## 2.2 Driver Installation

Before using the tablet, it is essential to install the latest driver. Please uninstall any existing tablet drivers from other brands to avoid conflicts. Follow these steps:

1. Ensure the tablet is securely connected to your computer.
2. Visit the official VEIkk website ([www.veikk.com](http://www.veikk.com)) and navigate to the 'Download' section.
3. Download the appropriate driver for your operating system (Windows, Mac, or Linux).
4. Run the installer and follow the on-screen instructions.
5. For macOS users, you may need to grant permissions in 'System Preferences > Security & Privacy > General' and 'Accessibility' to allow the driver to function correctly. Refer to the video below for detailed macOS driver installation instructions.
6. Restart your computer if prompted.

## 4. MAINTENANCE

---

To ensure the longevity and optimal performance of your VEIKK VK1060PRO V2 drawing tablet, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to wipe the tablet surface. For stubborn marks, a slightly damp cloth with mild soap can be used, but ensure no liquid enters the device. Avoid abrasive cleaners or solvents.
- **Stylus Nibs:** The pen nibs will wear down over time. Replace them when they become too short or sharp to maintain proper pressure sensitivity and prevent scratching the tablet surface. Use the included nib remover tool for easy replacement.
- **Storage:** Store the tablet in a cool, dry place away from direct sunlight and extreme temperatures. Avoid placing heavy objects on the tablet.
- **Cable Care:** Do not bend or crimp the USB cable excessively, as this can damage the internal wires.

## 5. TROUBLESHOOTING

---

If you encounter issues with your VEIKK VK1060PRO V2 tablet, refer to the following common solutions:

- **No Pen Pressure/Tablet Not Responding:**
  - Ensure the tablet is securely connected to your computer.
  - Verify that the correct driver is installed and up-to-date. Uninstall any conflicting drivers from other brands.
  - Restart your computer after driver installation or updates.
  - Check the pen nib; replace it if it is worn or damaged.
  - For macOS, ensure the driver has the necessary permissions in 'System Preferences > Security & Privacy > General' and 'Accessibility'.
- **Cursor Lag or Jitter:**
  - Ensure your computer meets the minimum system requirements.
  - Close other demanding applications running in the background.
  - Check for any electromagnetic interference from other electronic devices.
- **Express Keys/Scroll Wheels Not Working:**

- Open the VEIKK driver software and ensure the keys/wheels are properly configured.
- Test the functionality in different applications to see if the issue is software-specific.

• **Tablet Not Recognized by Android Device:**

- Ensure your Android device supports OTG functionality.
- Use the correct OTG-C connector.
- Some Android devices (e.g., Samsung) may have limited compatibility.

If the issue persists after trying these steps, please contact VEIKK customer support for further assistance.
