## Outsunny 84C-101

# Outsunny 10' x 13' Patio Gazebo Instruction Manual

Model: 84C-101

## INTRODUCTION

---

Thank you for choosing the Outsunny 10' x 13' Patio Gazebo. This outdoor canopy shelter is designed to provide a comfortable and protected space for your garden, lawn, backyard, or deck. Featuring a durable aluminum frame, double-tier roof, and versatile netting and curtains, this gazebo offers both functionality and aesthetic appeal. Please read this manual carefully before assembly and use to ensure proper setup and long-lasting enjoyment of your product.

## SAFETY INFORMATION

---

**WARNING:** Avoid extreme weather conditions. This gazebo is designed for fair weather use and should not be used during strong winds, heavy rain, or snow. Disassemble or secure the canopy during adverse weather to prevent damage or injury. Assembly is required. Always follow all instructions carefully.

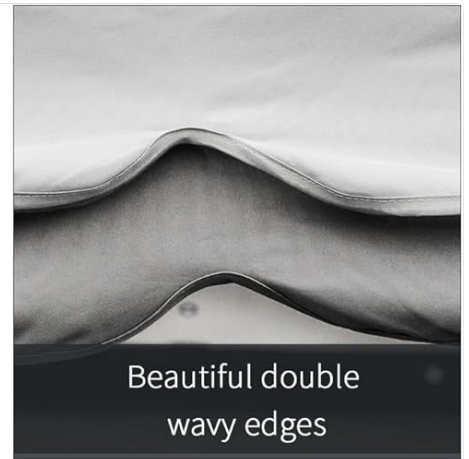

## SETUP AND ASSEMBLY

---

Assembly of the Outsunny Patio Gazebo requires careful attention to detail. It is highly recommended to have **3 to 4 adults** for the assembly process, especially when lifting and securing the frame components. Ensure all parts are present before beginning assembly. Follow the provided instructions step-by-step.

- **Frame Assembly:** Construct the aluminum frame according to the diagrams. Ensure all connections are secure.
- **Canopy Installation:** Carefully place the double-tier canopy over the frame. The double-tier design helps reduce heat and wind stress.
- **Securing the Gazebo:** For optimal stability, especially on soft ground, utilize the provided stakes by hammering them through the holes in the feet of the gazebo. For hard surfaces like decks or patios, consider using appropriate anchors (not included) or weight bags (not included) to prevent movement in windy conditions.

## More Details

Beautiful double wavy edges

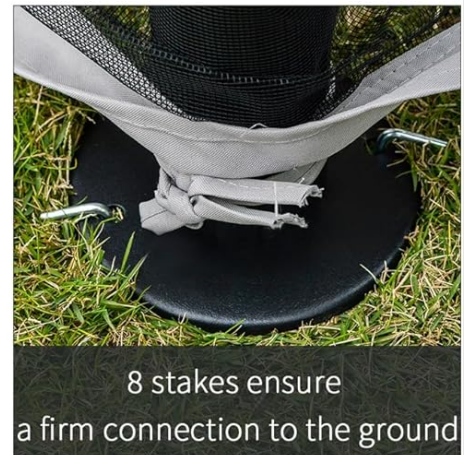

Single touch straps for convenience

Powder-coated aluminum frame

Curtains attach with easy to use hooks

8 stakes ensure a firm connection to the ground

## OPERATING INSTRUCTIONS

The Outsunny Gazebo is designed for versatile use, offering options for shade, privacy, and insect protection.

### Double-Tier Roof System

The gazebo features a double-tier roof, which not only enhances its aesthetic appeal but also provides improved air circulation. This design helps to reduce heat buildup underneath the canopy and minimizes wind stress, contributing to the gazebo's stability.

Image: Illustration of the vented soft top, showing 10 leaking holes to prevent water accumulation and the double canopy for increased breathability.

### Netting and Curtains

The gazebo includes both mosquito netting and privacy curtains, which can be used independently or together. The netting protects your space from unwanted insects, while the curtains offer privacy and shade from the sun and UV rays.

- **Full Enclosure:** Zip up all curtains and netting for complete privacy and insect protection.
- **Partial Enclosure:** Use only the netting to keep bugs out while maintaining an open feel, or use curtains on specific sides for targeted shade.
- **Open Air:** Tie back both the netting and curtains to the posts using the provided straps for an open and airy environment.

## 3-WAY USAGE GAZEBO

The curtains can block strong sunshine

Create a comfortable space

Easily removable for an open-air feel

## MAINTENANCE

---

Regular maintenance will help prolong the life of your Outsunny Gazebo.

- **Cleaning:** Clean the canopy and curtains with mild soap and water. Avoid harsh chemicals that may damage the fabric.
- **Frame Care:** The aluminum frame is rust-resistant. Wipe down the frame periodically to remove dirt and debris.
- **Water Drainage:** The canopy is equipped with grommets on top to help drain water on rainy days, preventing water accumulation that could stress the frame. Ensure these grommets remain clear of debris.
- **Seasonal Storage:** While the frame is durable, consider removing the canopy and curtains during off-seasons or prolonged periods of extreme weather to protect them from wear and tear.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Gazebo unstable in wind	Not properly secured to the ground.	Ensure stakes are fully hammered into soft ground. For hard surfaces, use appropriate anchors or weight bags. Avoid use in extreme weather.
Water pooling on canopy	Drain holes are blocked or canopy is not taut.	Clear any debris from the canopy's drain holes. Ensure the canopy is stretched tightly across the frame during installation.
Curtains/netting not sliding smoothly	Debris in tracks or damaged hooks.	Clean the tracks regularly. Inspect hooks for damage and replace if necessary.

## SPECIFICATIONS

Feature	Detail
Brand	Outsunny
