D-Link DAP-1720

D-Link AC1750 WiFi Range Extender (DAP-1720) User Manual

Extend your wireless network coverage and eliminate dead zones.

1. Introduction

The D-Link AC1750 WiFi Range Extender (DAP-1720) is designed to expand the coverage of your existing wireless network, providing a stronger and more reliable Wi-Fi signal throughout your home or office. This device supports dual-band connectivity (2.4 GHz and 5 GHz) with combined speeds up to 1750 Mbps, making it ideal for high-bandwidth activities like 4K streaming and online gaming across multiple devices. Its smart signal indicator assists in finding the optimal placement for maximum coverage.

2. Product Overview

The DAP-1720 features a compact, plug-in design with external antennas for enhanced signal strength. It includes a Gigabit Ethernet port for wired connections and a smart signal indicator for easy setup.

2.1 Key Features

- Extends Wi-Fi coverage and eliminates dead spots with Dual Band connectivity.
- Supports both 2.4 GHz and 5 GHz bands for combined speeds up to 1750 Mbps.
- Smart Signal Indicator helps identify the best location for optimal Wi-Fi coverage.
- Features a 3x3 antenna configuration for improved data rates and reliability.
- Includes a 10/100/1000 Gigabit Ethernet Port for wired device connectivity.

2.2 Device Layout

Figure 1: Front view of the D-Link DAP-1720 with antennas extended, showing the power and signal indicator lights.

Figure 2: Angled view of the D-Link DAP-1720, highlighting the side ventilation and a power switch.

Figure 3: Front view of the D-Link DAP-1720 with antennas folded, showing its compact form factor.

Figure 4: Back view of the D-Link DAP-1720, displaying the integrated power plug for wall outlet installation.

3. Setup Instructions

There are two primary methods to set up your D-Link DAP-1720 Range Extender: using Wi-Fi Protected Setup (WPS) or manual configuration via a web browser.

3.1 WPS Setup (Recommended)

1. **Power On:** Plug the DAP-1720 into a power outlet near your existing wireless router. Wait for the power LED to turn solid green.
2. **Activate WPS on Router:** Press the WPS button on your wireless router. Refer to your router's manual for the exact location of this button.
3. **Activate WPS on Extender:** Within two minutes, press the WPS button on the DAP-1720 (often indicated by a circular arrow icon).
4. **Monitor Status:** The signal indicator LEDs on the DAP-1720 will flash during the connection process. Once connected, the LEDs will turn solid green, indicating a successful connection.
5. **Optimal Placement:** Unplug the DAP-1720 and move it to a location halfway between your router and the Wi-Fi dead zone. Plug it into a power outlet. The Smart Signal Indicator LEDs will help you find the best spot. Aim for at least two solid green bars for good signal strength.

Note: If the signal indicator shows red or only one bar, move the extender closer to your router.

3.2 Manual Setup (Web Browser)

1. **Power On:** Plug the DAP-1720 into a power outlet near your existing wireless router.
2. **Connect to Extender:** On your computer or mobile device, connect to the D-Link extender's default Wi-Fi network (e.g., "dlink-XXXX"). The default Wi-Fi name and password are usually found on a label on the device or in the Quick Installation Guide (QIG).
3. **Access Setup Wizard:** Open a web browser and type **http://dlinkap.local** or the default IP address (e.g., **192.168.0.50**) into the address bar.
4. **Follow On-Screen Instructions:** The setup wizard will guide you through selecting your existing Wi-Fi network(s) and configuring the extender's settings, including its new Wi-Fi name and password.
5. **Optimal Placement:** After configuration, unplug the DAP-1720 and move it to a suitable location as described in step 5 of the WPS setup.

4. Operating Your Range Extender

4.1 Connecting Devices

- **Wireless Devices:** Once the extender is set up, search for the new extended Wi-Fi network name (SSID) on your devices (e.g., "YourNetworkName_EXT" or "YourNetworkName_5G_EXT") and connect using the password you configured.
- **Wired Devices:** For devices like smart TVs, gaming consoles, or desktop computers that benefit from a stable wired connection, use an Ethernet cable to connect them to the Gigabit Ethernet port on the DAP-1720.

