

SVD.PET Waterproof Dog Bark Collar

SVD.PET Waterproof Dog Bark Collar User Manual

Model: Waterproof Dog Bark Collar

INTRODUCTION

The SVD.PET Waterproof Dog Bark Collar is designed to assist in training your dog to reduce excessive or unnecessary barking. This device utilizes intelligent bark detection to provide consistent and appropriate stimuli, helping to modify your dog's behavior effectively. Please read this manual thoroughly before use to ensure proper operation and your dog's safety.

PACKAGE CONTENTS

- 1 x Bark Control Collar Unit
- 1 x Adjustable Nylon Strap
- 1 x USB Charging Cable
- 1 x Tester (for static shock mode)
- 2 x Long Contact Points (Copper)
- 2 x Short Contact Points (Copper)
- 4 x Silicone Caps for Contact Points
- 1 x User Manual

PRODUCT FEATURES

- **Two Training Modes:** Offers both Vibration Mode and Static Shock Mode (no-harm).
- **Five Sensitivity Levels:** Adjustable sensitivity to detect barking, suitable for various dog temperaments.
- **Intelligent Bark Detection:** Advanced microphone and smart chip accurately analyze barking, filtering out other noises and preventing false triggers.
- **Rechargeable Battery:** Built-in battery charges via mini-USB, providing up to 45 days of standby time on a 1-2 hour charge.
- **Waterproof Design (IP67):** Allows the collar to be worn in rain or during water play, but avoid prolonged submersion.
- **Lightweight and Compact:** Unit dimensions are approximately 2.2" x 1.4", ensuring comfort for your dog.
- **Adjustable Strap:** Fits medium to large dogs weighing between 15-120 lbs.

Image Description: A close-up view of the SVD.PET bark collar's main unit, showing the green casing, power button, mode button, and contact points. The black adjustable strap is visible.

SAFETY INFORMATION

- Do not leave the collar on your dog for more than 12 consecutive hours.
- Regularly check your dog's neck for signs of irritation or pressure sores. If found, discontinue use until the skin heals.
- Ensure the collar is fitted correctly; it should be snug but allow one finger to fit comfortably between the collar and your dog's neck.
- The static shock mode is designed to be a mild deterrent. Always start with the lowest effective setting.
- This collar is intended for healthy dogs. Consult a veterinarian if your dog has any health concerns.
- Not suitable for puppies under 6 months old or dogs weighing less than 15 lbs.

SETUP GUIDE

1. Charging the Collar

Before first use, fully charge the bark collar. Connect the included mini-USB cable to the charging port on the collar unit and plug the other end into a USB power adapter (not included) or computer USB port. The indicator light will show charging status. A full charge typically takes 1-2 hours.

Built-in Rechargeable Battery

The built-in battery can be charged using the included mini-USB cable.

2 Hour
Charging

Up to 45 days
standby time

Image Description: An illustration showing the SVD.PET bark collar being charged via a mini-USB cable. Text indicates "Built-in Rechargeable Battery," "2 Hour Charging," and "Up to 45 days standby time."

2. Attaching Contact Points and Silicone Caps

Select the appropriate length of contact points (short for short-haired dogs, long for long-haired dogs) to ensure proper skin contact. Screw them firmly into the collar unit. For added comfort and to prevent skin irritation, place the silicone caps over the contact points.

3. Testing the Static Shock Mode (Optional)

To verify the static shock function, hold the tester light against the contact points. Activate the collar (see Operating Instructions) and set it to static shock mode. Bark into the microphone or simulate a bark. The tester light should illuminate, indicating the static shock is functioning. This test is not necessary for vibration mode.

OPERATING INSTRUCTIONS

Power On/Off

- **To Power On:** Press and hold the Power button (red circle) for 2 seconds. The indicator lights will flash.
- **To Power Off:** Press and hold the Power button (red circle) for 2 seconds. The indicator lights will turn off.

Switching Modes (Vibration / Static Shock)

With the collar powered on, press the 'M' button to cycle between Vibration Mode and Static Shock Mode. The indicator lights will show the currently selected mode.

Adjusting Sensitivity Levels

The collar has 5 sensitivity levels. To adjust, press the 'O' button (circle with dot). Each press will cycle through the levels. A higher number indicates higher sensitivity to barking. Start with a lower sensitivity and adjust as needed.

