

Calypso K8501/3

Calypso Smartime K8501/3 Women's Digital Quartz Watch User Manual

Model: K8501/3

INTRODUCTION

This manual provides essential instructions for the setup, operation, and maintenance of your Calypso Smartime K8501/3 Digital Quartz Watch. Please read this manual carefully to ensure proper use and to maximize the lifespan of your device.

The Calypso Smartime K8501/3 is a digital quartz watch designed for women, featuring a durable silicone bracelet and advanced functionalities including temperature measurement. It is built to withstand daily use with an IP68m waterproof rating.

PACKAGE CONTENTS

- Calypso Smartime K8501/3 Digital Quartz Watch
- Charging Cable (if applicable, not specified but common for digital watches)
- User Manual (this document)

SETUP

1. Initial Charging

Before first use, ensure your watch is fully charged. Connect the provided charging cable to the watch's charging port and a suitable USB power source. A full charge typically takes approximately 2 hours. The battery icon on the display will indicate charging status.

2. Powering On/Off

- **To Power On:** Press and hold the side button (if present) for a few seconds until the display lights up.
- **To Power Off:** Navigate to the 'Settings' menu on the watch, then select 'Power Off' or press and hold the side button and confirm power off.

3. Time and Date Setting

The watch typically synchronizes time and date automatically when connected to a smartphone application. If manual adjustment is needed, navigate to the 'Settings' menu on the watch display and locate 'Time' or 'Date' options to set them manually.

OPERATING INSTRUCTIONS

1. Basic Navigation

The Calypso Smartime K8501/3 features a digital display. Navigation is typically performed via touch gestures on the screen or by using a single side button, if available.

- **Swipe Up/Down:** To scroll through menus or notifications.
- **Swipe Left/Right:** To switch between different display screens (e.g., time, activity data, temperature).
- **Tap:** To select an item or confirm an action.
- **Side Button (if present):** Typically used to wake the screen, return to the home screen, or access the main menu.

2. Display Overview

Image: The Calypso Smarttime K8501/3 watch display. It shows the current time (08:08), date (04/19), day of the week (SUN), and battery status. A prominent feature is the temperature reading (36.5°C) with a graphical representation of temperature trends over 24 hours.

The main display provides key information at a glance:

- **Time and Date:** Digital display of current time and date.
- **Battery Indicator:** Shows the remaining battery life.
- **Temperature Measurement:** Displays current body temperature (e.g., 36.5°C) and a 24-hour trend graph.
- **Connectivity Status:** An icon indicating Bluetooth connection to a paired device.

3. Temperature Monitoring

The watch is equipped with a temperature sensor. To view your current temperature, navigate to the dedicated temperature screen. The watch may periodically measure and record your temperature, displaying a trend graph over 24 hours. For accurate readings, ensure the watch is worn snugly on your wrist.

4. Water Resistance (IP68m)

The Calypso Smartime K8501/3 has an IP68m waterproof rating. This means it is protected against continuous immersion in water up to a specified depth and duration. It is suitable for swimming and showering but should not be used for diving or high-pressure water activities. Avoid exposing the watch to hot water or steam, as this can compromise the seals.

MAINTENANCE

1. Cleaning

Regularly clean your watch and strap to prevent skin irritation and maintain its appearance. Use a soft, damp cloth to wipe the watch face and strap. For silicone straps, mild soap and water can be used, ensuring to rinse thoroughly and dry completely before wearing.

2. Battery Care

- Avoid fully discharging the battery frequently.
- Charge the watch using only the provided or a compatible charging cable.
- Do not expose the watch to extreme temperatures, as this can affect battery life.

3. Storage

When not in use for extended periods, store the watch in a cool, dry place. It is advisable to charge the battery to about 50% before long-term storage to preserve battery health.

TROUBLESHOOTING

- **Watch not turning on:** Ensure the watch is fully charged. Connect it to the charger for at least 30 minutes. If it still doesn't turn on, try a different charging port or cable.
- **Display not responding:** Try restarting the watch by holding down the side button (if applicable) or by connecting it to the charger.
- **Inaccurate temperature readings:** Ensure the watch is worn snugly on your wrist. Avoid taking readings immediately after strenuous activity or in extreme environmental conditions.
- **Water ingress:** Despite its IP68m rating, severe impacts or exposure to hot water/steam can compromise water resistance. If water enters the device, power it off immediately and contact customer support.

SPECIFICATIONS

Feature	Detail
Model Number	K8501/3

Brand	Calypso
Movement Type	Quartz
Case Material	Rubber (Green)
Strap Material	Silicone (Green)
Dial Color	Black
Case Diameter	24 mm
