Breville BJB615SHY1BUS1

Breville the 3X Bluicer™ Blender and Juicer User Manual

Your all-in-one solution for blending and juicing.

PRODUCT OVERVIEW

The Breville 3X Bluicer™ (Model: BJB615SHY1BUS1) is a versatile appliance that combines the functionality of a powerful blender with a high-performance juicer. Designed for convenience and efficiency, it allows you to create fresh juices, smoothies, and even blend juice with other ingredients for vibrant, healthy creations. Key features include a 3.5-inch wide chute for whole fruits and vegetables, Cold Spin Technology for minimal temperature increase during juicing, 4 one-touch programs, and 5 speed settings. Its space-saving design integrates the pulp bin behind the base, optimizing countertop space.

SETUP

Before first use, ensure all parts are clean. The Breville 3X Bluicer is designed for easy assembly and disassembly.

1. Place the main motor base on a stable, flat surface.
2. Assemble the juicing components: Insert the micromesh filter basket into the juicer bowl, then place the juicer cover on top.
3. Secure the juicer assembly to the motor base using the safety locking arm.
4. Attach the pulp bin to the rear of the motor base.
5. For juicing directly into a glass, attach the cup nozzle to the juice spout. For blending or bluicing, position the 50 oz blender jug under the juice spout.
6. Insert the food pusher into the feed chute.

Visual Setup Guide

OPERATING INSTRUCTIONS

The Breville 3X Bluiicer offers intuitive controls for both juicing and blending.

Control Panel Overview

- **ON/OFF | PAUSE/CANCEL:** Powers the unit on/off and pauses/cancels operations.
- **AUTO CLEAN:** Initiates an automatic cleaning cycle for the blender jug.
- **SMOOTHIE:** Optimized program for creating smooth milk-based smoothies.
- **PULSE | ICE CRUSH:** Provides short bursts of power for chopping or crushing ice.
- **FROZEN COCKTAIL:** Pre-programmed setting for preparing frozen beverages.
- **Speed Settings (1-5):** Allows manual control over processing speed, from low (1) to high (5).

Juicing Function

The 3.5-inch extra-wide feed chute allows you to juice whole fruits and vegetables, minimizing prep time.

Image: Close-up of the 3.5-inch feed chute, designed to accommodate whole produce.

For optimal juice and nutrient extraction, the Cold Spin Technology ensures an insignificant temperature increase (less than 1.8°F) during the juicing process. Place your desired produce into the feed chute and use the food pusher to guide it down. Juice will flow directly into the attached jug or glass.

Blending Function

The Kinetix™ Bowl and Blade System combines the functionality of a powerful blender with food processing tasks. It's designed to crush ice into snow and create creamy smoothies and soups.

Add your ingredients to the 50 oz blender jug. Select one of the 4 one-touch programs (Smoothie, Pulse/Ice Crush, Frozen Cocktail) or manually choose a speed setting (1-5) for customized blending.

MAINTENANCE

Regular cleaning ensures optimal performance and longevity of your Breville 3X Bluiicer.

Cleaning the Blender Jug and Juicer Components

The 50 oz jug and most components are designed for easy cleaning. The Auto Clean function simplifies the process for the blender jug.

Image: The easy-clean 50 fl. oz. blender jug, designed for convenient maintenance.

For manual cleaning, use the provided cleaning brush to remove pulp from the micromesh filter basket. All removable parts are dishwasher safe, though hand washing is recommended for prolonged clarity and to prevent discoloration of plastic components.

TROUBLESHOOTING

If you encounter any issues with your Breville 3X Bluicer, please refer to the following common solutions:

- **Unit does not turn on:** Ensure the power cord is securely plugged into a working outlet and the safety locking arm is fully engaged.
- **Motor stalls during operation:** Reduce the amount of ingredients or cut larger pieces into smaller ones. Ensure the food pusher is not applying excessive force.
- **Excessive pulp in juice:** Ensure the micromesh filter basket is clean and properly installed. Some soft fruits may naturally produce more pulp.
- **Leaking from juicer spout:** Check that the juice spout is correctly positioned and the anti-drip stopper (if used) is fully closed when not in use.

For persistent issues, please contact customer support.

SPECIFICATIONS

Feature	Detail
Brand	Breville
Model Number	BJB615SHY1BUS1
Color	Smoked Hickory
Power	1000 Watts
Voltage	110 to 120 Volts
Capacity (Jug)	50 Fluid Ounces
Pulp Bin Capacity	3.2 Quarts
Product Dimensions	9.29"D x 15.63"W x 17.72"H
Blade Material	Stainless Steel