4.2 Dual-Band Functionality

The DAP-1720 operates on both 2.4 GHz and 5 GHz frequency bands. The 2.4 GHz band offers wider coverage and better penetration through walls, while the 5 GHz band provides faster speeds over shorter distances with less interference. Your devices will automatically connect to the optimal band, or you can manually select the preferred band if separate SSIDs were configured during setup.

5. Maintenance

- **Firmware Updates:** Periodically check the D-Link support website for firmware updates. Keeping your device's firmware up-to-date ensures optimal performance, security, and access to new features.
- **Cleaning:** Ensure the device's ventilation slots are clear of dust to prevent overheating. Use a soft, dry cloth for cleaning. Do not use liquid cleaners.
- **Resetting the Device:** If you encounter persistent issues or wish to reconfigure the extender from scratch, you can perform a factory reset. Locate the reset button (usually a small pinhole) on the device, and while the device is powered on, press and hold it for about 10 seconds using a paperclip until the LEDs flash.

6. Troubleshooting

6.1 No Internet Access After Connecting to Extender

- **Check Router Connection:** Ensure your main router is working correctly and has internet access.
- **Extender Placement:** Verify the DAP-1720 is placed within range of your main router. The Smart Signal Indicator should show at least two green bars. Relocate if necessary.
- **Re-run Setup:** Try re-running the WPS or manual setup process to ensure the extender is properly connected to your main Wi-Fi network.
- **IP Address Conflict:** If you manually configured the extender, ensure its IP address does not conflict with other devices on your network.

6.2 Poor Signal or Slow Speeds

- **Relocate Extender:** Move the extender closer to your main router. The ideal location is halfway between the router and the area needing coverage.
- **Minimize Interference:** Keep the extender away from large metal objects, concrete walls, and devices that emit radio frequency interference (e.g., microwaves, cordless phones).
- **Check Router Performance:** Ensure your main router is providing adequate signal strength and speed.
- **Firmware Update:** Ensure the extender's firmware is up-to-date.

6.3 Cannot Access Web-Based Setup Page

- **Verify Connection:** Ensure your device is connected to the extender's Wi-Fi network (e.g., "dlink-XXXX") or directly via Ethernet.
- **Correct Address:** Double-check that you are typing **http://dlinkap.local** or the correct IP address into your browser's address bar.
- **Clear Browser Cache:** Try clearing your browser's cache and cookies, or use a different browser.
- **Temporarily Disable Firewall/Antivirus:** Your computer's security software might be blocking access.
- **Factory Reset:** If all else fails, perform a factory reset and attempt the manual setup again.

7. Specifications

Feature	Detail
Model Number	DAP-1720/RE
Wireless Standard	802.11ac, 802.11n
Data Transfer Rate	Up to 1750 Mbps (450 Mbps on 2.4GHz, 1300 Mbps on 5GHz)

Feature	Detail

Frequency Band Class	Dual-Band
Ethernet Port	1 x 10/100/1000 Gigabit Ethernet Port
Antenna Configuration	3x3 Internal Antennas
Product Dimensions	6.5 x 2.5 x 1.5 inches
Item Weight	8 ounces
Included Components	DAP-1720 device, Quick Installation Guide (QIG)

8. Warranty and Support

For detailed warranty information, technical support, and additional resources, please visit the official D-Link support website. You can find FAQs, updated drivers, and contact information for customer service.

RF Exposure Evaluation Report

Report No. : FA680111

Project No: CB160917B

RF Exposure Evaluation Report

Equipment : AC1750 Wi-Fi Range Extender
Brand Name : D-Link
Model No. : DAP-1720
FCC ID : KA2AP1720A1
Standard : 47 CFR Part 2.1091
Applicant : D-Link Corporation
No.289, Sinhu 3rd Rd., Neihu District, Taipei City 114,

The product sample received on Jun. 01, 2016 and completely tested on Dec. 12, 2016. We, SPORTON, would like to declare that the tested sample has been evaluated in accordance with 47 CFR Part 2.1091, and pass the limit.

Without written approval of SPORTON INTERNATIONAL INC., the test report shall not be reproduced except in full.
