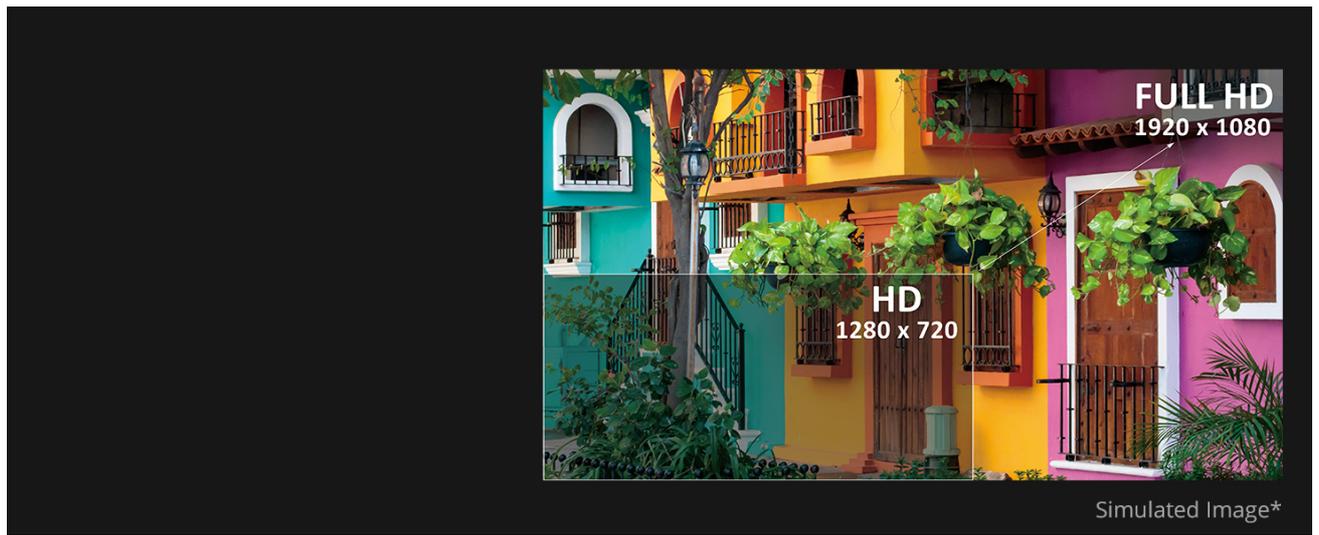

Figure 9: Experience Full HD 1080p resolution with the M2e.

3. Audio Features

The M2e is equipped with built-in dual Harman Kardon Bluetooth speakers, providing immersive stereo sound. You can also connect external Bluetooth speakers for an enhanced audio experience or use the projector as a standalone Bluetooth speaker.

Figure 10: Enjoy premium audio with integrated Harman Kardon speakers.

MAINTENANCE

The M2e utilizes a cutting-edge LED light source with a lifespan of up to 30,000 hours, significantly reducing the need for lamp replacements. To maintain optimal performance, keep the projector's lens clean and ensure proper ventilation during operation.

Figure 11: The M2e features a long-lasting, maintenance-free LED light source.

TROUBLESHOOTING

- **Image not clear/blurry:** Ensure the projector is placed on a stable surface. The auto-focus feature should correct this automatically. If not, check for any obstructions in front of the lens.
- **Image is skewed/not rectangular:** The auto H/V keystone correction should adjust the image. If manual adjustment is needed, navigate to the 'Basic Settings' menu and use the 4-Corner Adjustment feature.
- **No signal from input source:** Verify that the input cable (HDMI, USB-C) is securely connected to both the projector and the source device. Select the correct input source from the projector's menu.
- **App compatibility issues:** Some apps from the Aptoide TV App Center may be region-specific or require a keyboard/mouse for full functionality. Ensure the app is officially supported or try an alternative.
- **Firmware updates:** Regularly check for and install firmware updates via the 'Firmware Upgrade' option in the settings menu to ensure optimal performance and access to the latest features.

SPECIFICATIONS

Brand	ViewSonic
Model Number	M2E
Display Resolution	1920 x 1080 (Full HD)
Brightness	400 ANSI Lumens