2 Modes
(Vibration Mode & No-Harm Static Mode)
5 Sensitivity Levels

FITTING THE COLLAR

1. Ensure the collar unit is centered on your dog's throat, with the contact points touching the skin.
2. Adjust the strap so it is snug, but not too tight. You should be able to fit one finger comfortably between the collar and your dog's neck.
3. Trim any excess strap length if necessary, and use the buckle to secure it.
4. Periodically check the fit, especially for growing puppies or dogs with changing coat thickness.

Lightweight & Compact

The smallest no-bark collar on the market!

The adjustable strap will fit dogs between 15-120 lbs

Image Description: An illustration showing the dimensions of the SVD.PET bark collar unit (2.2 inches wide, 1.4 inches tall) and how the adjustable reflective strap fits dogs between 15-120 lbs. A hand is shown holding the compact unit for scale.

TRAINING TIPS

- Introduce the collar gradually. Let your dog wear it for short periods without activation first.
- Use the collar as a training aid, not a punishment device.
- Combine collar use with positive reinforcement when your dog exhibits desired quiet behavior.
- Observe your dog's reaction to the collar. If they show signs of stress or discomfort, re-evaluate the settings or

consult a professional trainer.

- Consistency is key. Use the collar consistently during periods when barking is an issue.

The image shows a woman with blonde hair, wearing a grey sleeveless top and black jeans, walking a light brown dog on a leash. The dog is wearing a green collar. Three circular icons are overlaid on the image: an alarm clock, a car with flashing lights, and a dog's head silhouette, each with sound waves emanating from it. To the right of the image, there is a grey panel with a blue shield icon containing a checkmark, the text 'ANTI-FALSE Triggering', and a paragraph explaining the smart chip's function.

ANTI-FALSE Triggering

Smart chip can effectively distinguish the sound around the dog, and prevent the FALSE triggering by intelligent analysis.

Image Description: An image depicting a person walking a dog, illustrating the "Anti-False Triggering" feature of the SVD.PET bark collar. Icons represent common sounds like alarms and cars, which the smart chip can distinguish from barking.

MAINTENANCE

- Clean the collar unit and strap regularly with a damp cloth. Avoid harsh chemicals.
- Ensure the charging port cover is securely closed when not charging to maintain waterproofing.
- Store the collar in a cool, dry place when not in use.
- Periodically check the contact points for wear and tear.

REMOVE the bark collar when your dog is playing in the water. Splashes from the activity might trigger the collar.

**WATER
RESISTANT**

- No need to worry about **rain, dust** or **snow**.
- Easy to clean

Image Description: A couple walking a Golden Retriever in a snowy environment, illustrating the water-resistant feature of the SVD.PET bark collar. While the collar has an IP67 waterproof rating, it is recommended to be mindful during water activities as excessive splashes might cause false triggers.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Collar not activating when dog barks.	Low battery. Sensitivity level too low. Contact points not touching skin. Dog's bark is too soft for current sensitivity.	Recharge the collar. Increase sensitivity level. Adjust collar fit; ensure contact points are snug against the skin. Ensure correct contact point length is used.

Problem	Possible Cause	Solution
Collar activating without dog barking (false triggers).	Sensitivity level too high. External noises (other dogs, loud sounds). Collar rubbing against dog's fur/neck.	Decrease sensitivity level. Ensure collar is fitted correctly and not too loose. The intelligent bark detection should minimize this, but extreme external noise might still trigger it.
Collar not holding a charge.	Faulty charging cable or adapter. Battery degradation.	Try a different USB charging cable and adapter. Contact customer support if the issue persists.

SPECIFICATIONS

- **Brand:** SVD.PET
- **Model:** Waterproof Dog Bark Collar
- **Dimensions:** Approximately 5.59 x 3.81 x 3.56 cm (2.2" x 1.5" x 1.4")
- **Weight:** Approximately 60 g
- **Battery:** 1 Lithium Ion (included)
- **Charging Time:** 1-2 hours
- **Standby Time:** Up to 45 days
- **Waterproof Rating:** IP67
- **Material:** Copper (contact points), Plastic (unit casing), Nylon (strap)
- **Suitable for Dogs:** 15-120 lbs
