TROUBLESHOOTING

Desk feels wobbly after assembly:

Ensure all screws and bolts are fully tightened. Check that the desk is placed on a level surface. If necessary, adjust the feet (if applicable) or place shims under the legs to stabilize.

Difficulty inserting screws during assembly:

Verify that you are using the correct screw for the designated hole. Do not force screws; ensure proper alignment before tightening. If a hole appears stripped, contact customer support for assistance.

Scratches on surfaces:

Minor scratches on the wood finish may be touched up with a wood repair marker. For deeper scratches or damage to the metal frame, contact customer support for advice.
